POORCA MISERIA!

1. SOCIAL LOOK & FEEL

(Pig Misery!)

CREATING

SOCIAL POSTS >

Before we delve into the details of the design look and feel, here's some simple guides on creating new social content:

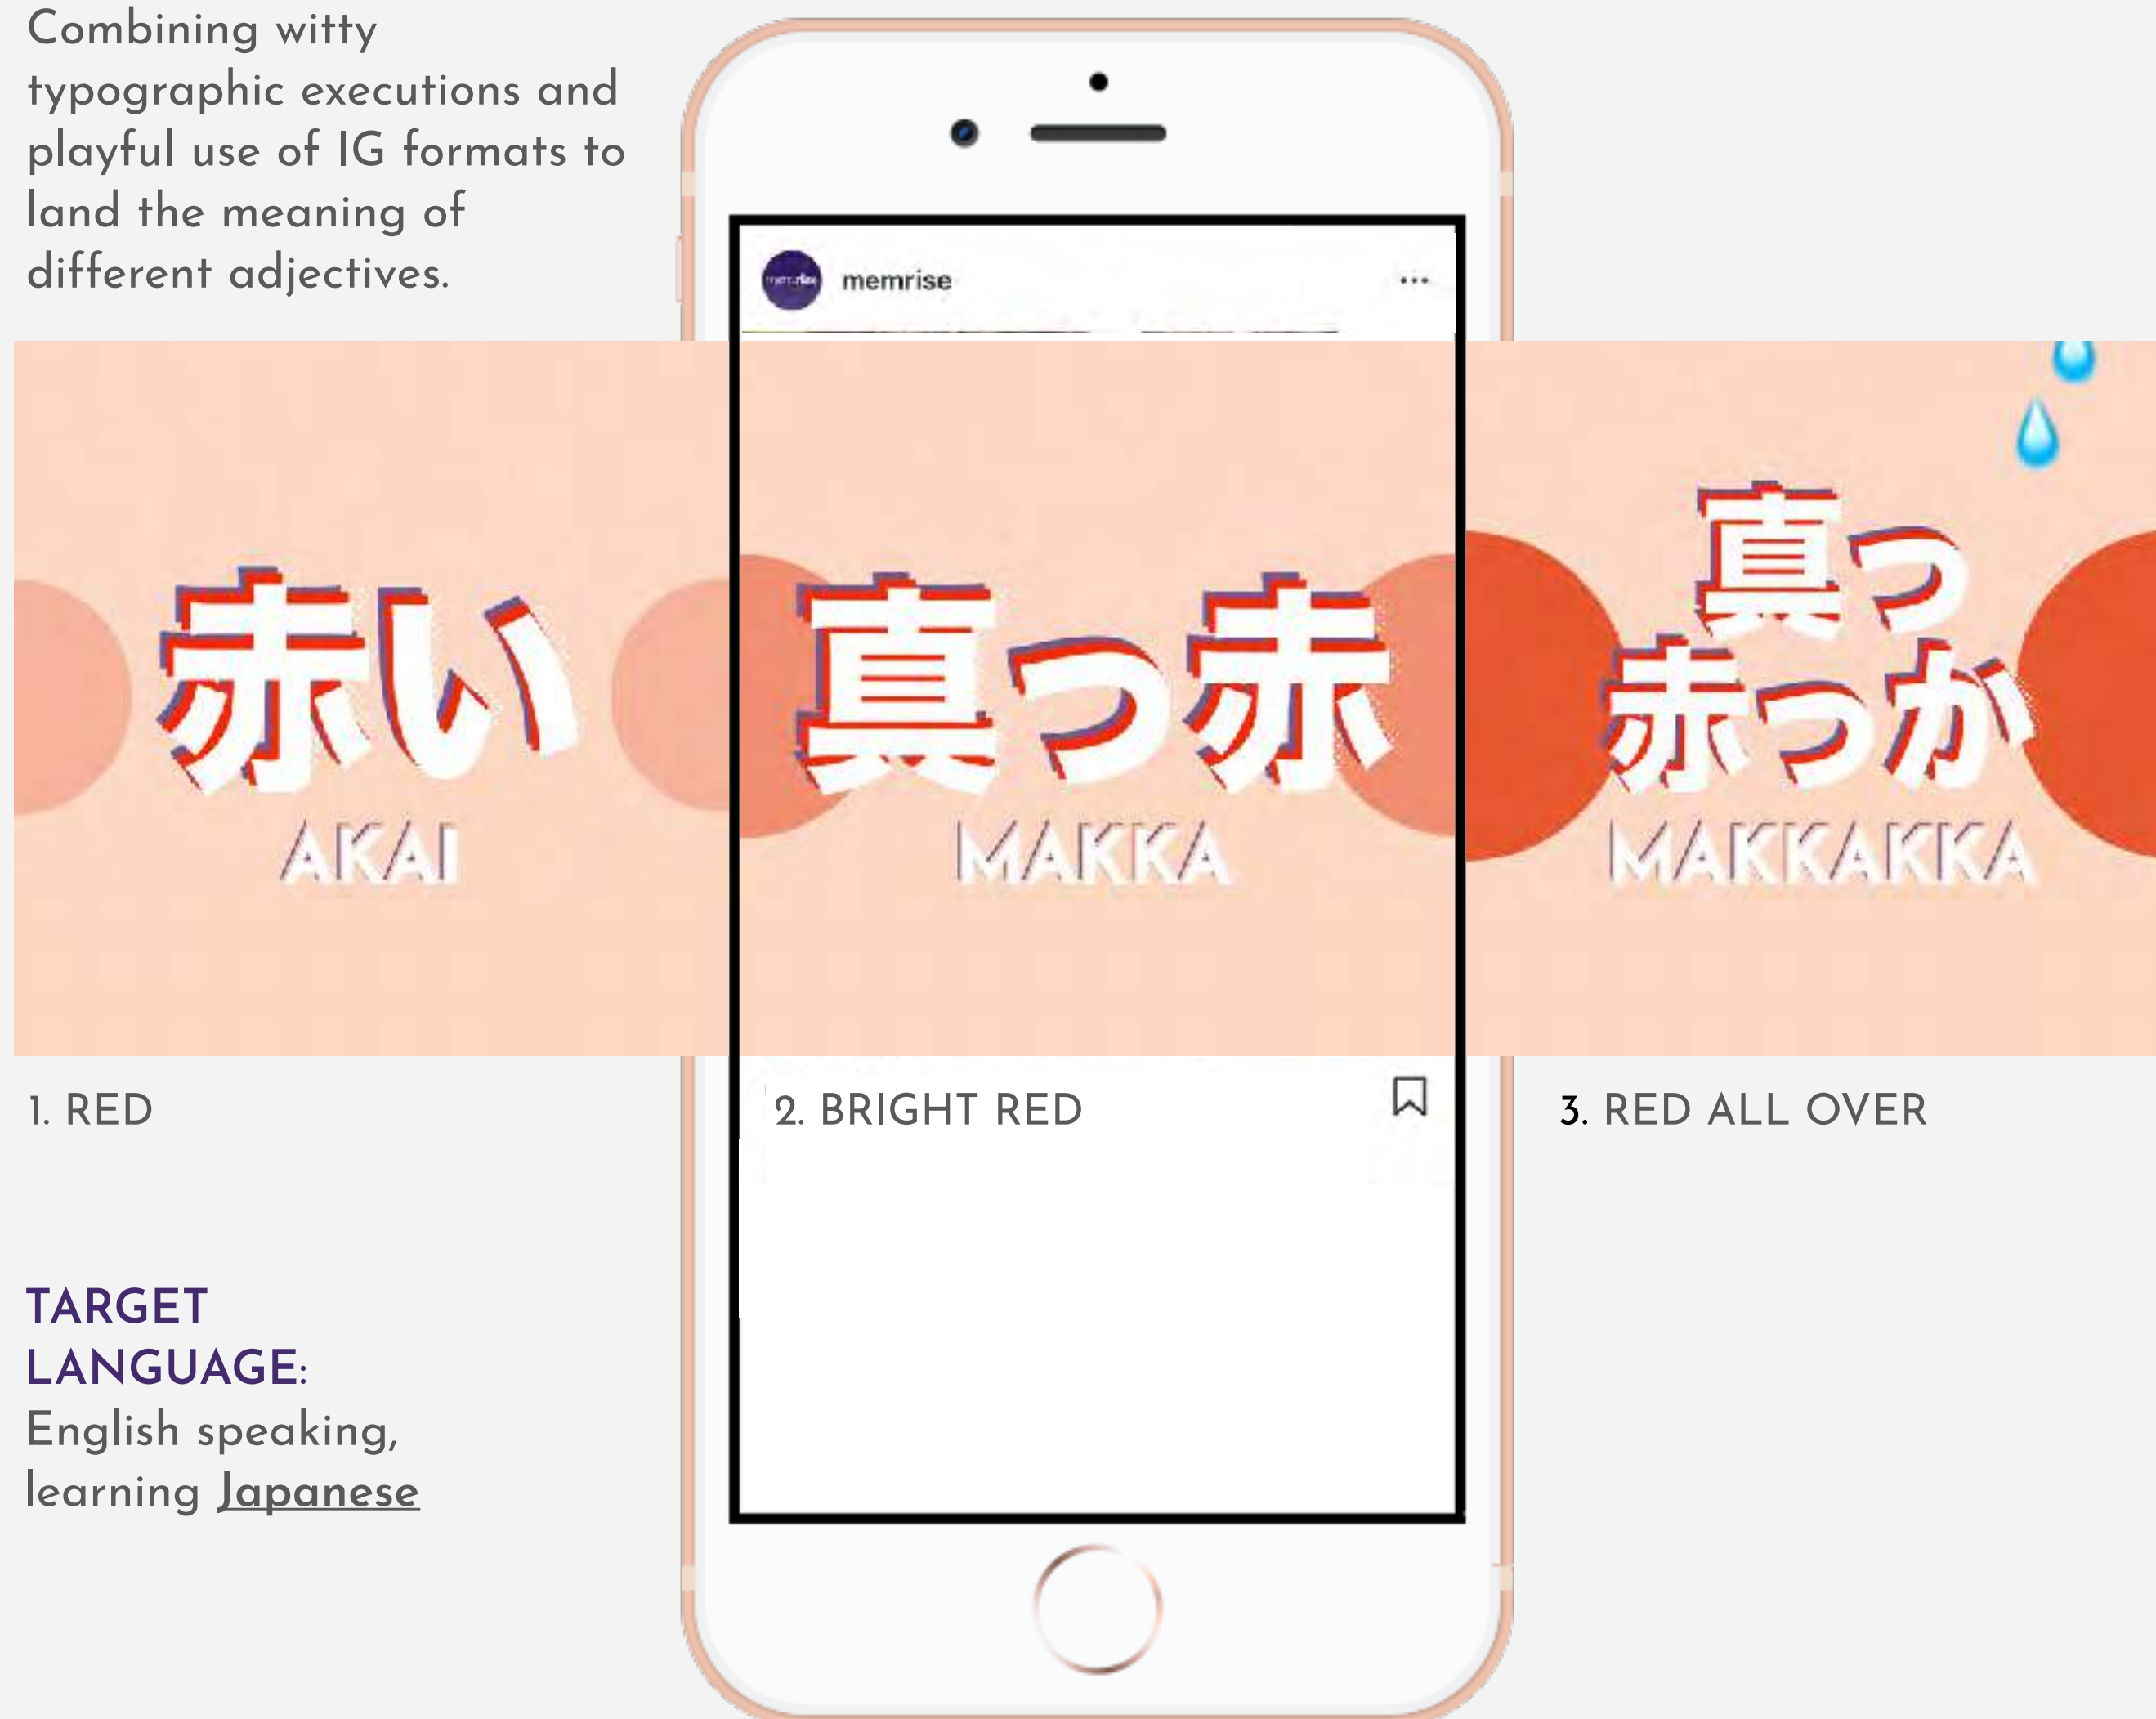

1. What is the concept?
2. What target language is it for?
3. What are the words and how can we visually convey the translation?
4. Will it require photography or video?

The concept/theme(s) should be fun, light-hearted and engaging. From here, you can decide what colours are relevant for the theme and visual approach to best convey your message.

On this example, the concept was around cheeks blushing, so using typography combined with simple illustrations and relevant colours (Memrise reds) to support the message; we created an abstract face - making it playful, visually engaging and highly effective in learning process.

**EXAMPLE
TYPEADJECTIVES
TEMPLATE:**

Combining witty typographic executions and playful use of IG formats to land the meaning of different adjectives.

1. RED

2. BRIGHT RED

3. RED ALL OVER

**TARGET
LANGUAGE:**

English speaking,
learning Japanese

EXAMPLE:

INSTA FEED >

The Memrise instagram feed should contain fun and engaging fresh learning content across various available Memrise languages.

This guide is available to help create a consistent visual language that can be applied across all social media assets.

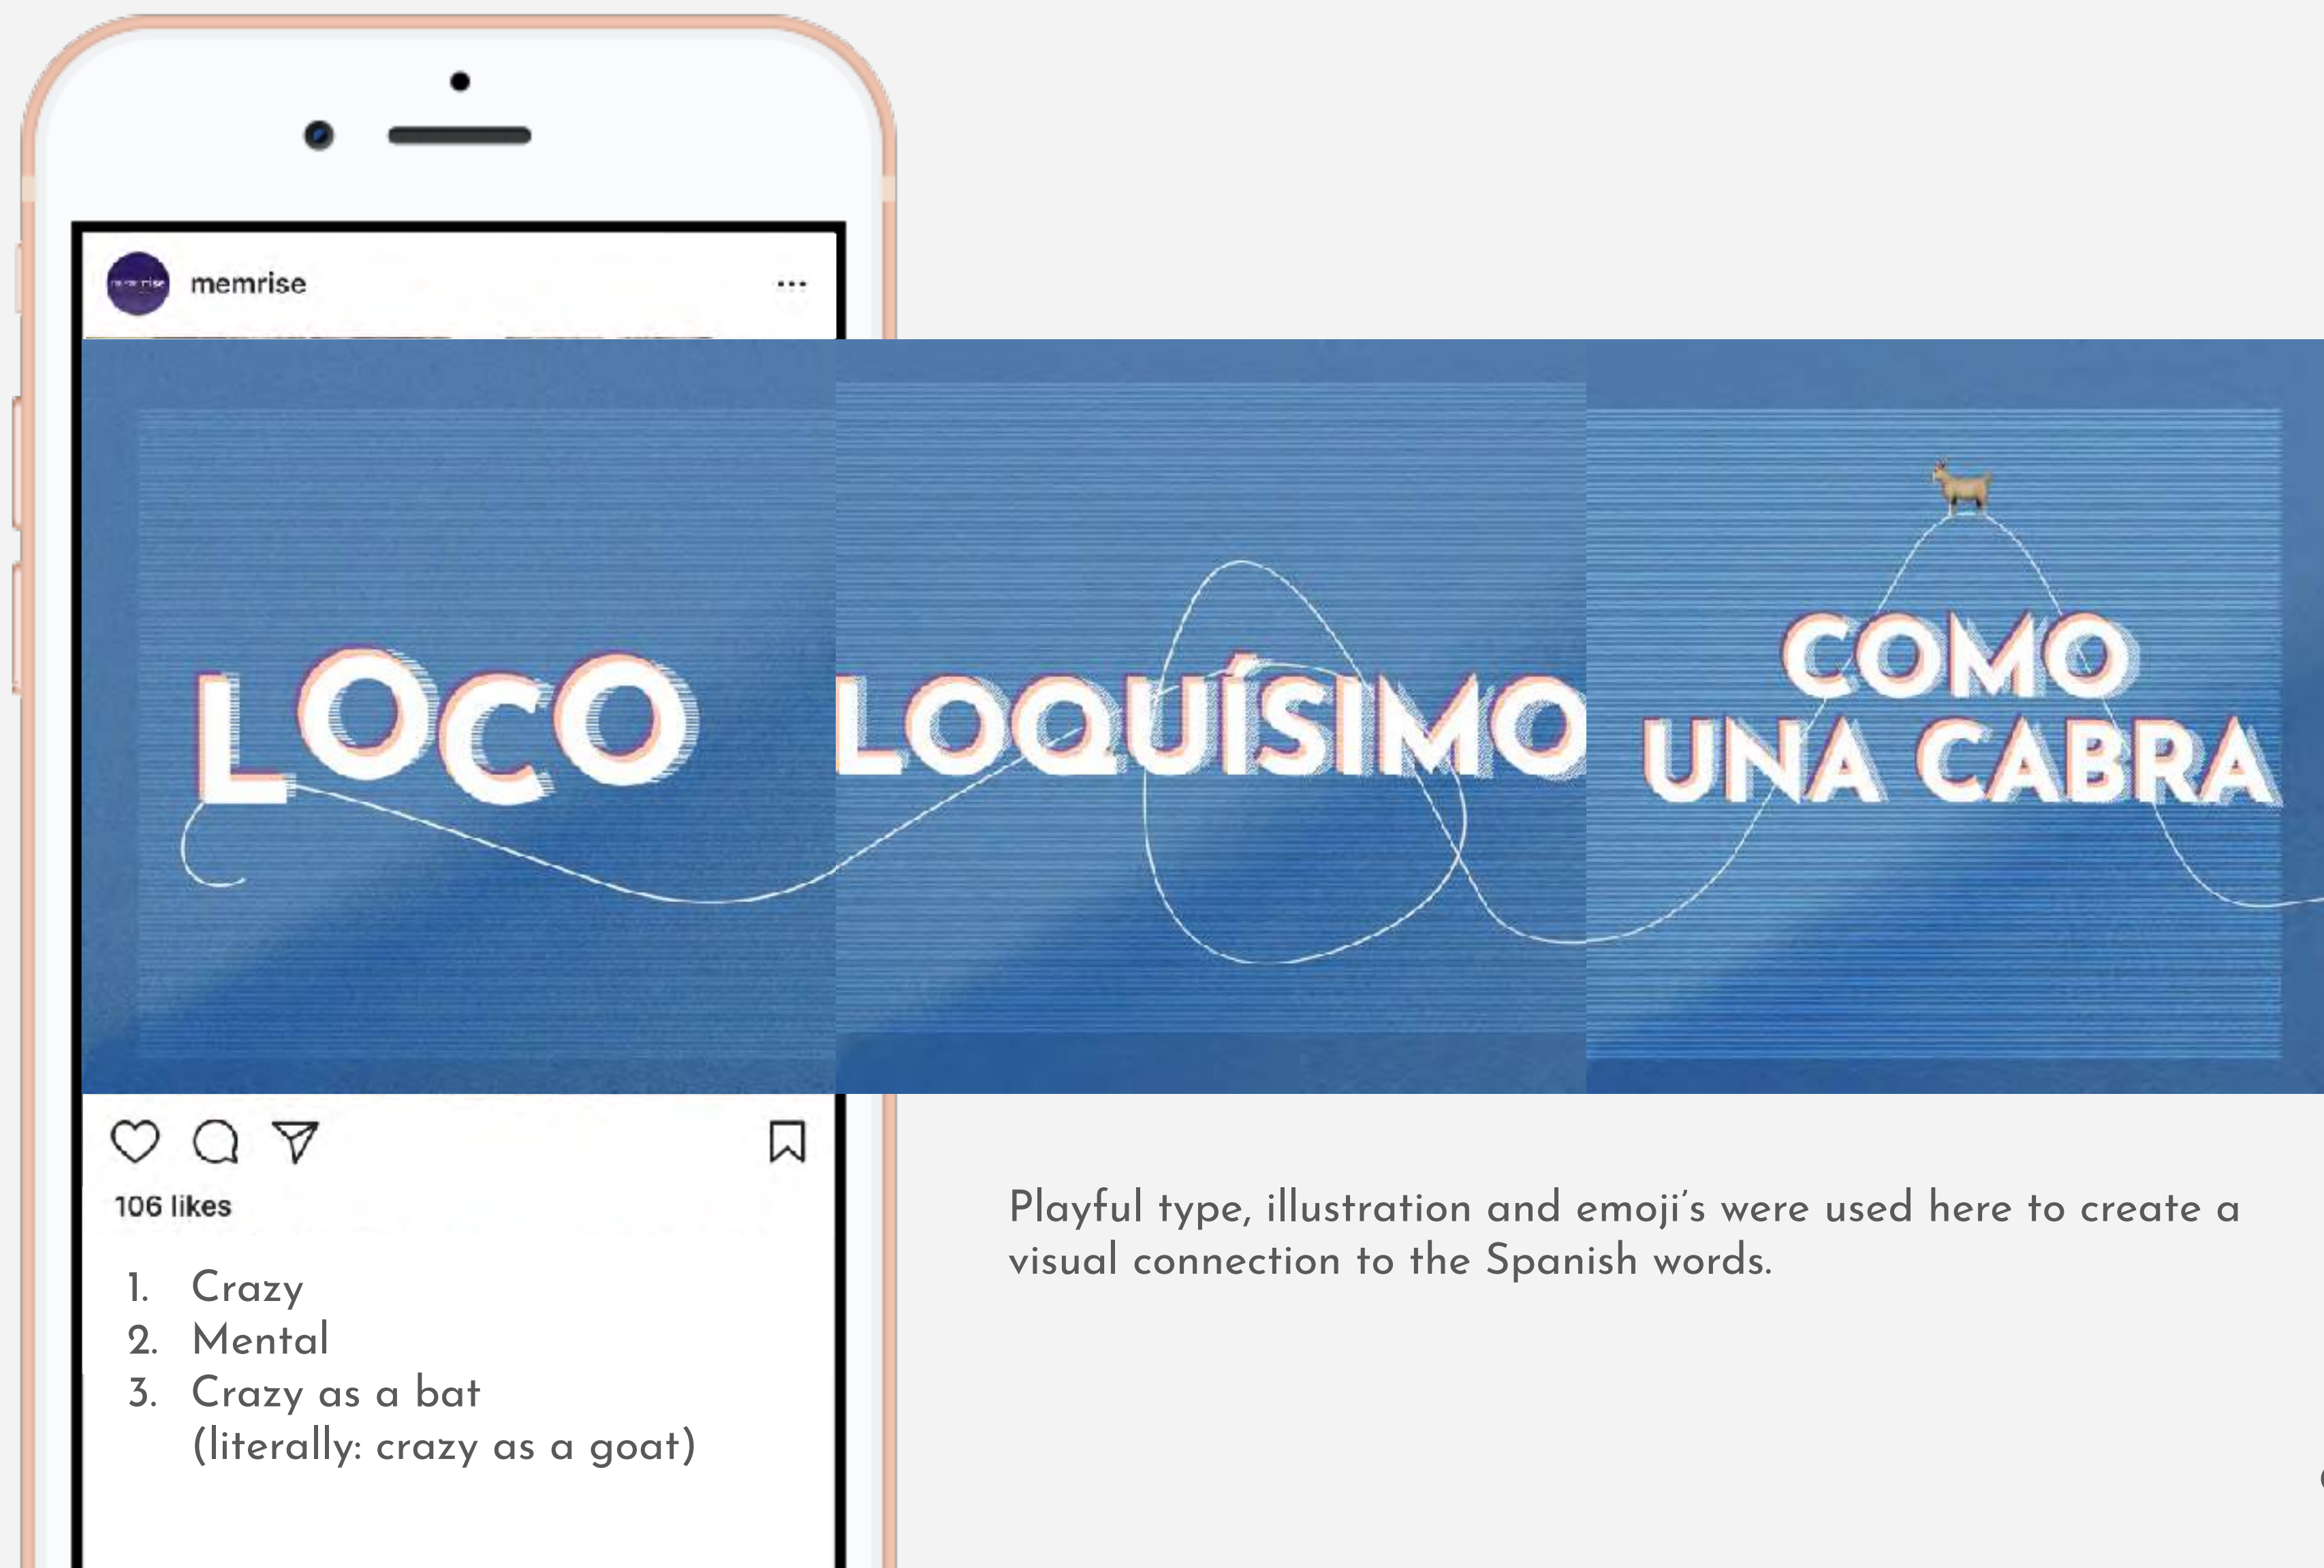

EXAMPLE:

INSTA/FB POST >

Instagram & facebook carousel Typeadjectives:

Posts are designed with a treated typeface with various layered effect to bring the words to life.

The background of posts are supported with a subtle textured overlaid with colours from the brand palette. The visual elements were designed to help create space for creative flexibility, but still holding together a visual style that sits under the same family.

Playful type, illustration and emoji's were used here to create a visual connection to the Spanish words.

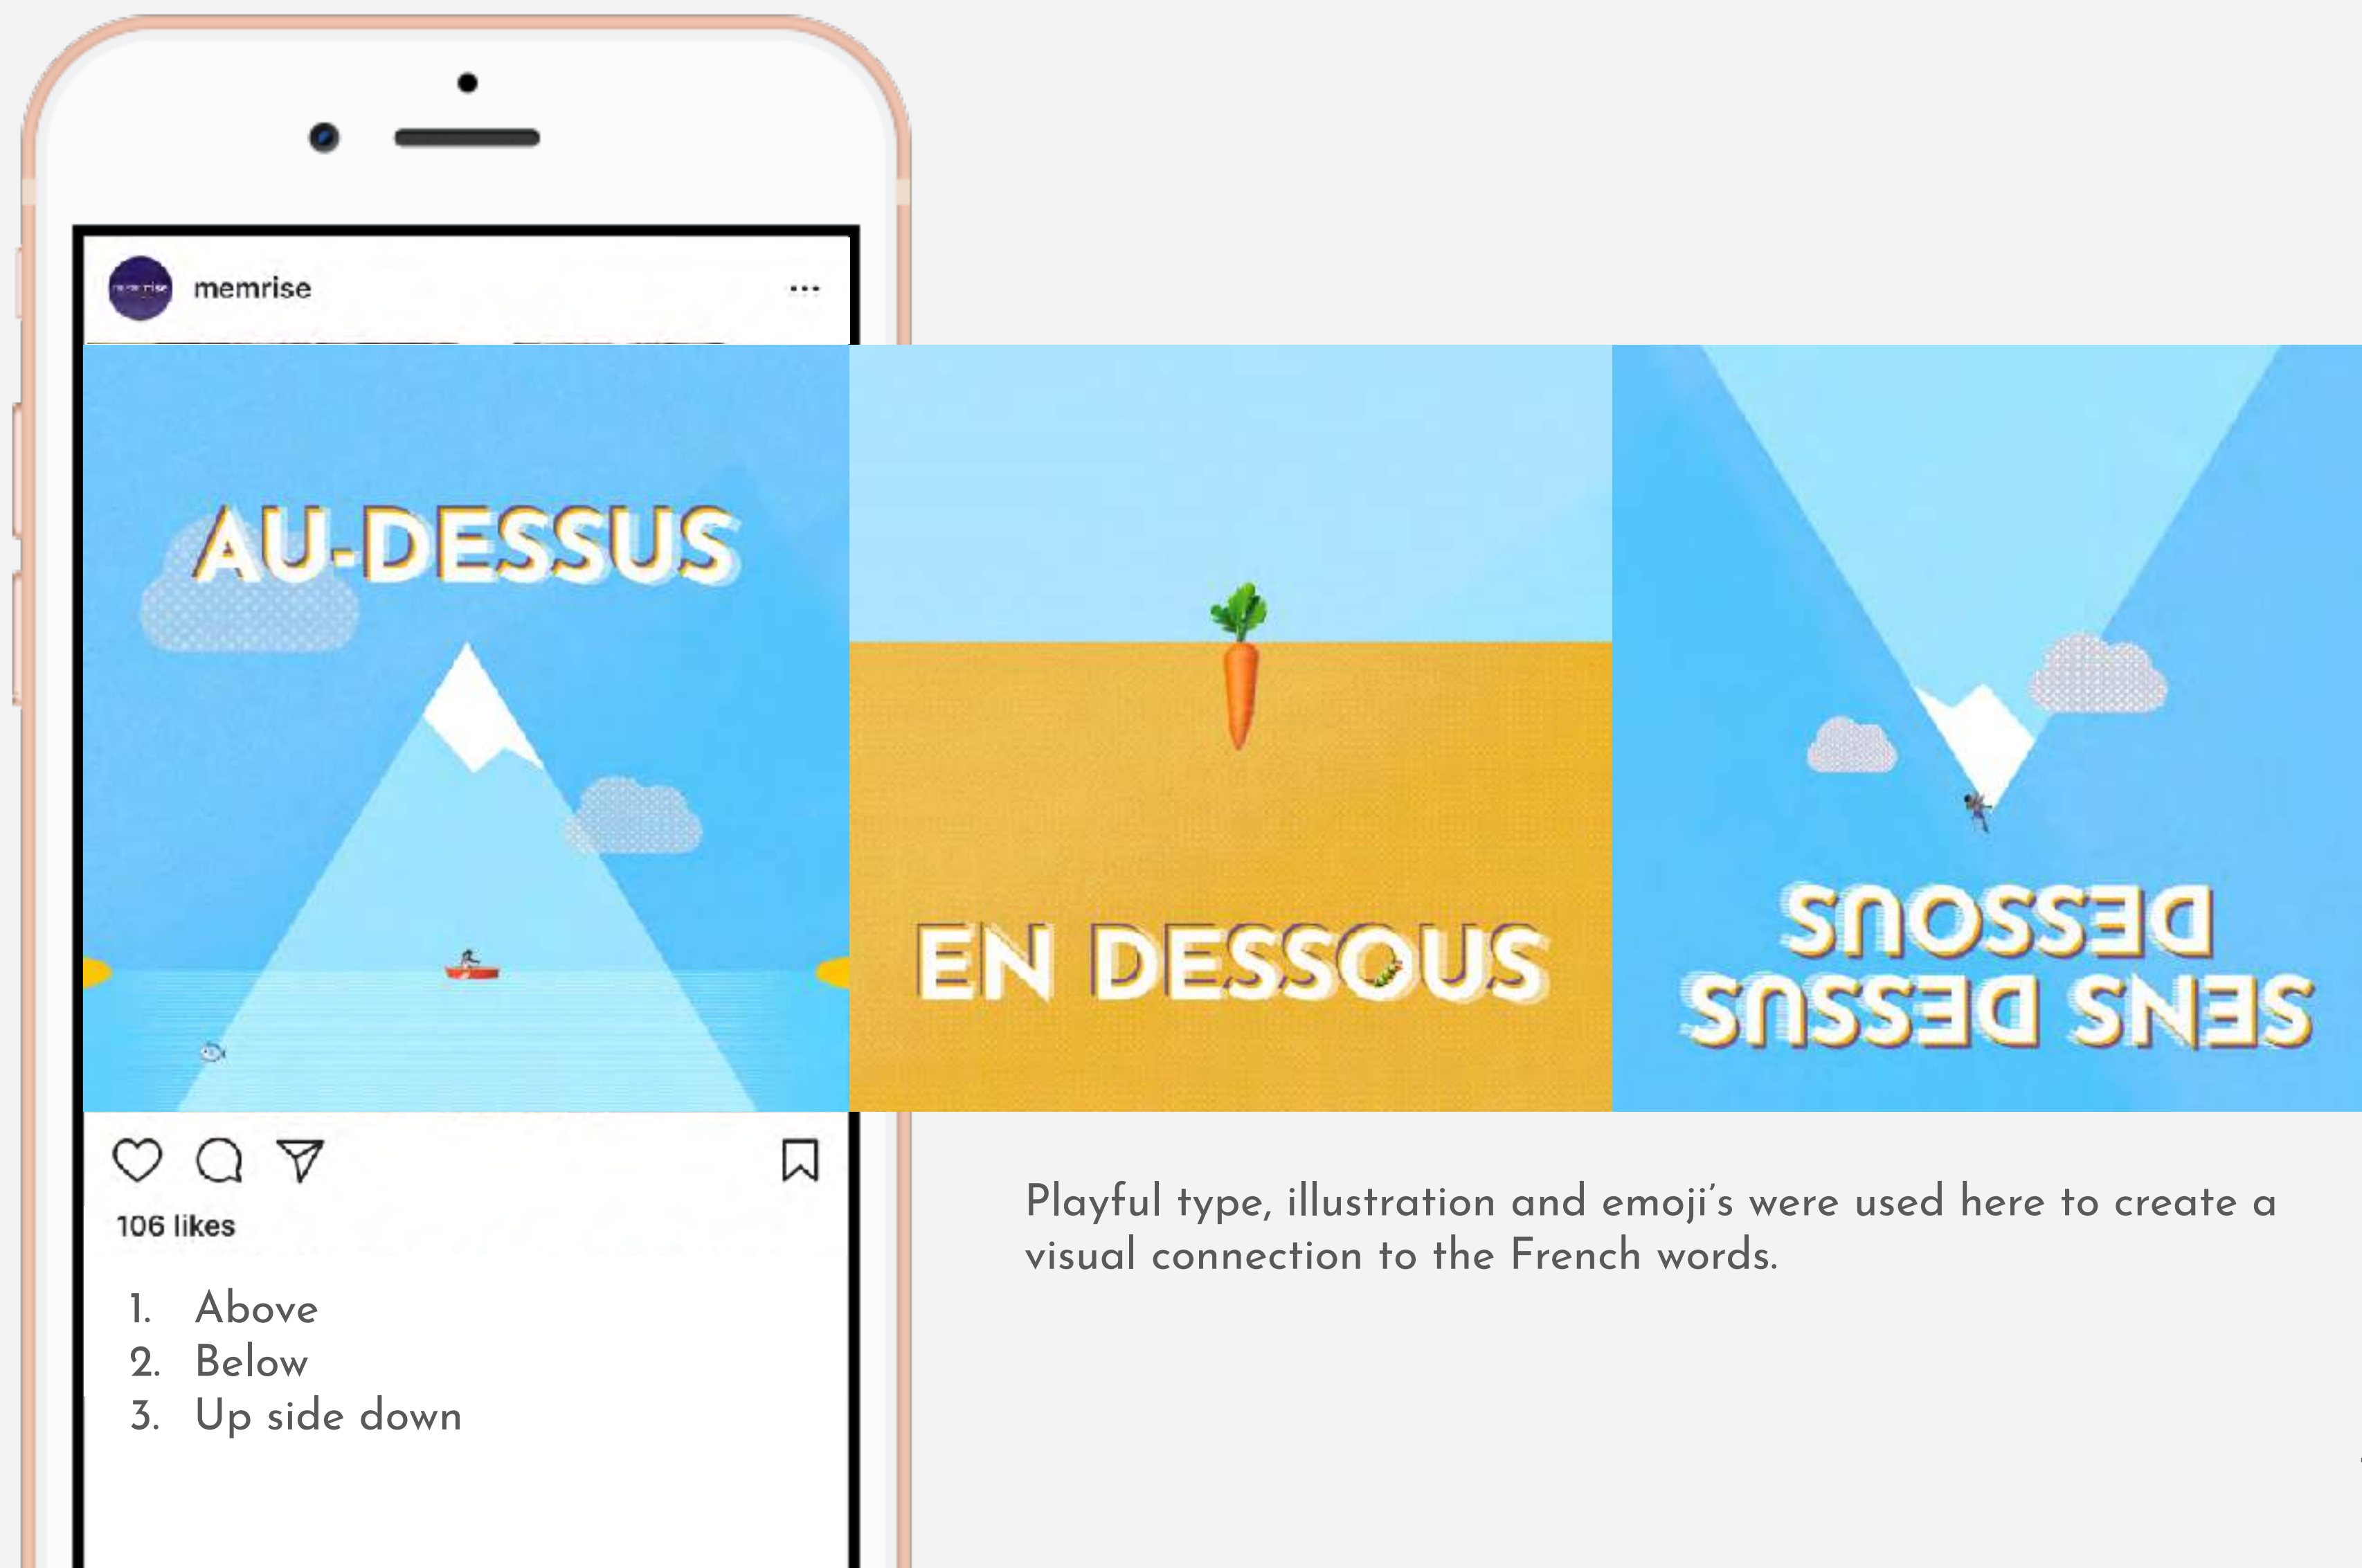

EXAMPLE:

INSTA/FB POST >

Instagram & facebook
carousel Typeadjectives:

Posts are designed with a treated typeface with various layered effect to bring the words to life.

The background of posts are supported with a subtle textured overlaid with colours from the brand palette. The visual elements were designed to help create space for creative flexibility, but still holding together a visual style that sits under the same family.

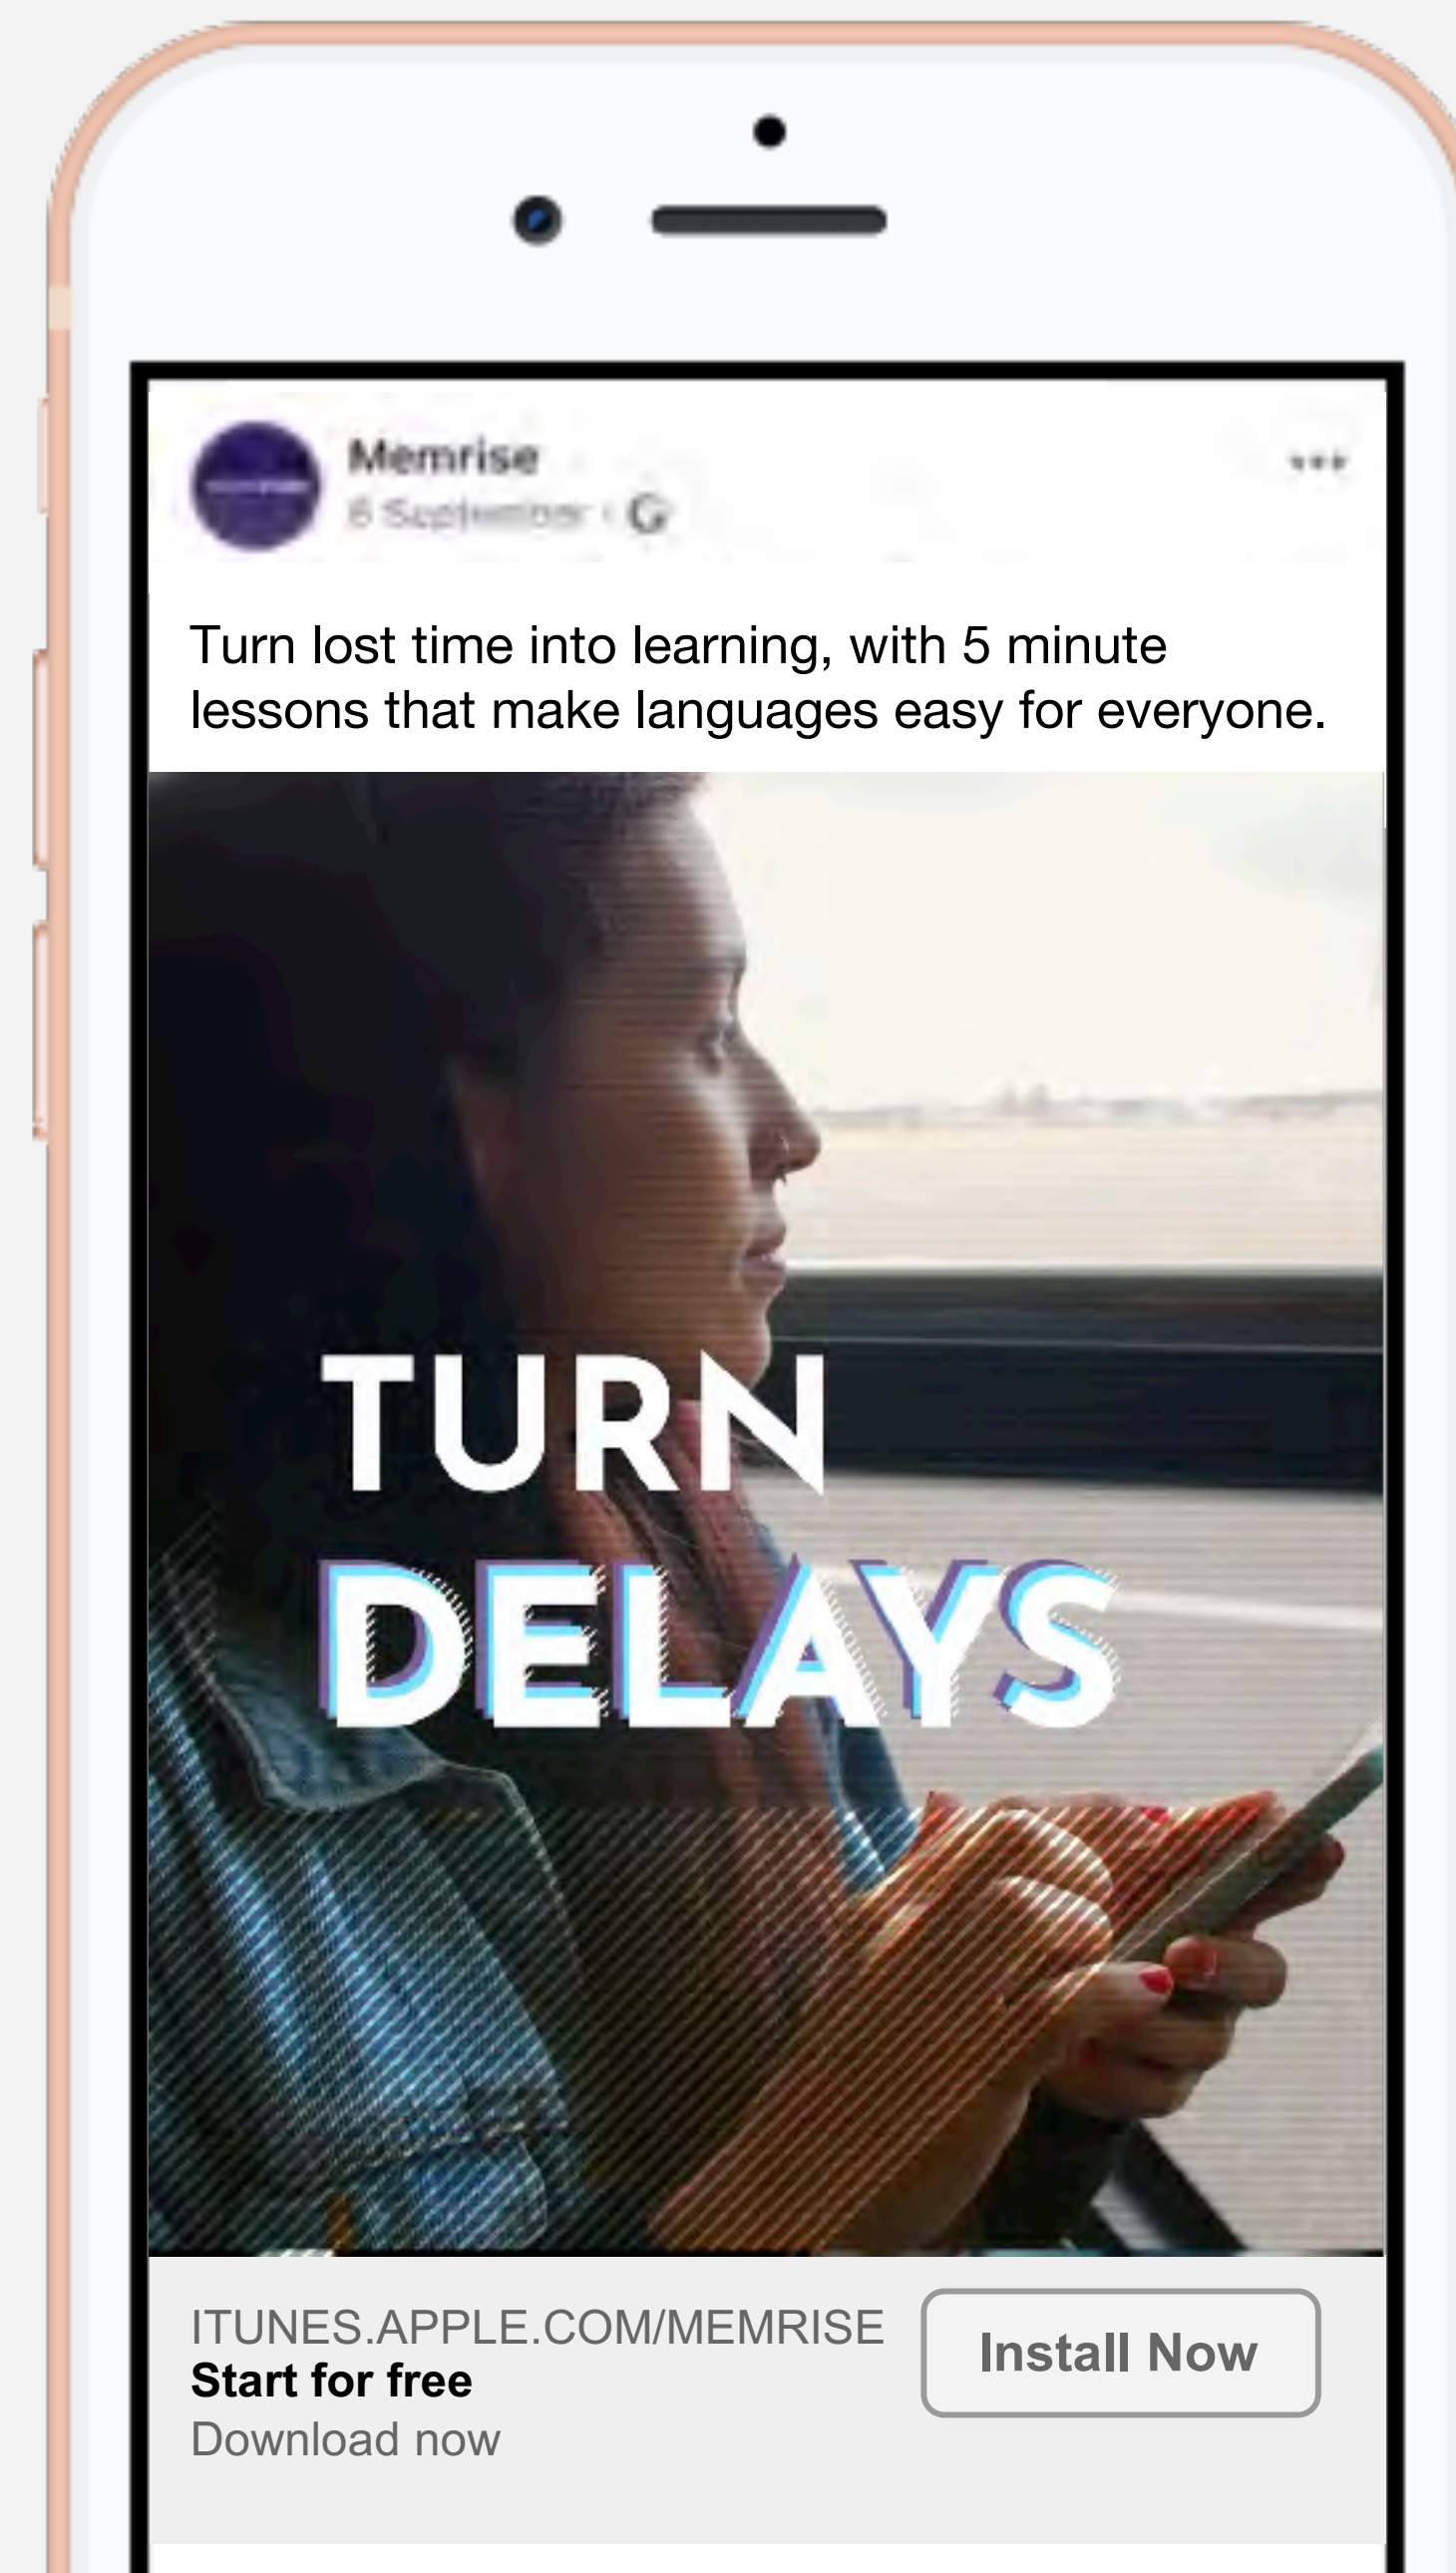

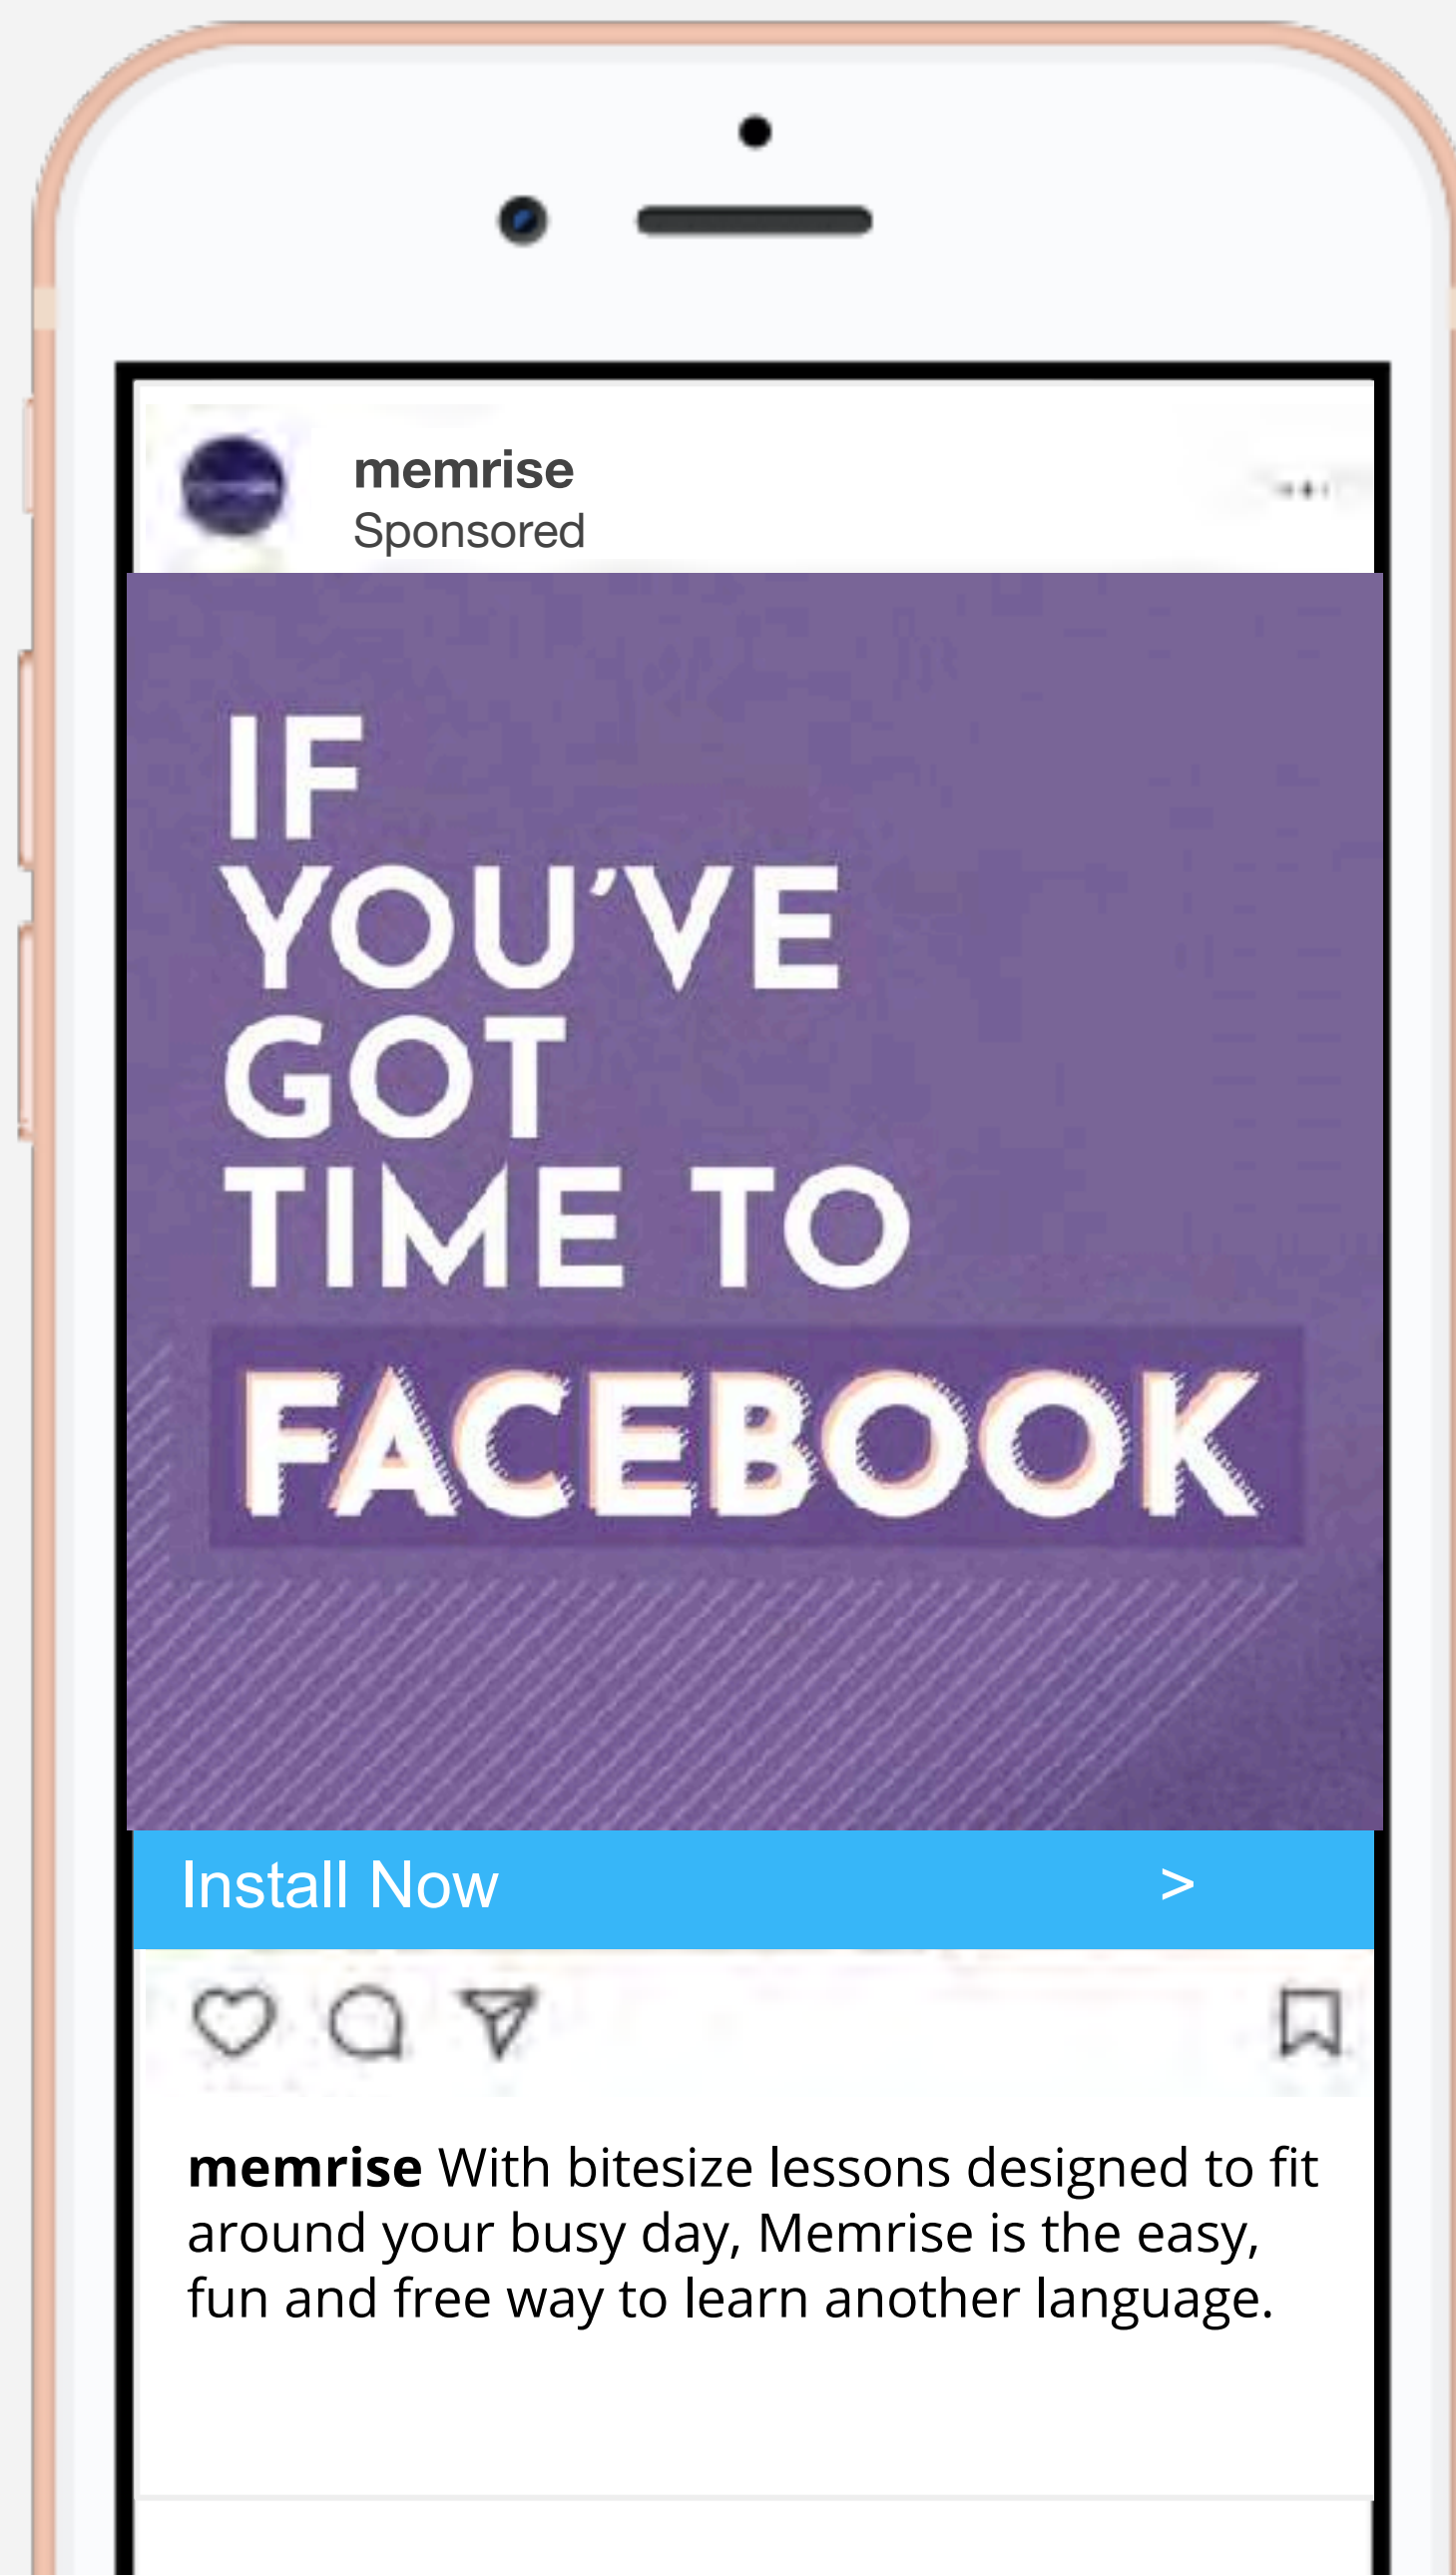

Playful type, illustration and emoji's were used here to create a visual connection to the French words.

- 1. Above
- 2. Below
- 3. Up side down

EXAMPLE:

PAID DR >

Any PAID DIRECT RESPONSE ads are created using the Memrise Purple as the main colour base, with other secondary colours complimenting videography and photography.

2. DESIGN GUIDELINES

AKAI

TYPOGRAPHY COMPOSITION >

Using the Memrise font 'Josefin Sans', we have created a layering effect to bring the words to life.

The type characters for social should use this composition of layers as the main type interface for social assets.

In the transitional interim period of the Memrise rebrand, this will be the working method for publishing social media assets. We will then default to the new brand identity when this becomes available.

TYPOGRAPHY COMPOSITION >

Comprised of 4 layers:

1. **FRONT:** White type layer
2. **MIDDLE:** Re-colour layer
3. **BACK:** Type Shadow layer
4. **PATTERN:** Pattern Effect Layer

#FFFFFF

1. **FRONT:**
WHITE TYPE LAYER
Always white

TYPOGRAPHY COMPOSITION >

Comprised of 4 layers:

1. FRONT: White type layer
2. MIDDLE: Re-colour layer
3. BACK: Type Shadow layer
4. PATTERN: Pattern Effect Layer

#DD4126

2. MIDDLE: RE-COLOUR

Can be paired with any complementary Memrise swatch from the palette (see page 15), considering theme and creative concept..

#49C13D

COLOUR PAIRINGS >

Colours should be paired based on the following:

- The colours paired helps to support the post concept/theme
- The colours complement the imagery content
- The colours are complementary and contrasting
- The type is legible

Blue hues in this image makes the light blue pairing complementary to the image.

The red pairing create standout against the image.

VIDEO & PHOTOGRAPHY >

Use videography and photography that is not overly post-produced, selecting imagery /talent that has 'realness' to it.

Don't over saturate colours and select colours that supports the posts concept/theme.

VIDEO OVERLAY EFFECT >

Creating the video overlay effect:

Videos are treated with a striped overlay. This is to create a dynamic rough feel to the videos that has texture similar to the old style 90's TV; giving the content a unpolished feel, making the content feel more real.

The horizontal line texture is used here by placing it on top of the video file and then applying the 'Overlay' effect in after effects.

Adjust opacity of the line effect to create stand-out of the video.

C. Lines

C. Lines

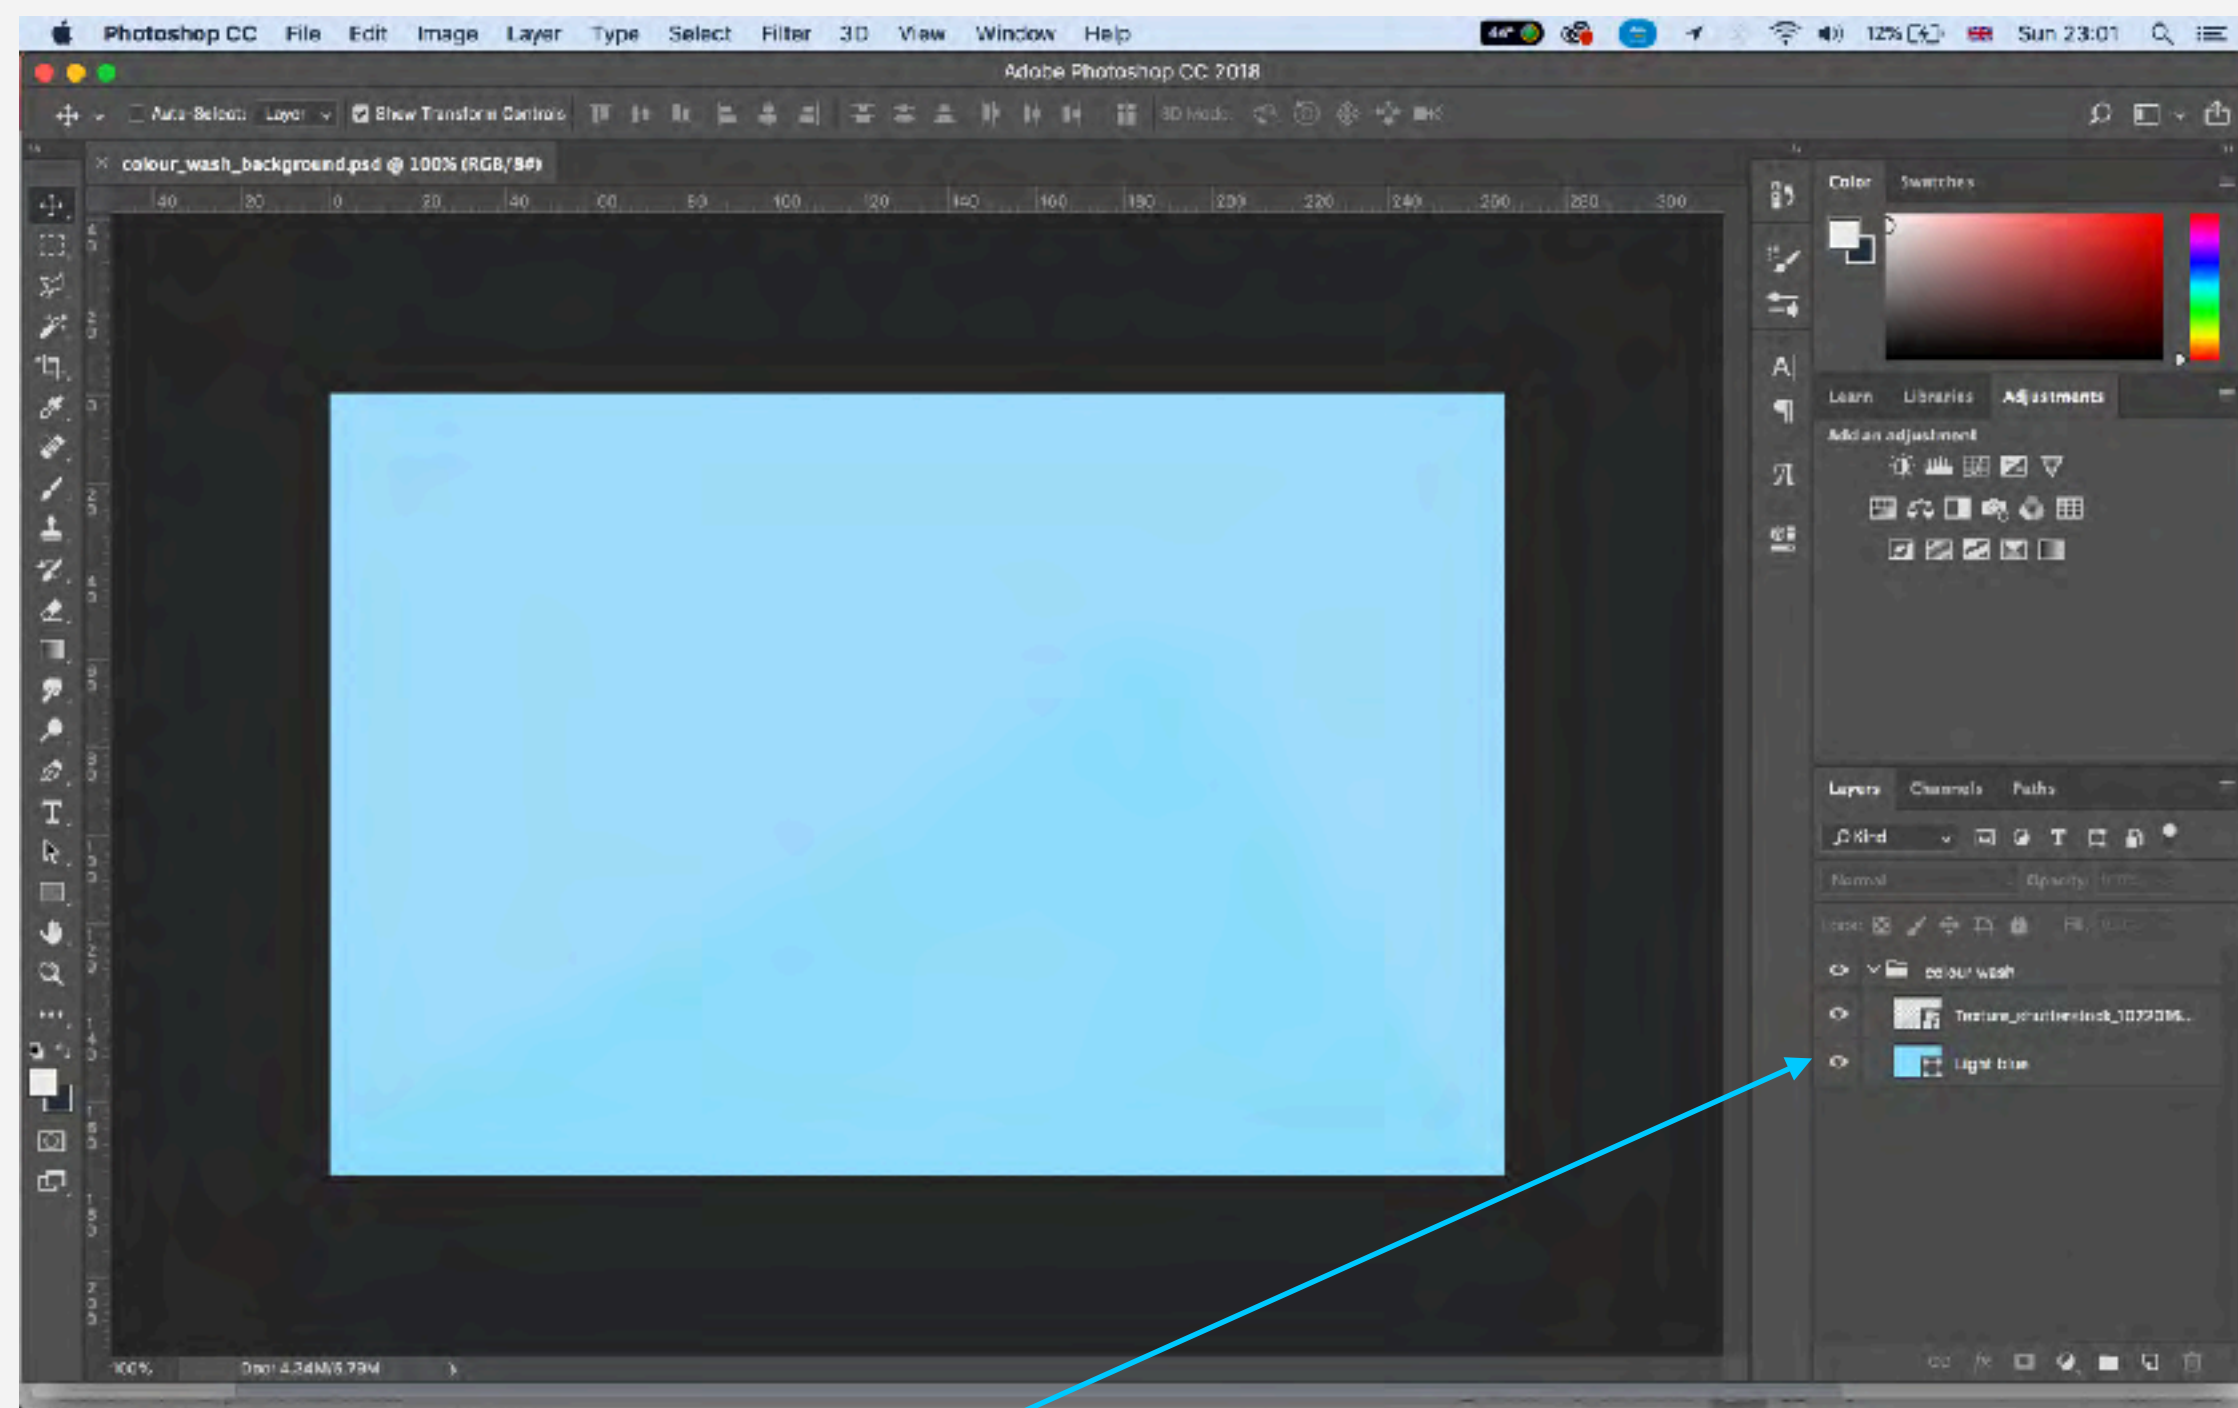

BACKGROUND TEXTURE >

Different colours can be applied to the backgrounds of post using any colour from the memrise palette. But the backgrounds should always apply the textured grain effect to the solid colour.

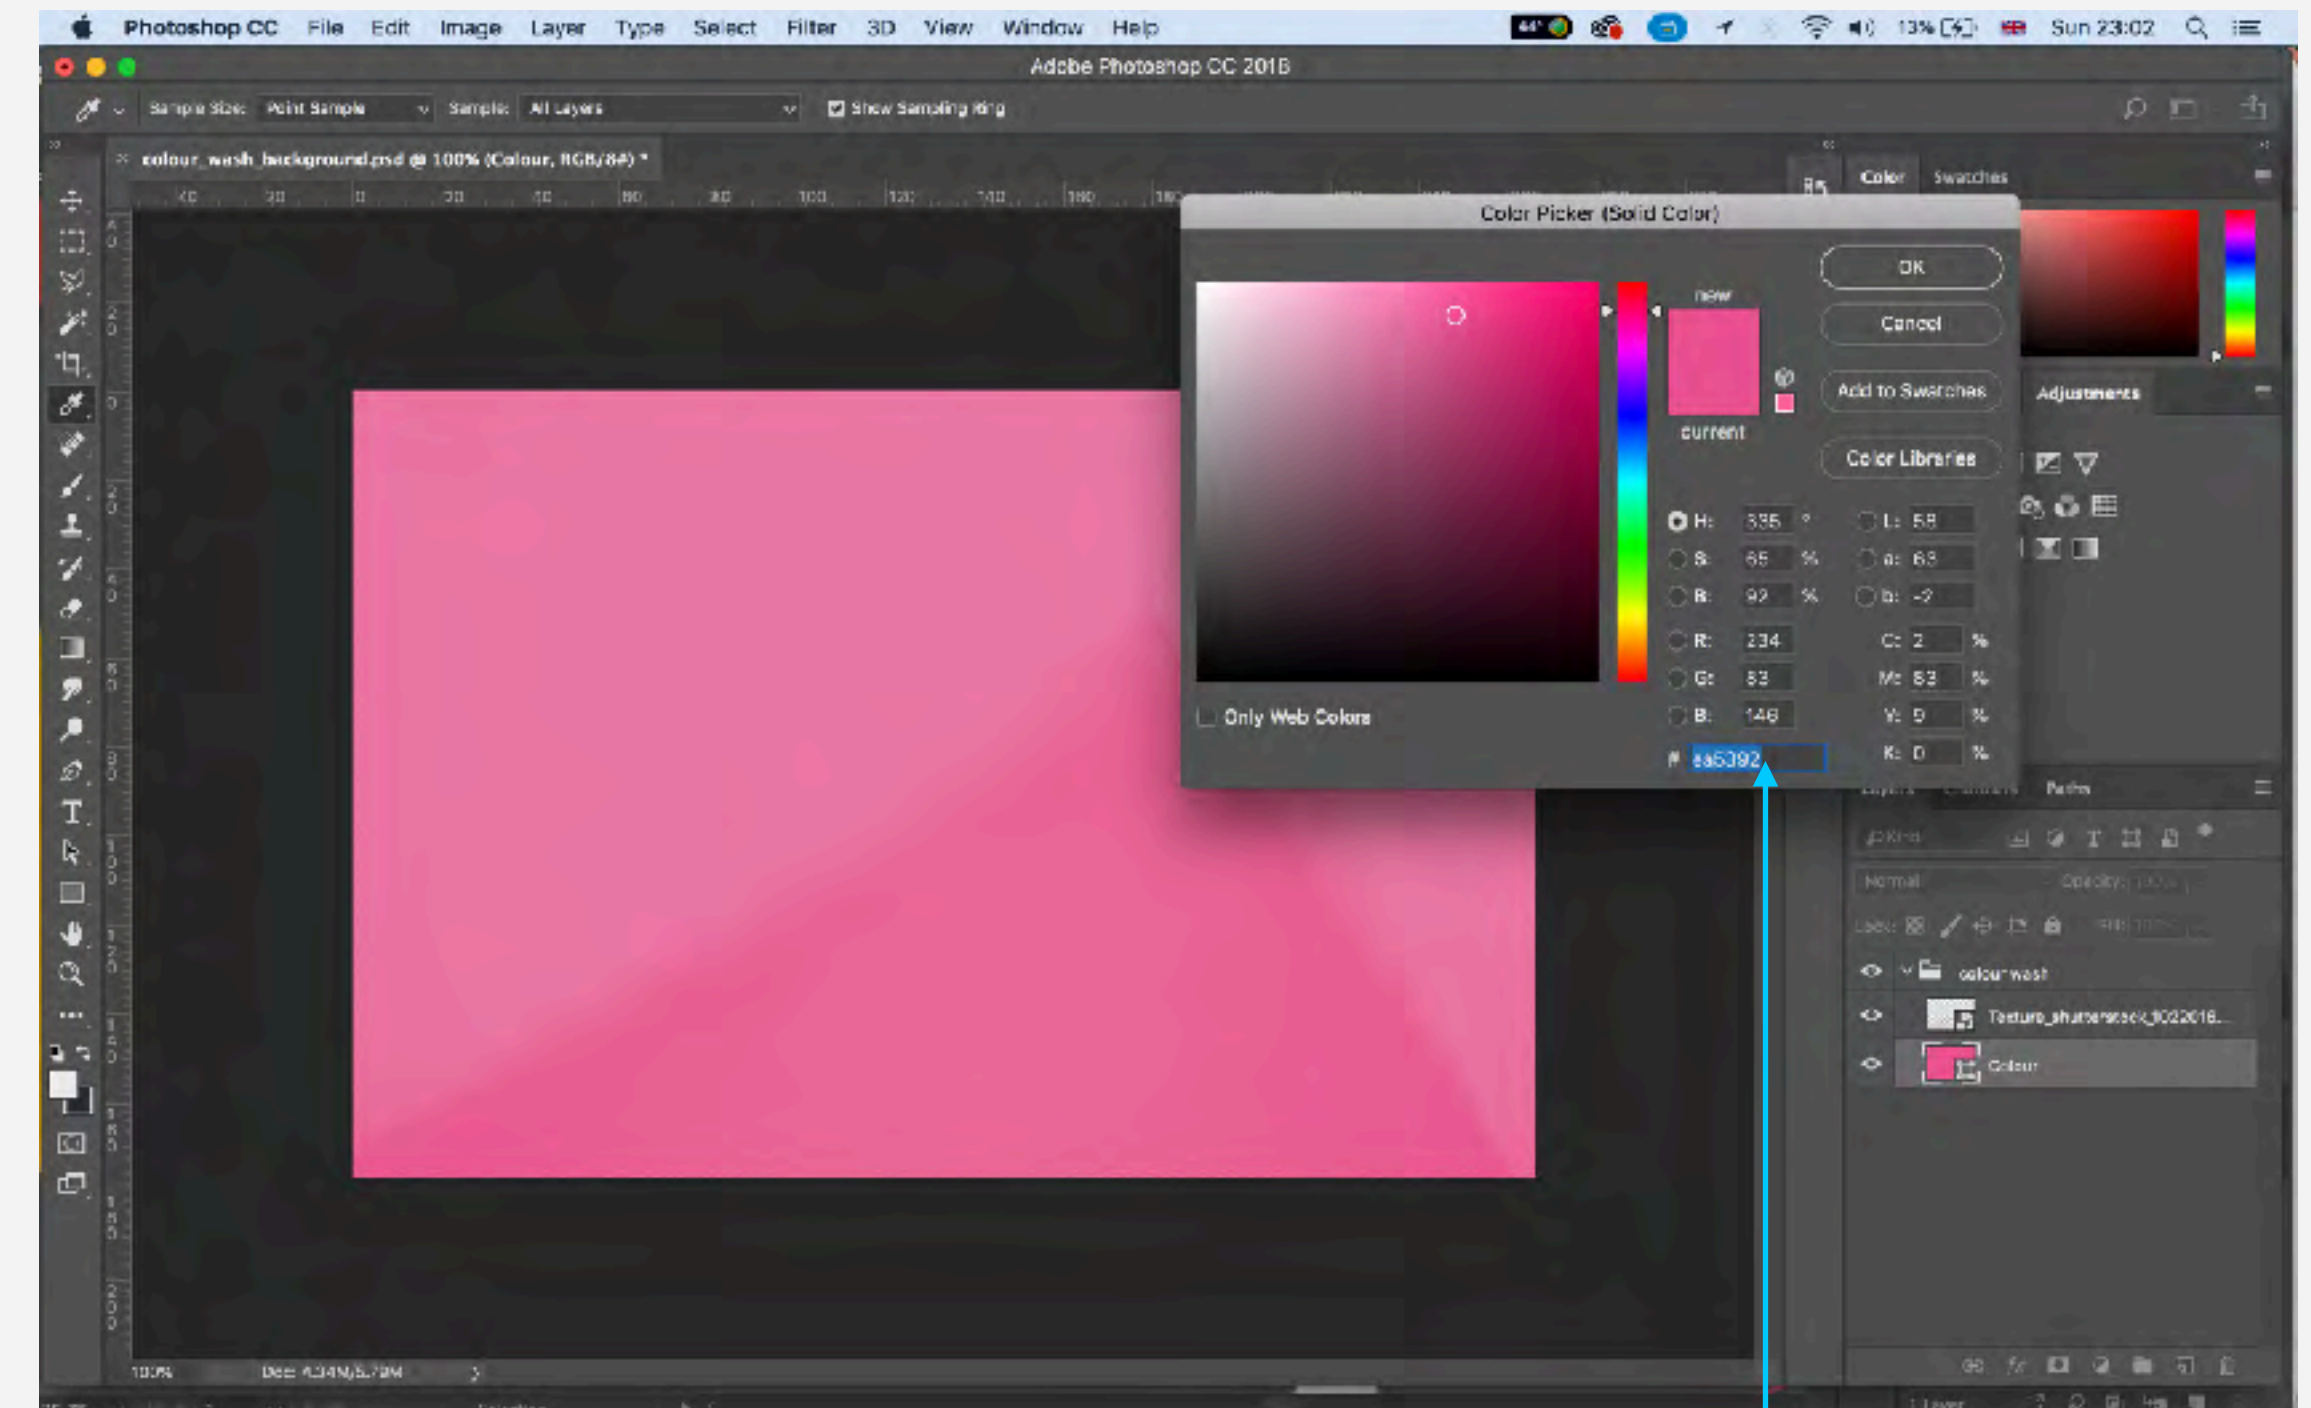

BACKGROUND TEXTURE >

The background texture is provided as a layer within the PSD templates, but we have also provided this as a separate PSD in the SOCIAL ASSETS TOOLKIT.

1. Select colour layer

2. Change the hex(#) colour swatch to another Memrise colour.

NON-LATIN FONT ALTERNATIVES >

For social posts in non-latin languages, the font should be replaced with an alternative font that has boldness to the character and feels most similar to Josefin Sans.

For the Japanese posts examples here, we used Hiragino Kaku Gothic std, weight W8.

A festive Christmas dinner table. In the top left, a roasted turkey is served on a white plate, garnished with fresh rosemary and small red berries. To the right, there are Christmas decorations including greenery, gold pinecones, and a red poinsettia. In the bottom left, a white reindeer figurine with a red bow is visible. In the bottom center, a white plate holds a sprig of rosemary and a white fuzzy hat. In the bottom right, a white platter displays several appetizers, possibly bruschetta or crostini, topped with cream and various ingredients. The background is a dark wooden table.

CHRISTMAS

3. STATIC TEMPLATES (PSDs)

DINNER

EDITING TYPE COMPOSITION

WALK-THROUGH >

How to edit the smart object type layers in the templates:

All templates contain patterns, backgrounds and fully editable smart object type layers.

In this section, we will walk through, step-by-step on how to edit type when creating new social assets.

LA CENA DE
NAVIDAD

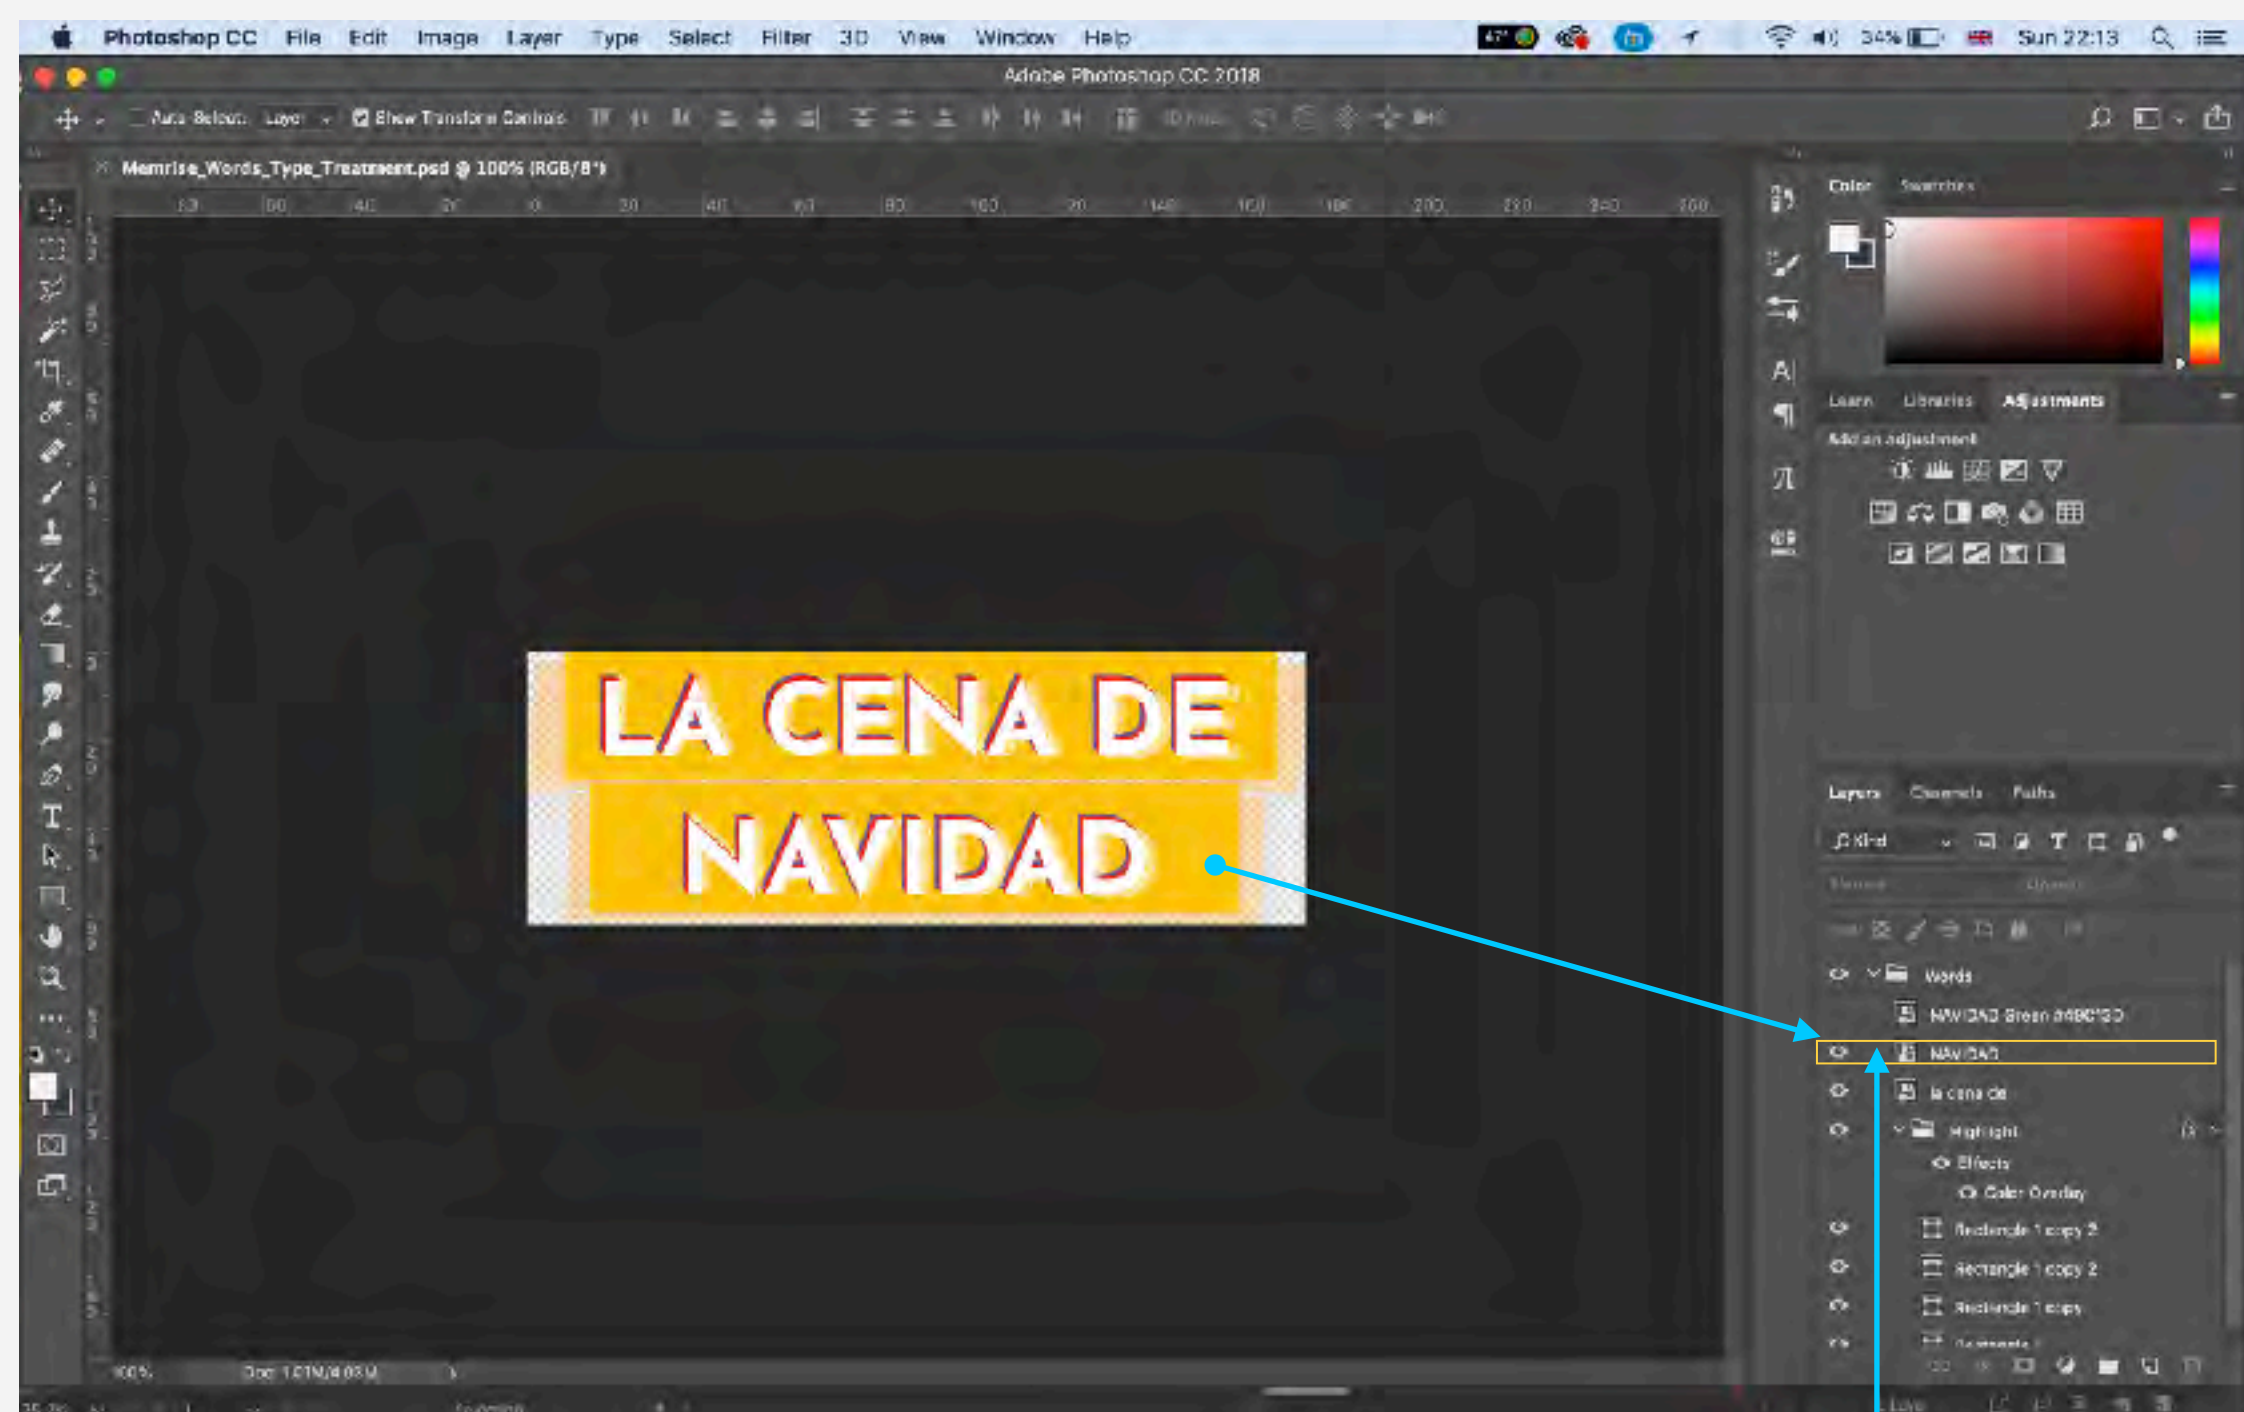

The image shows the text 'LA CENA DE NAVIDAD' in a bold, white, sans-serif font with a red outline. The text is arranged in two lines, with 'LA CENA DE' on the top line and 'NAVIDAD' on the bottom line. The text is centered within a yellow rectangular background that has a slight drop shadow.

DINNER
CHRISTMAS

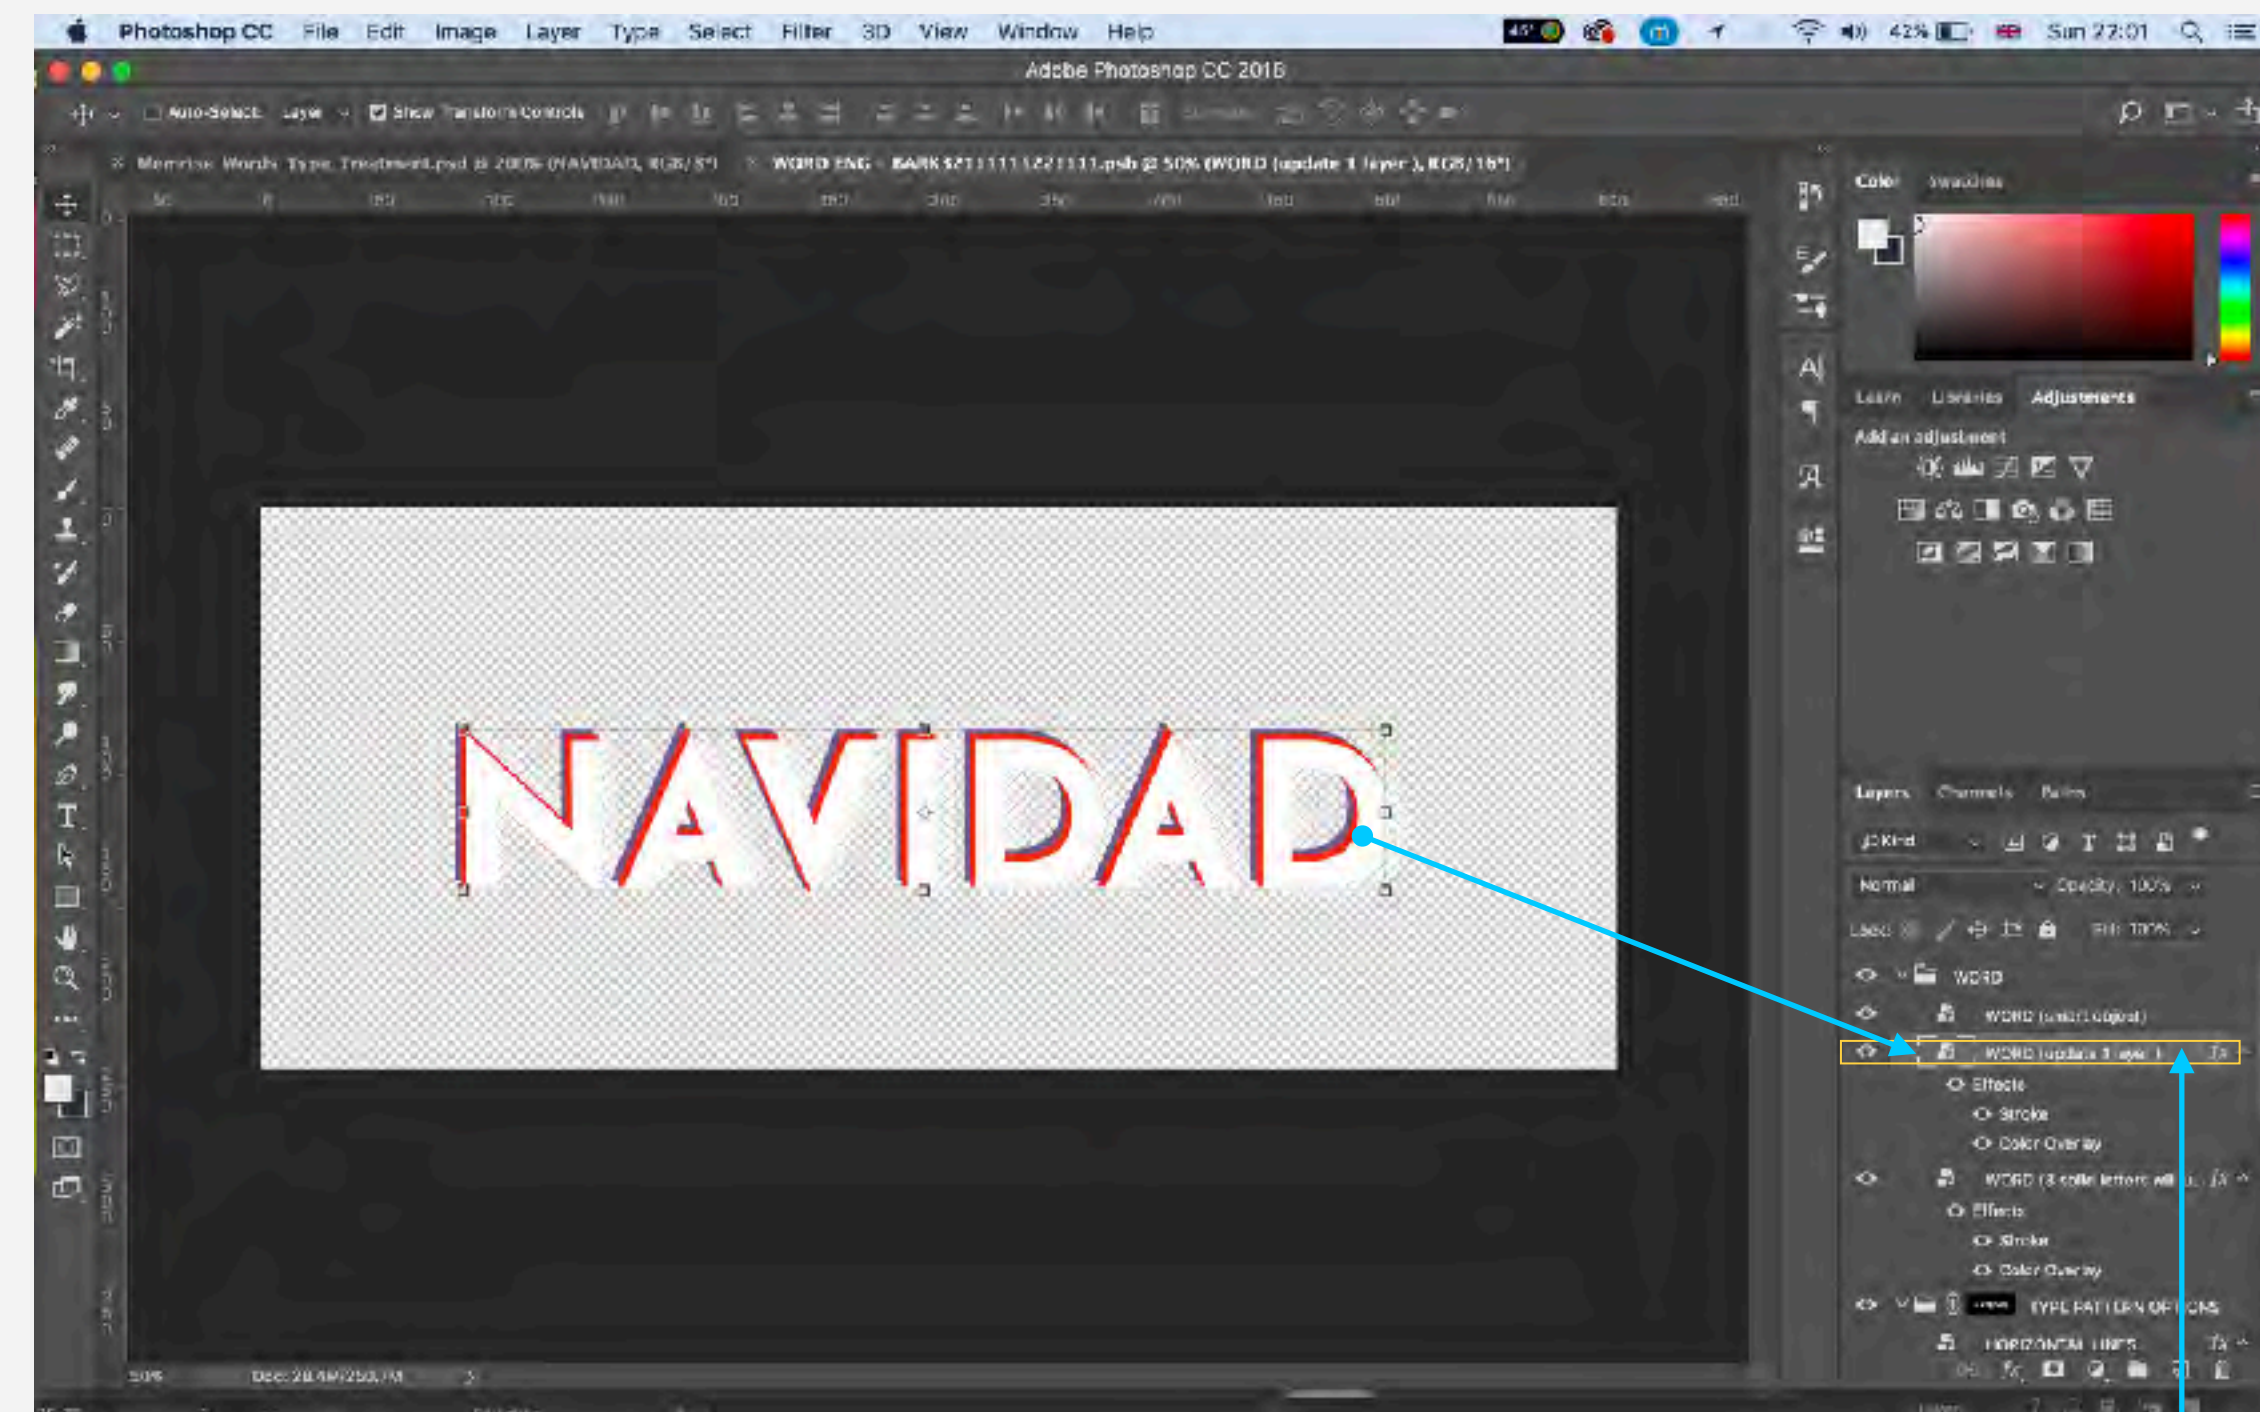

The image shows the text 'DINNER CHRISTMAS' in a bold, white, sans-serif font with a green outline. The text is arranged in two lines, with 'DINNER' on the top line and 'CHRISTMAS' on the bottom line. The text is centered within a red rectangular background that has a slight drop shadow. A dark blue downward-pointing triangle is positioned between the two images, indicating a transition or edit.

EDITING TYPE COMPOSITION

WALK-THROUGH >

1. Select the 'type layer' in the template you are editing. Then, right click to edit the smart object, you will be taken to a window similar to the above. Then select the word layer and then double click to edit the smart object.

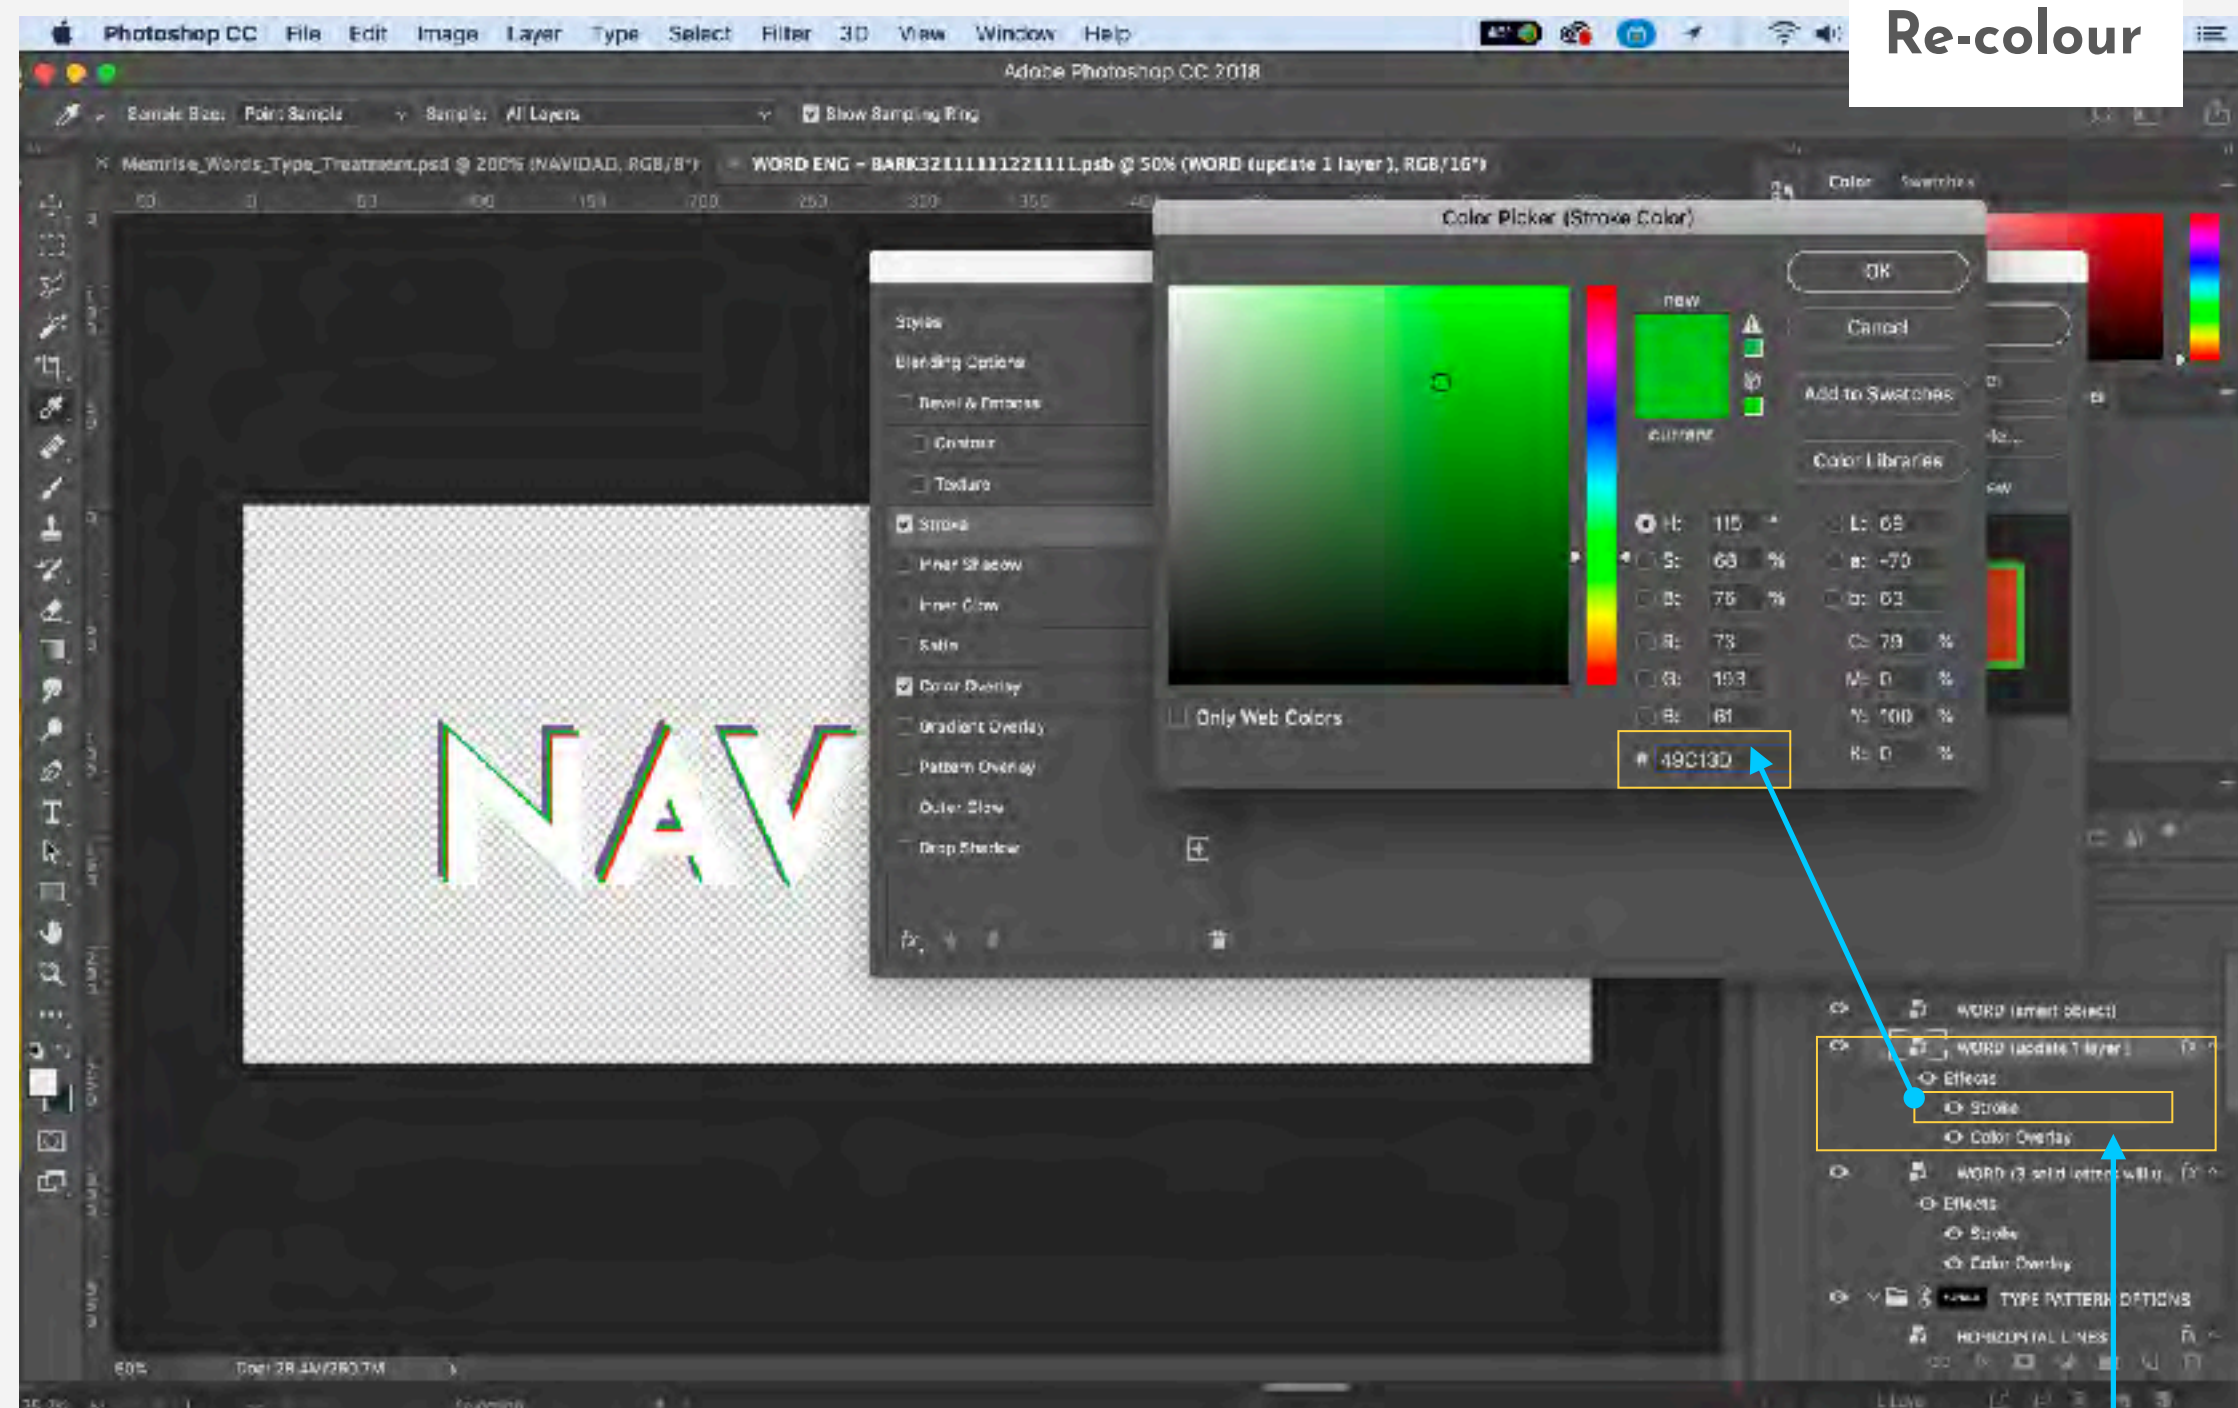

2. You will then access the type editing composition, where you can change the word, colour and pattern texture in a few steps. All the 4 word layers that make up the whole composition are linked smart objects, just select 1 of the word layers, it will update the rest of the layers to the correct spelling. Here, we have selected the 'Re-colour' type layer, titled 'WORD (update 1 layer)', this is the quickest way to edit the file.

EDITING TYPE COMPOSITION

WALK-THROUGH >

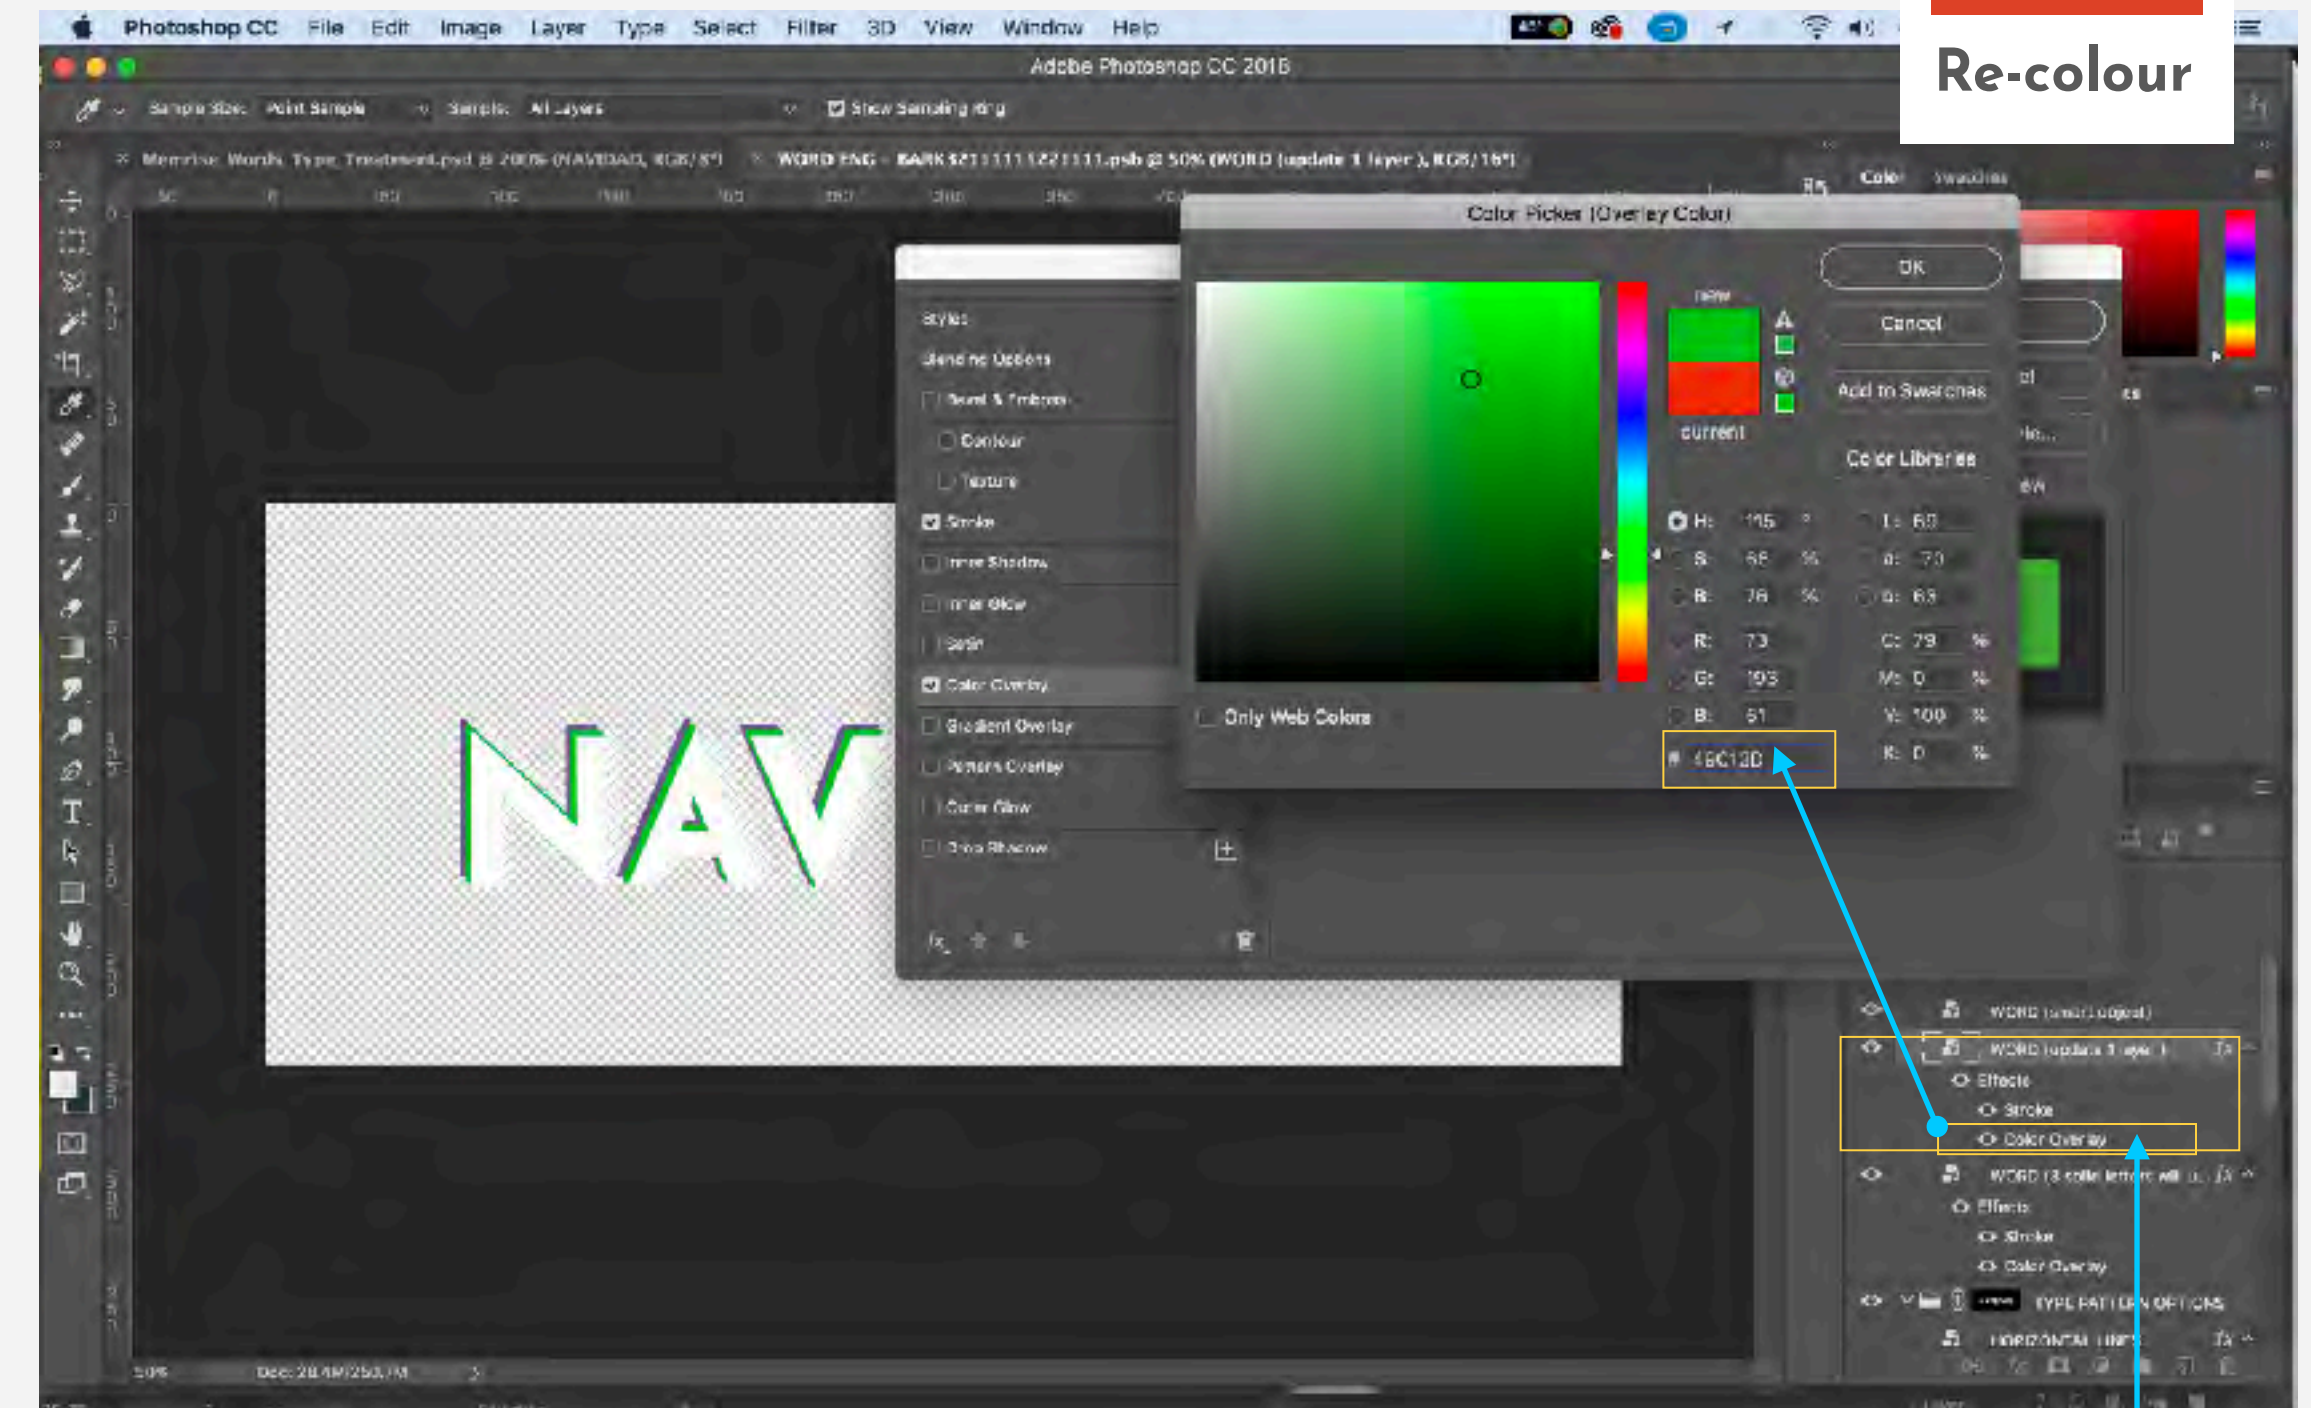

Re-colour

3. First, we want to re-colour this layer to the chosen swatch for this concept. This theme is around Christmas, and we want to change the Spanish word for Christmas 'Navidad' into English. Our concept colour for the English word is the Memrise green and red. So, update layer 'stroke' to the green hex colour, as shown.

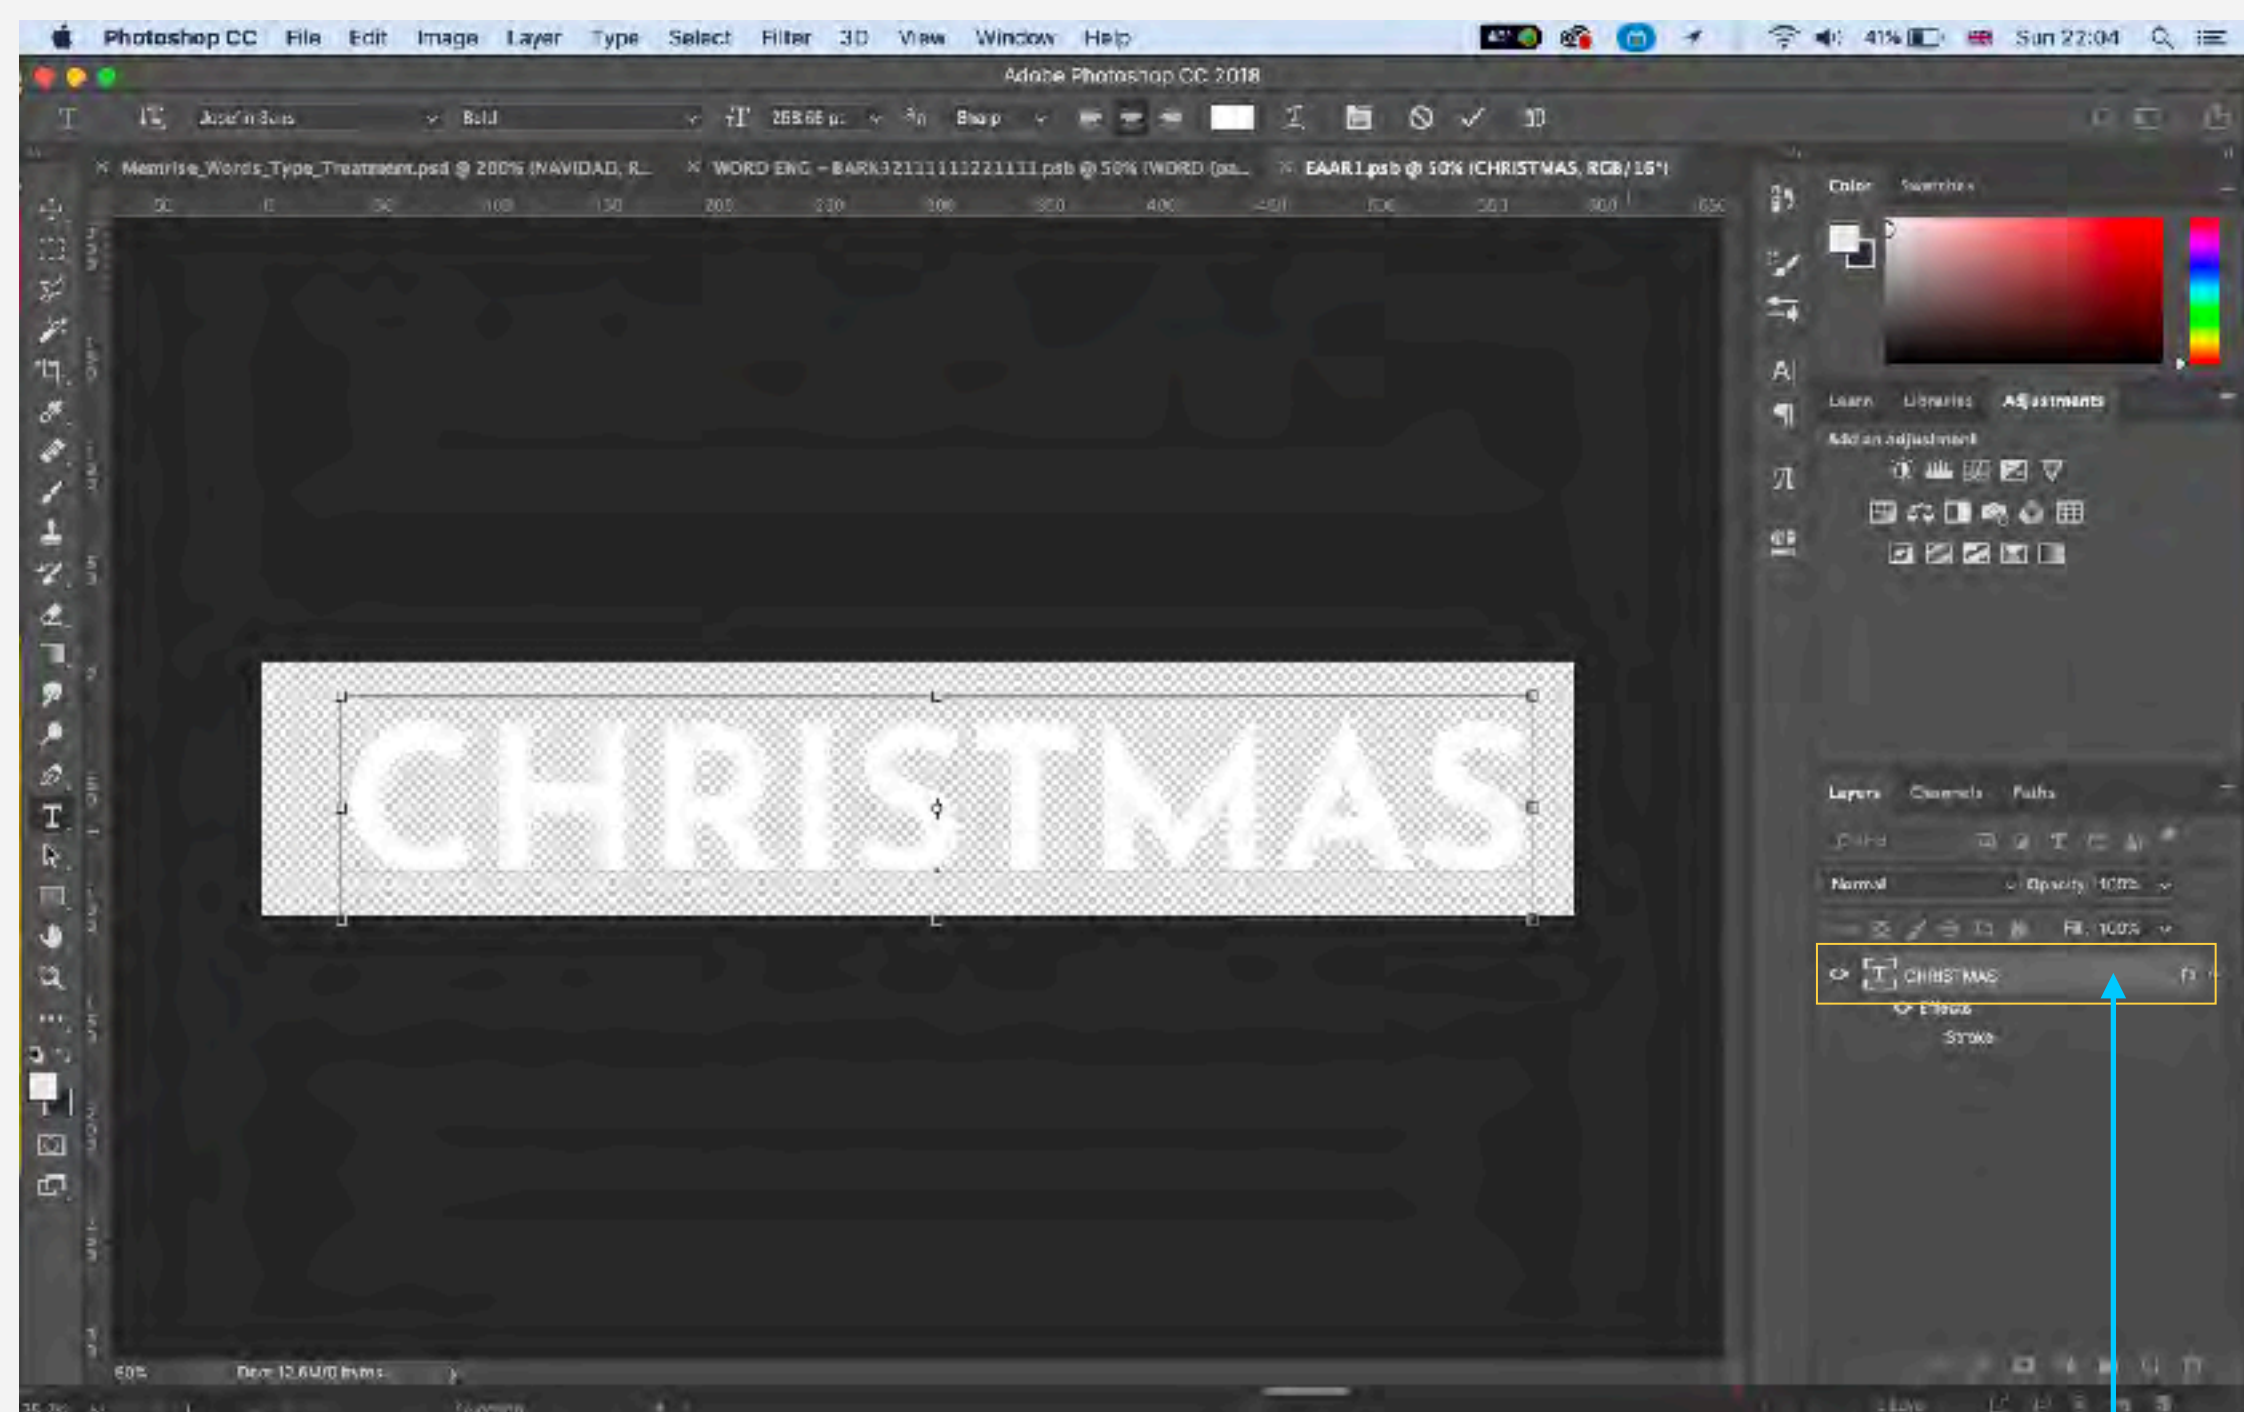

Re-colour

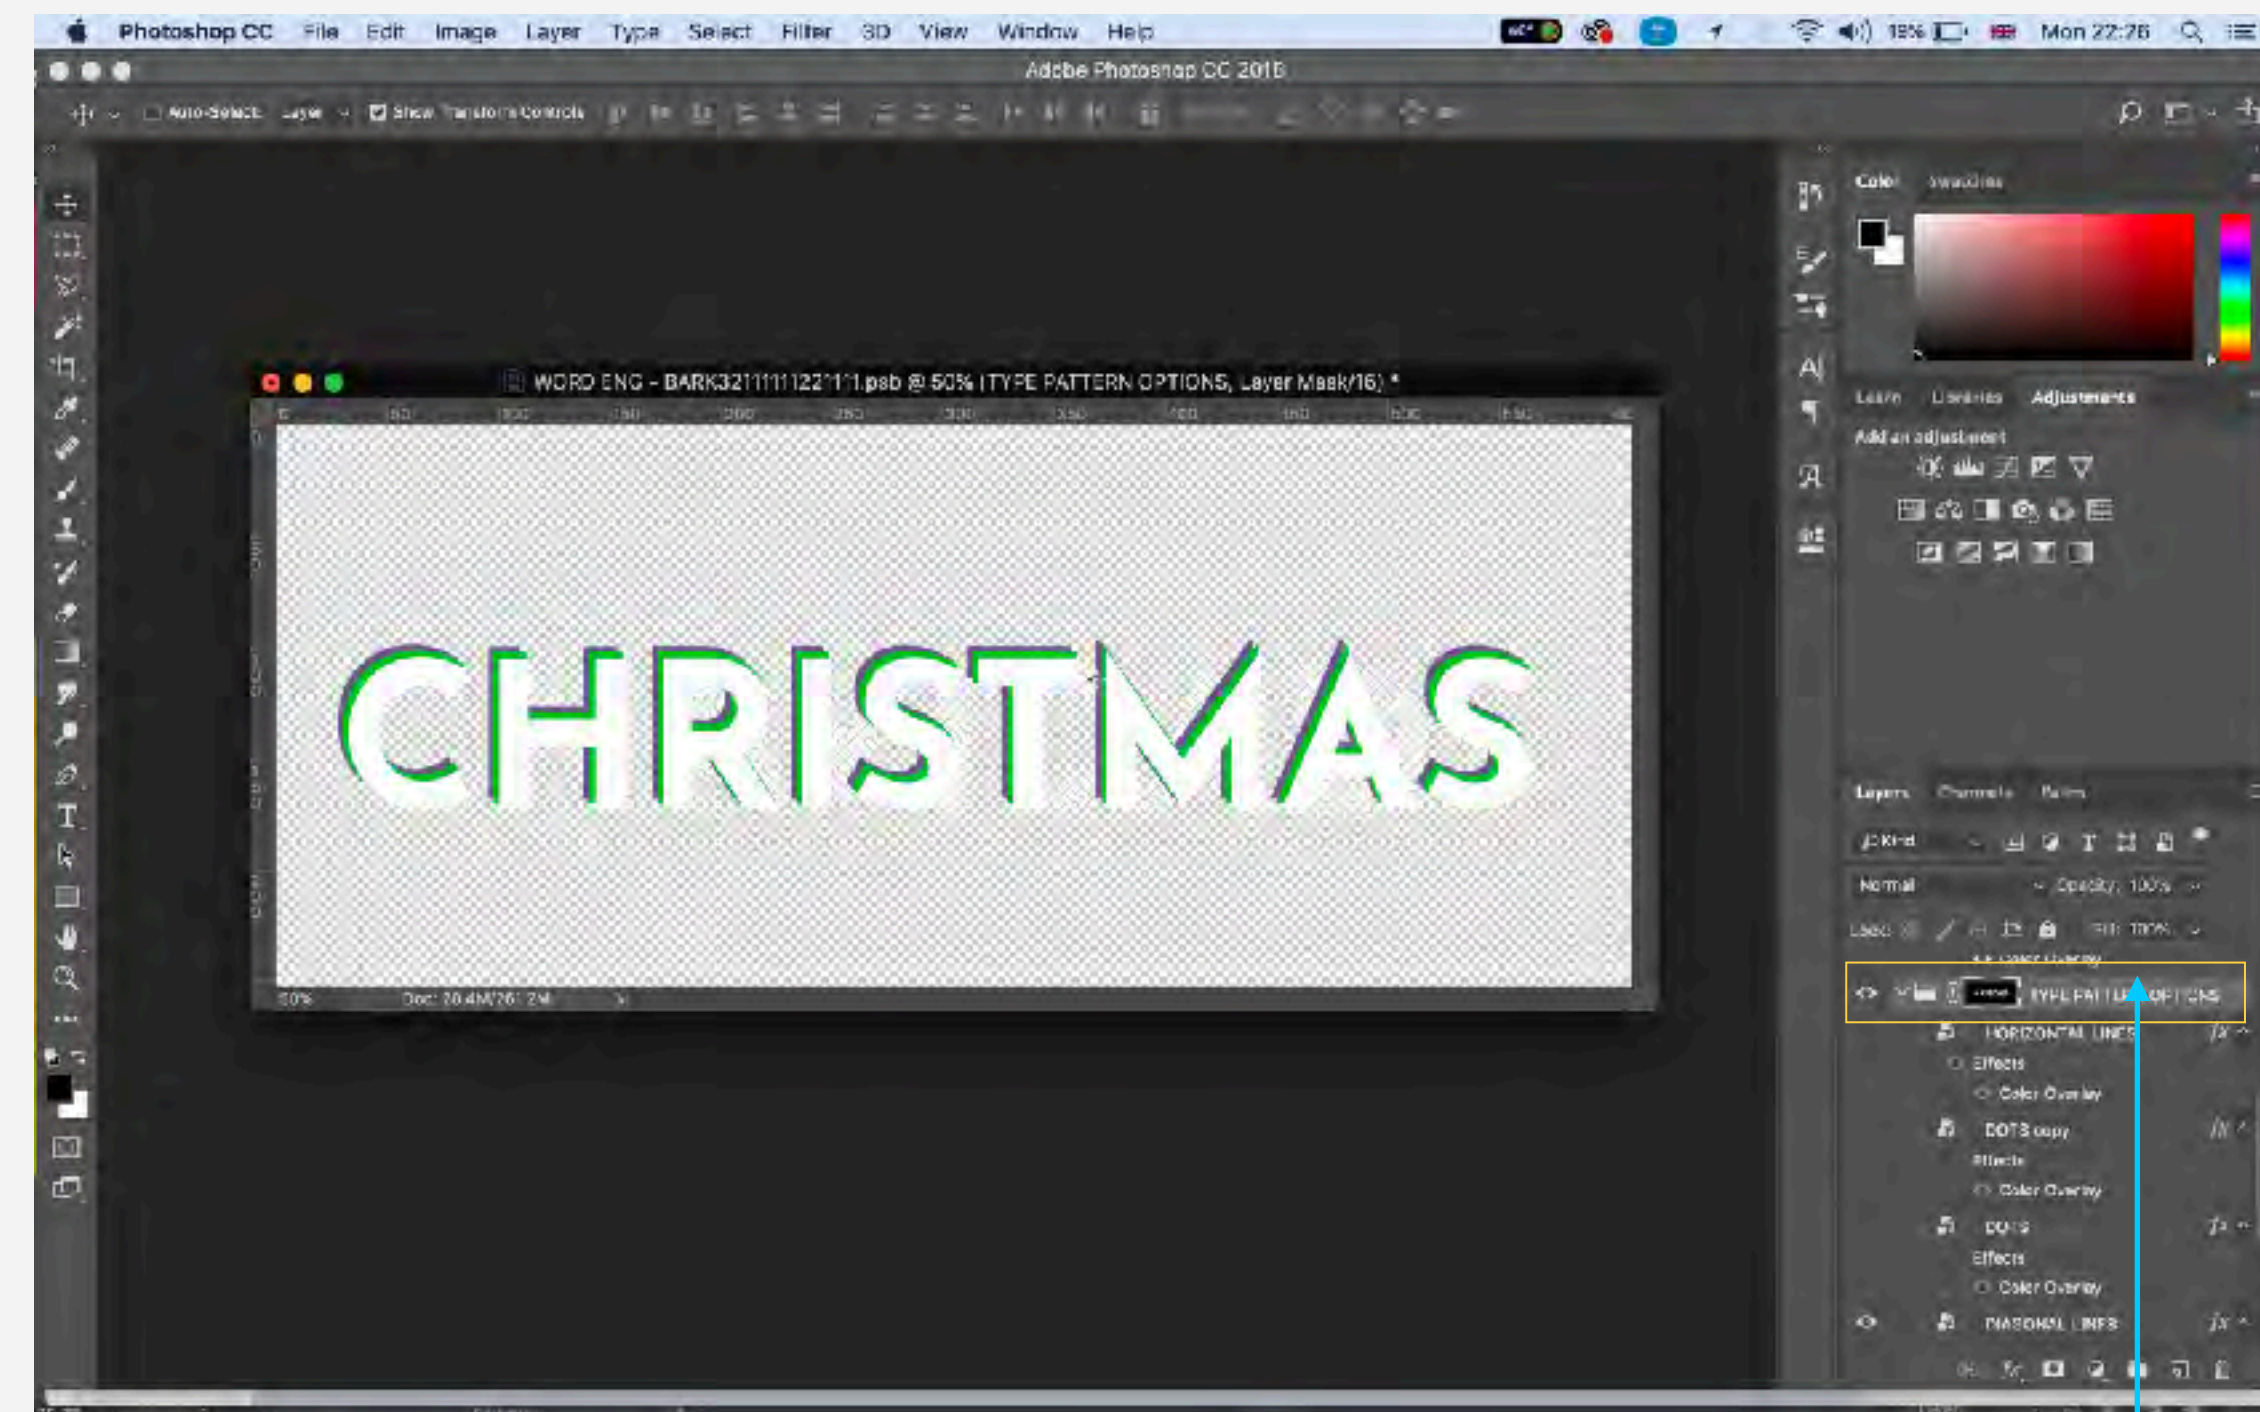

4. Then do the same for the 'colour overlay' effect.

EDITING TYPE COMPOSITION

WALK-THROUGH >

5. With the same layer selected, double click into the layer to edit the word. Here, we've overwritten 'NAVIDAD' to 'CHRISTMAS'.

6. Now that we've updated the word. Let's amend the textured pattern layer. Go to the '*TYPE PATTERN OPTIONS*' later group.

EDITING TYPE COMPOSITION

WALK-THROUGH >

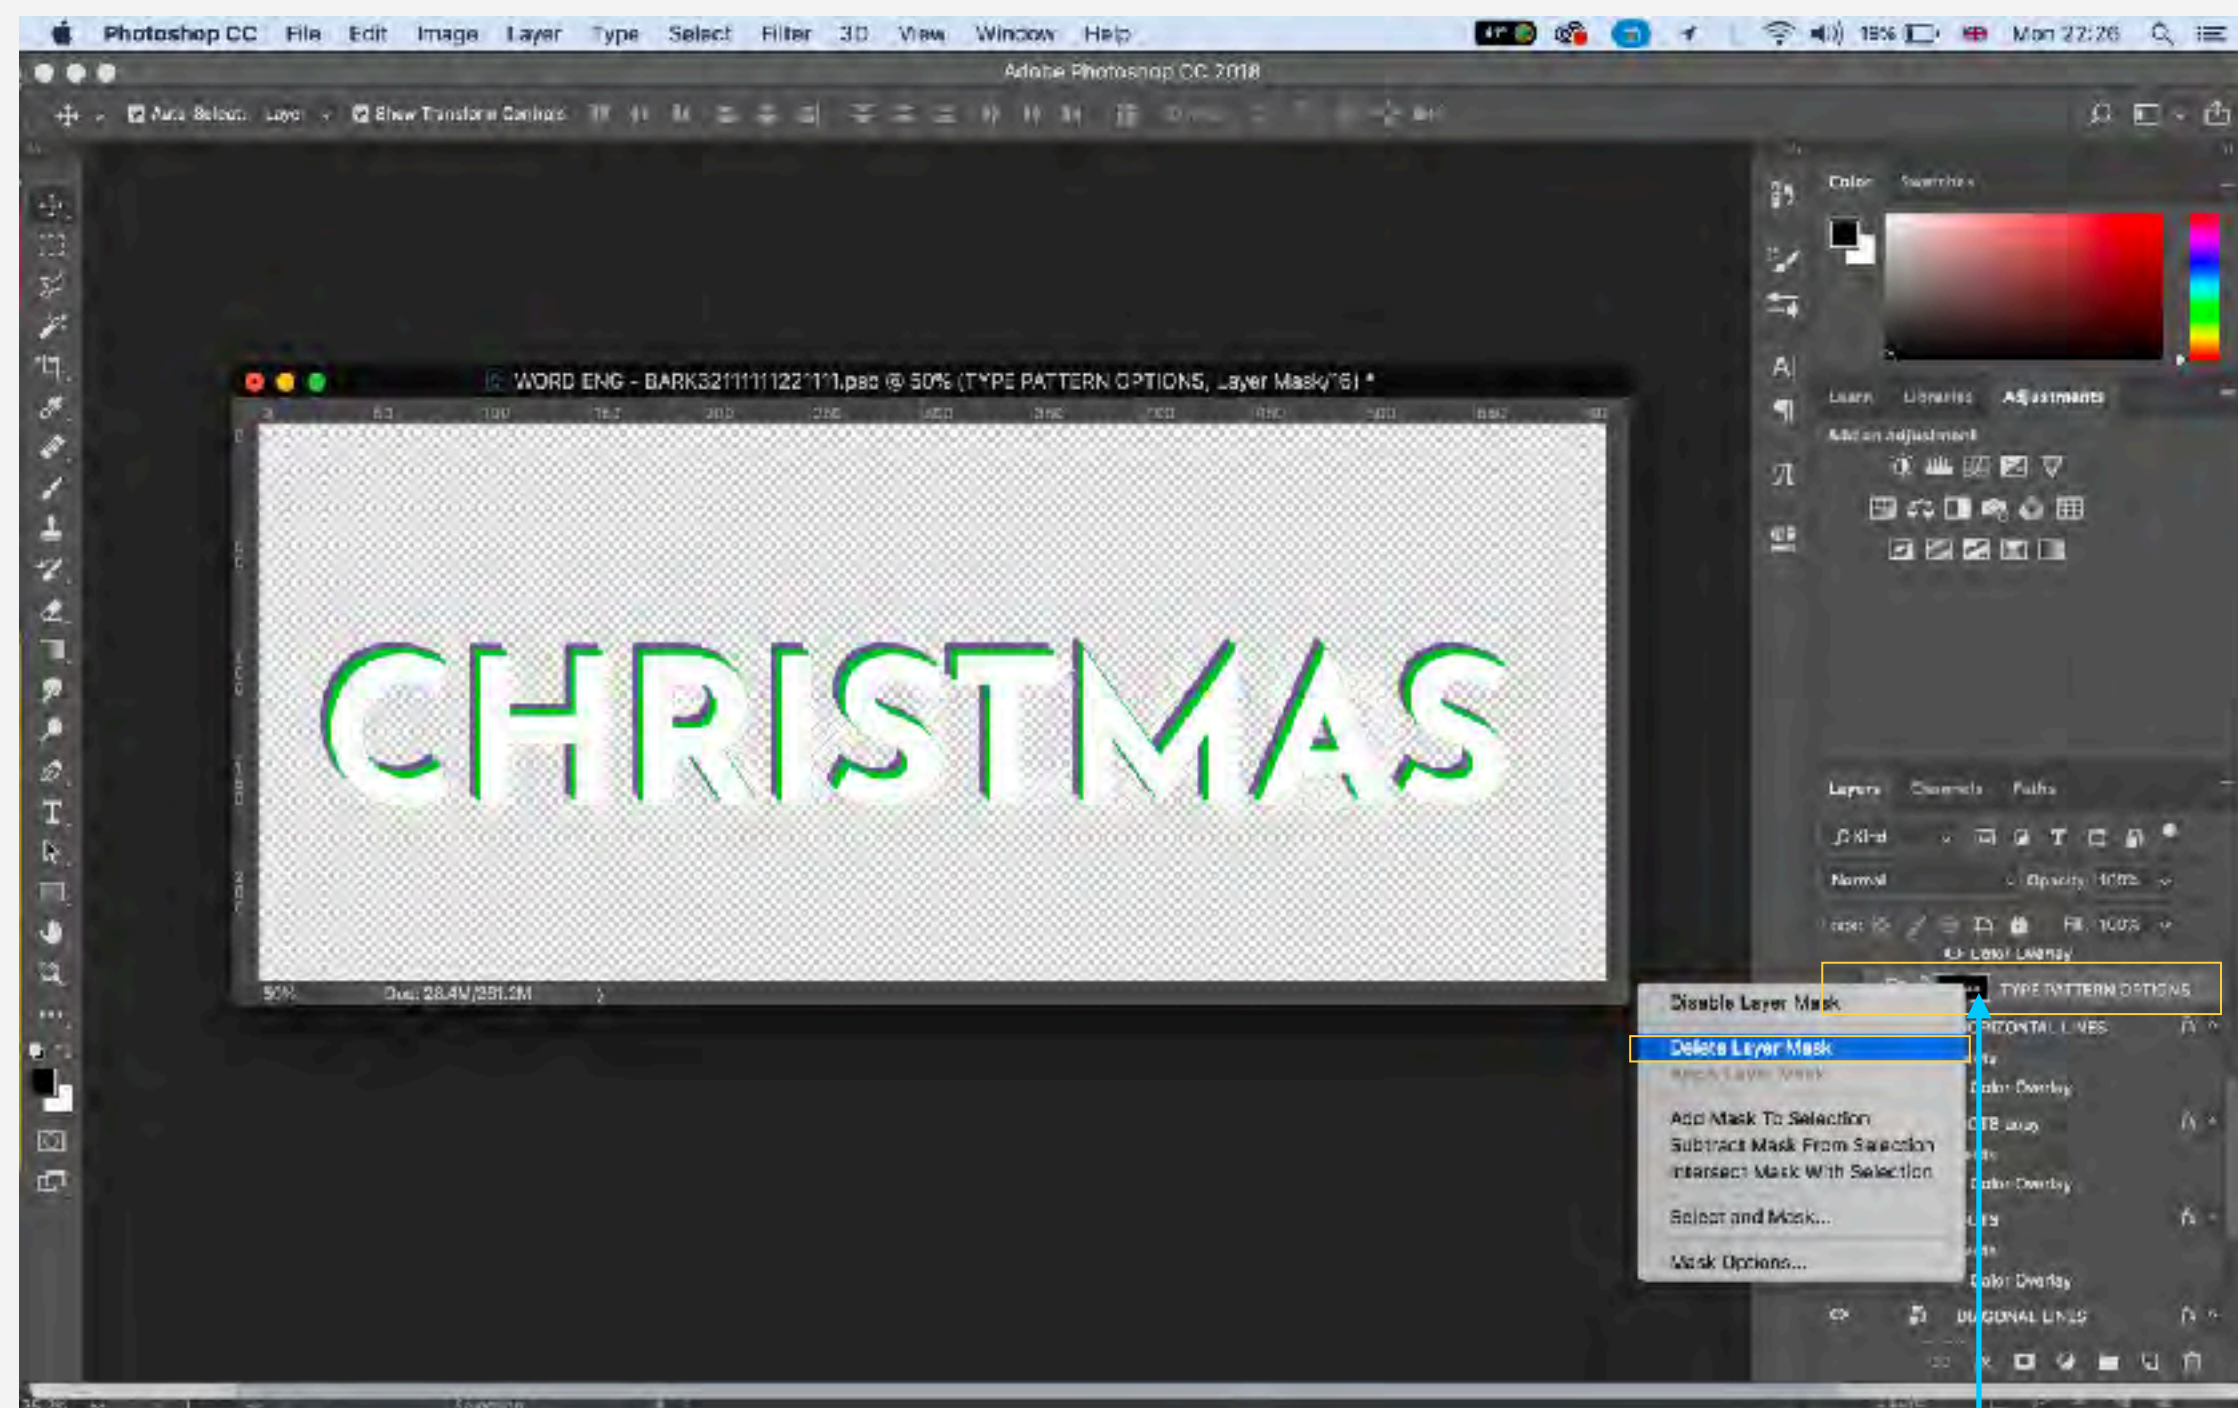

A. Angles

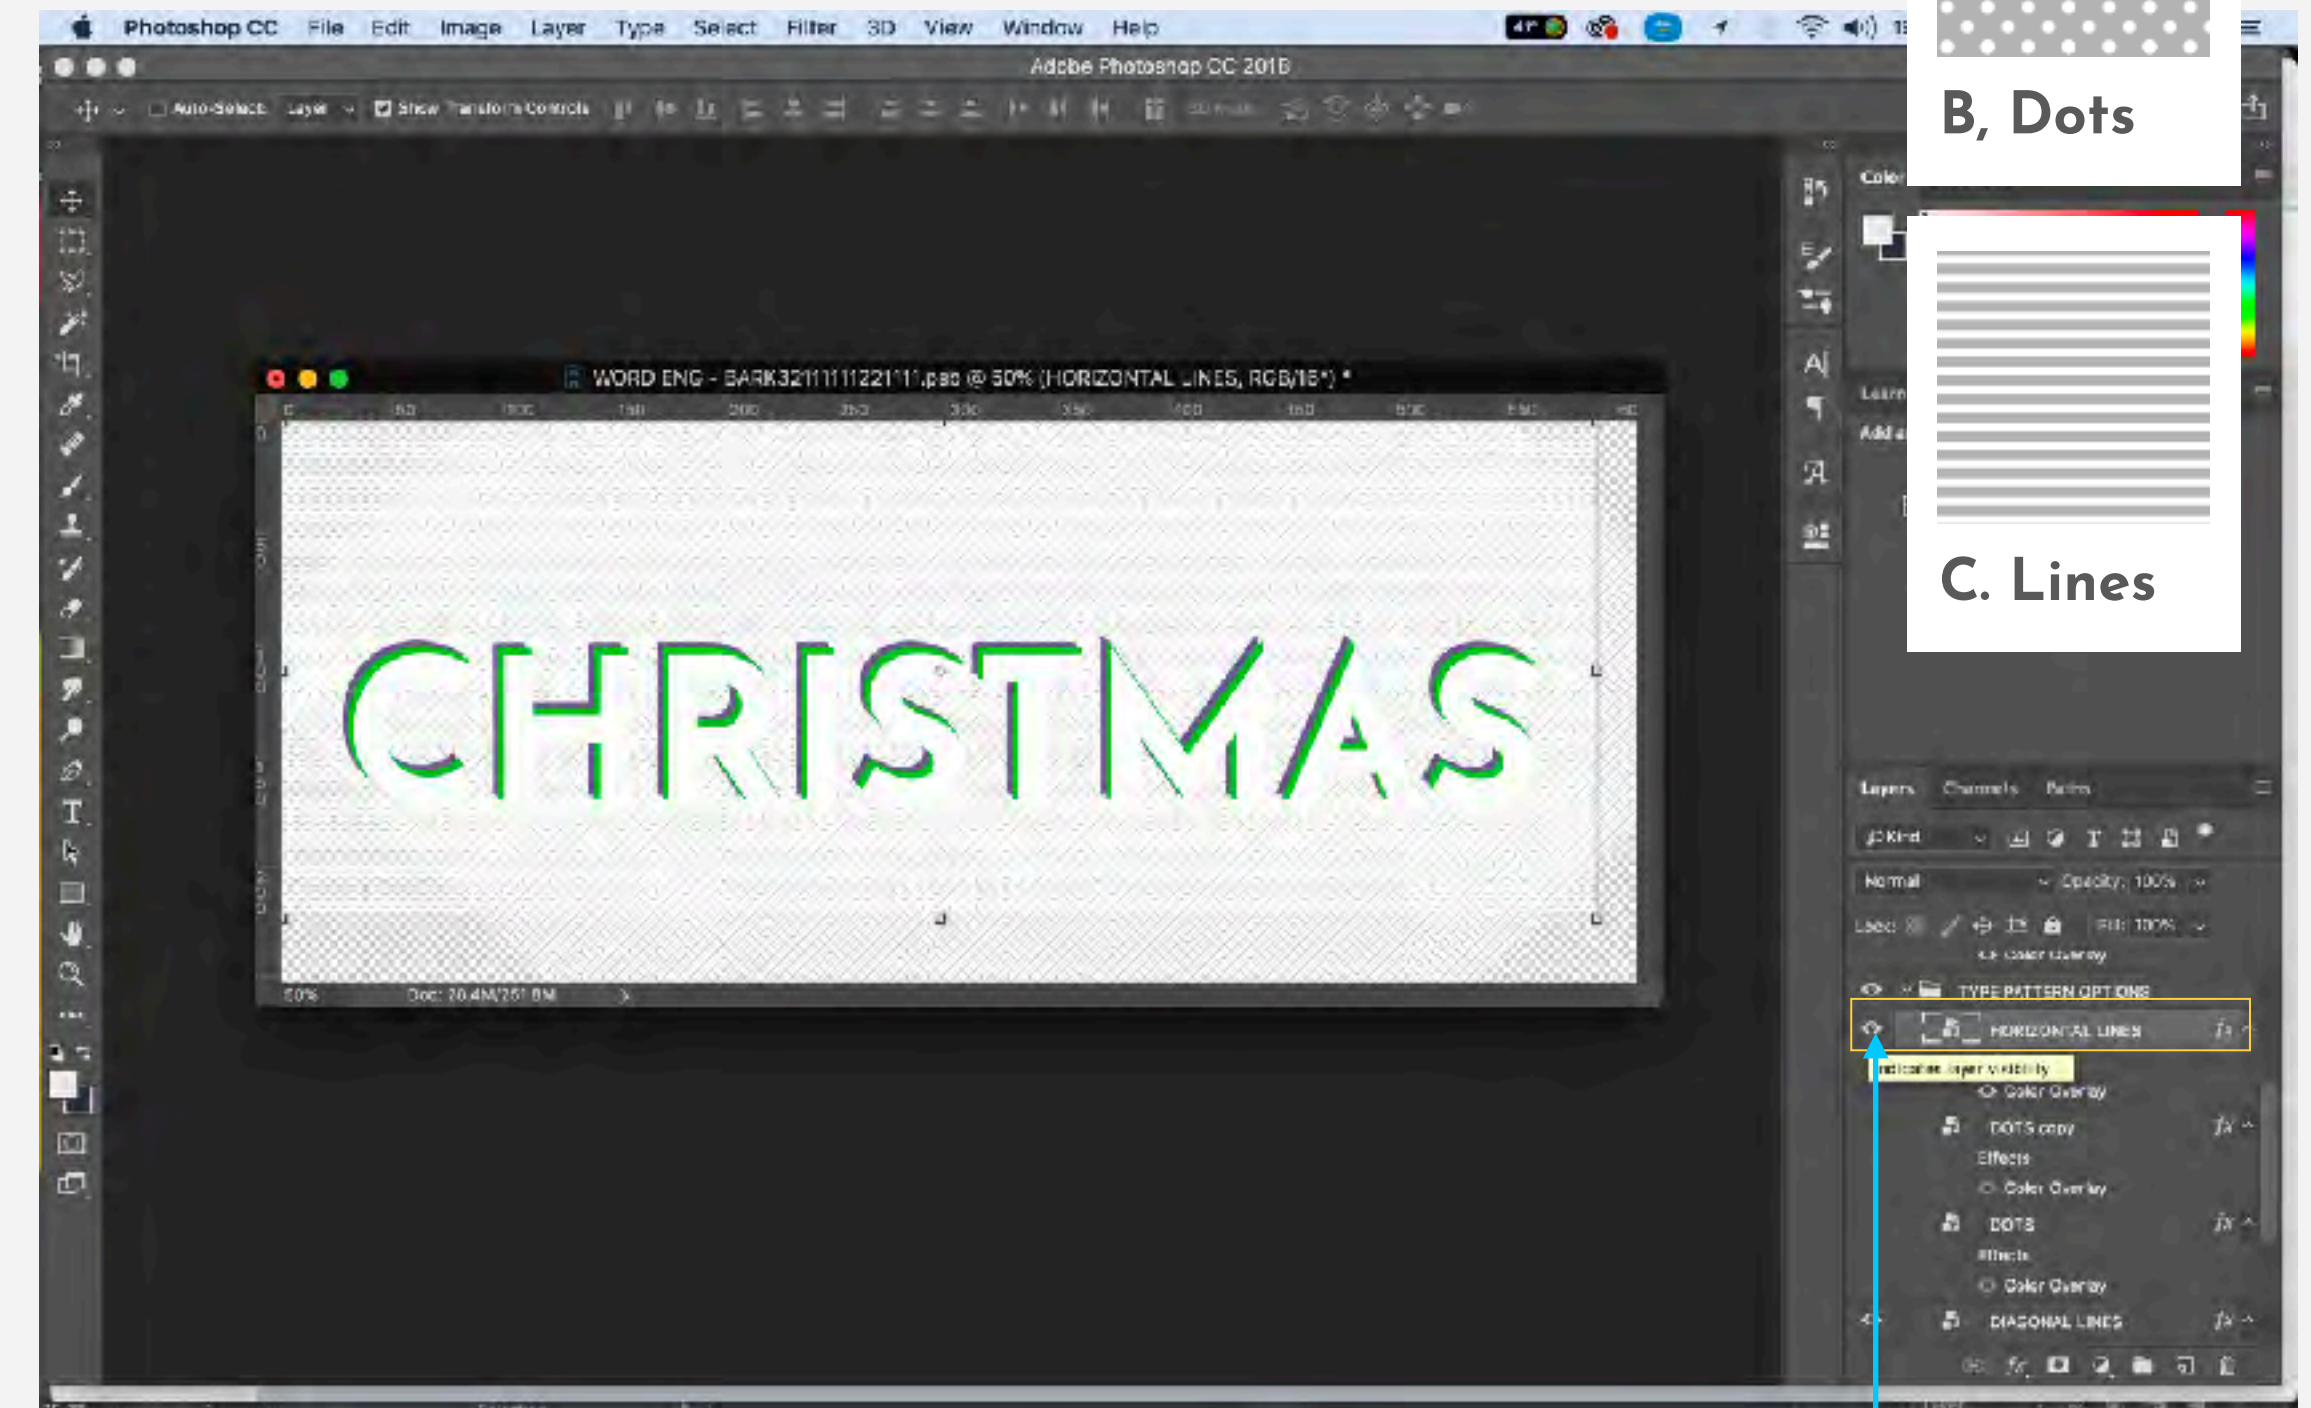

B, Dots

C. Lines

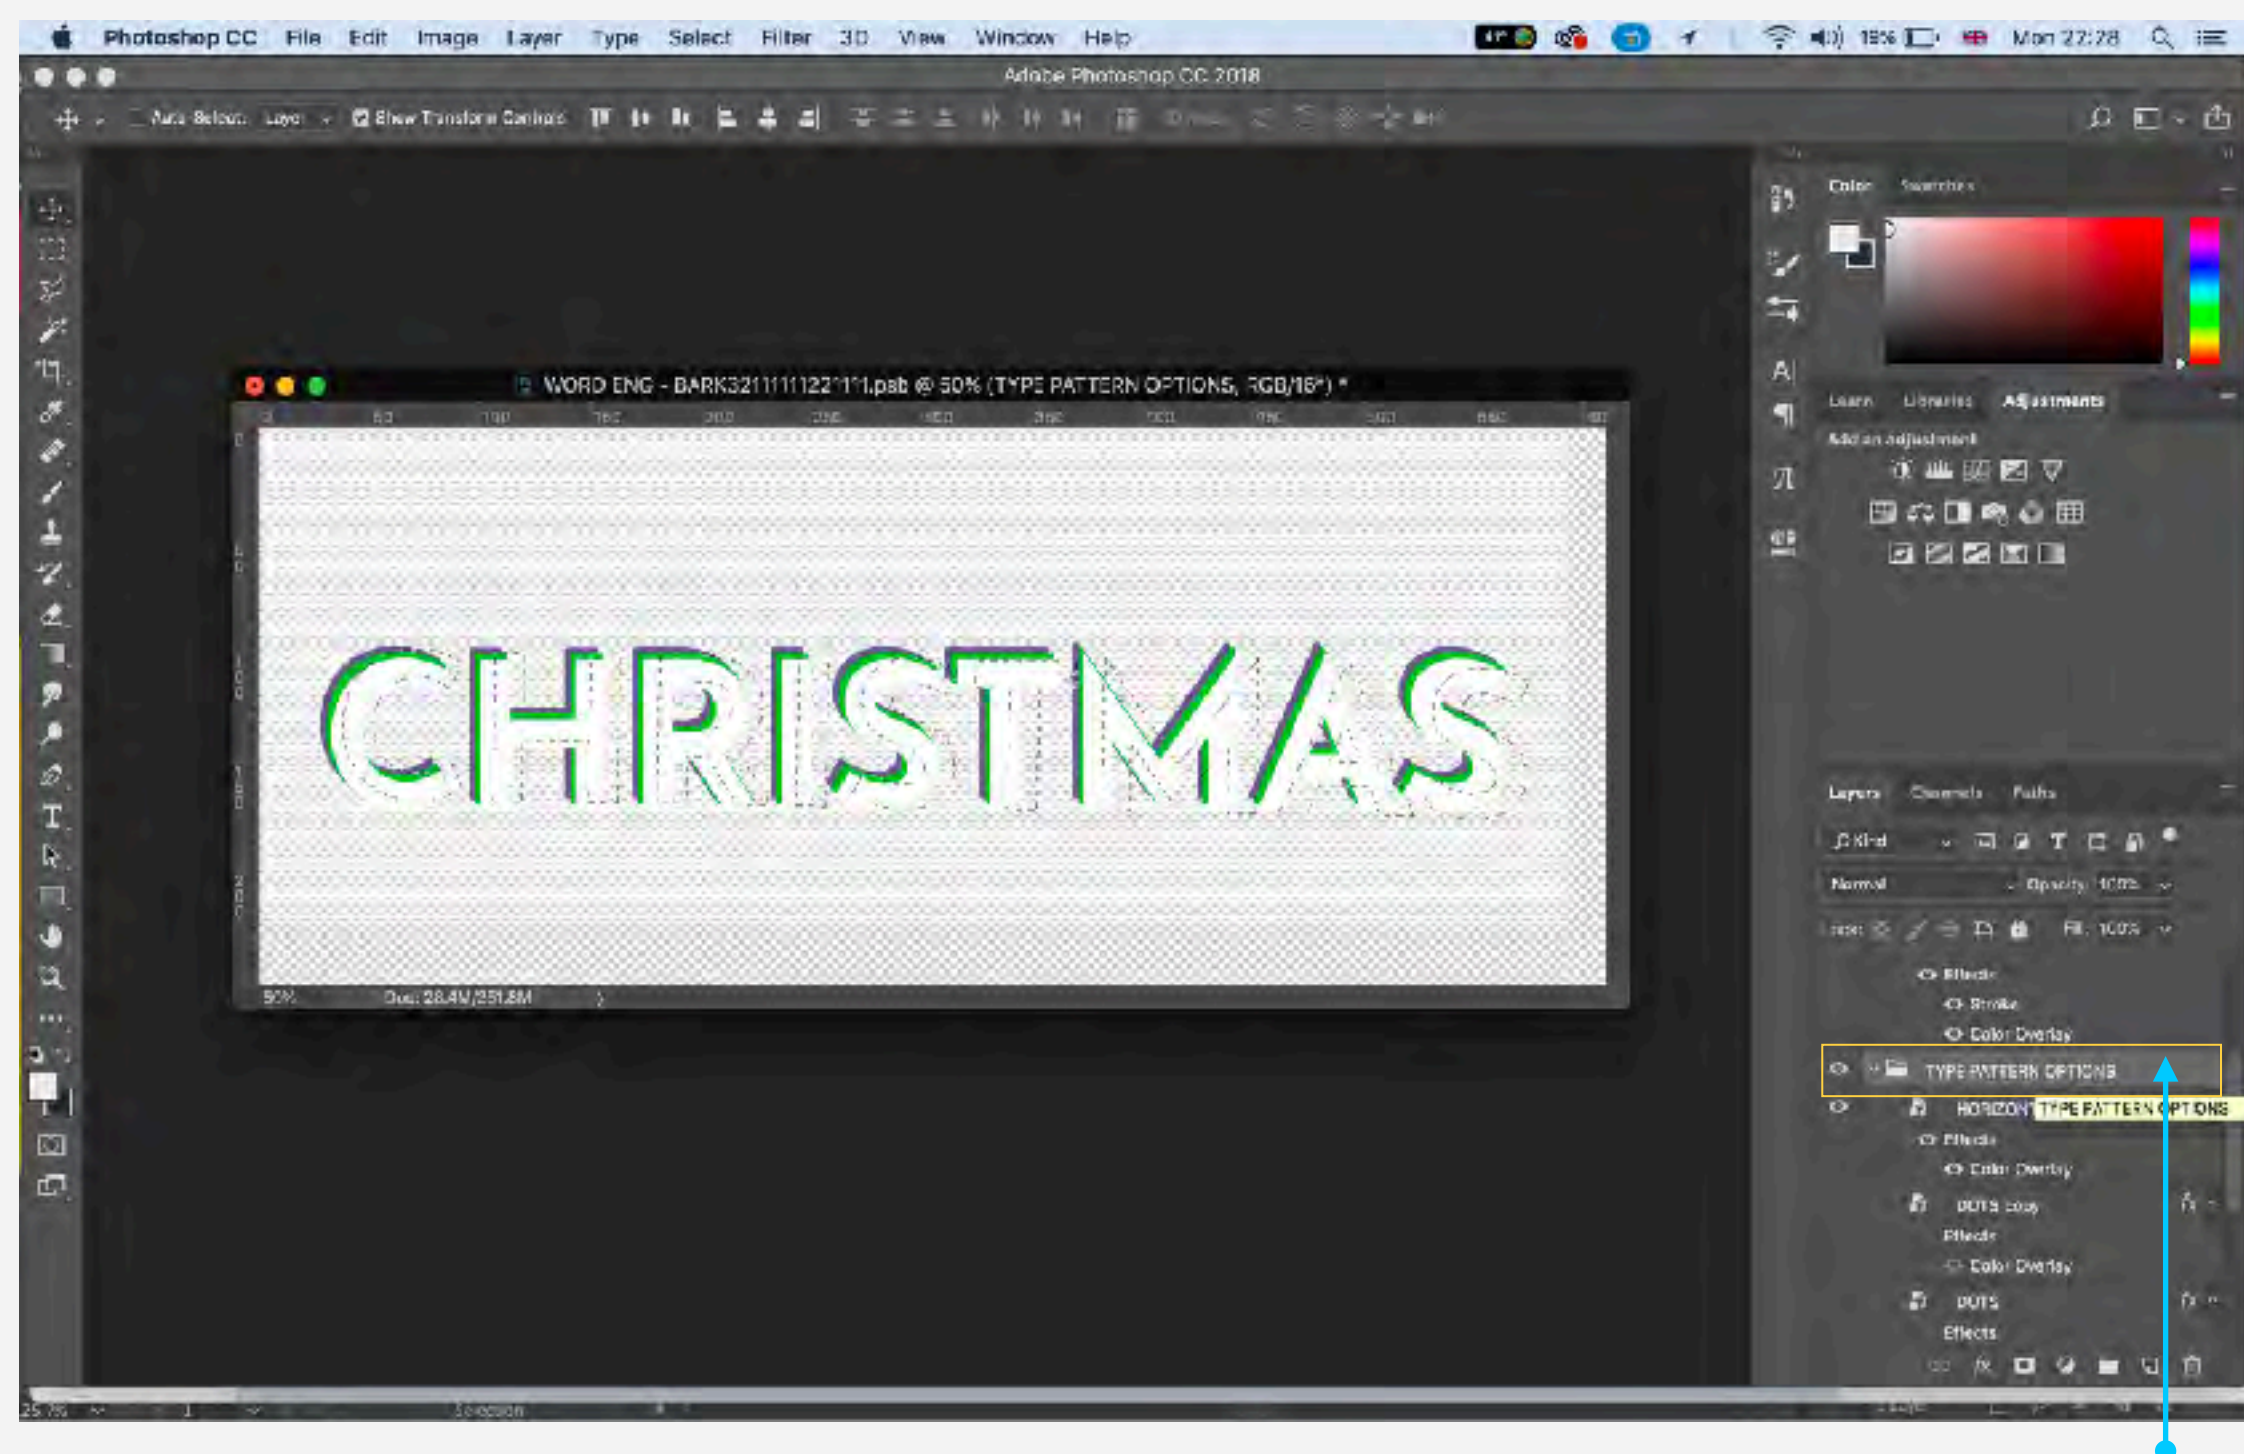

5. Select the mask on the layer, right click and then select '**DELETE LAYER MASK**'. As the word is changing, the masking of the pattern will need to match the new word.

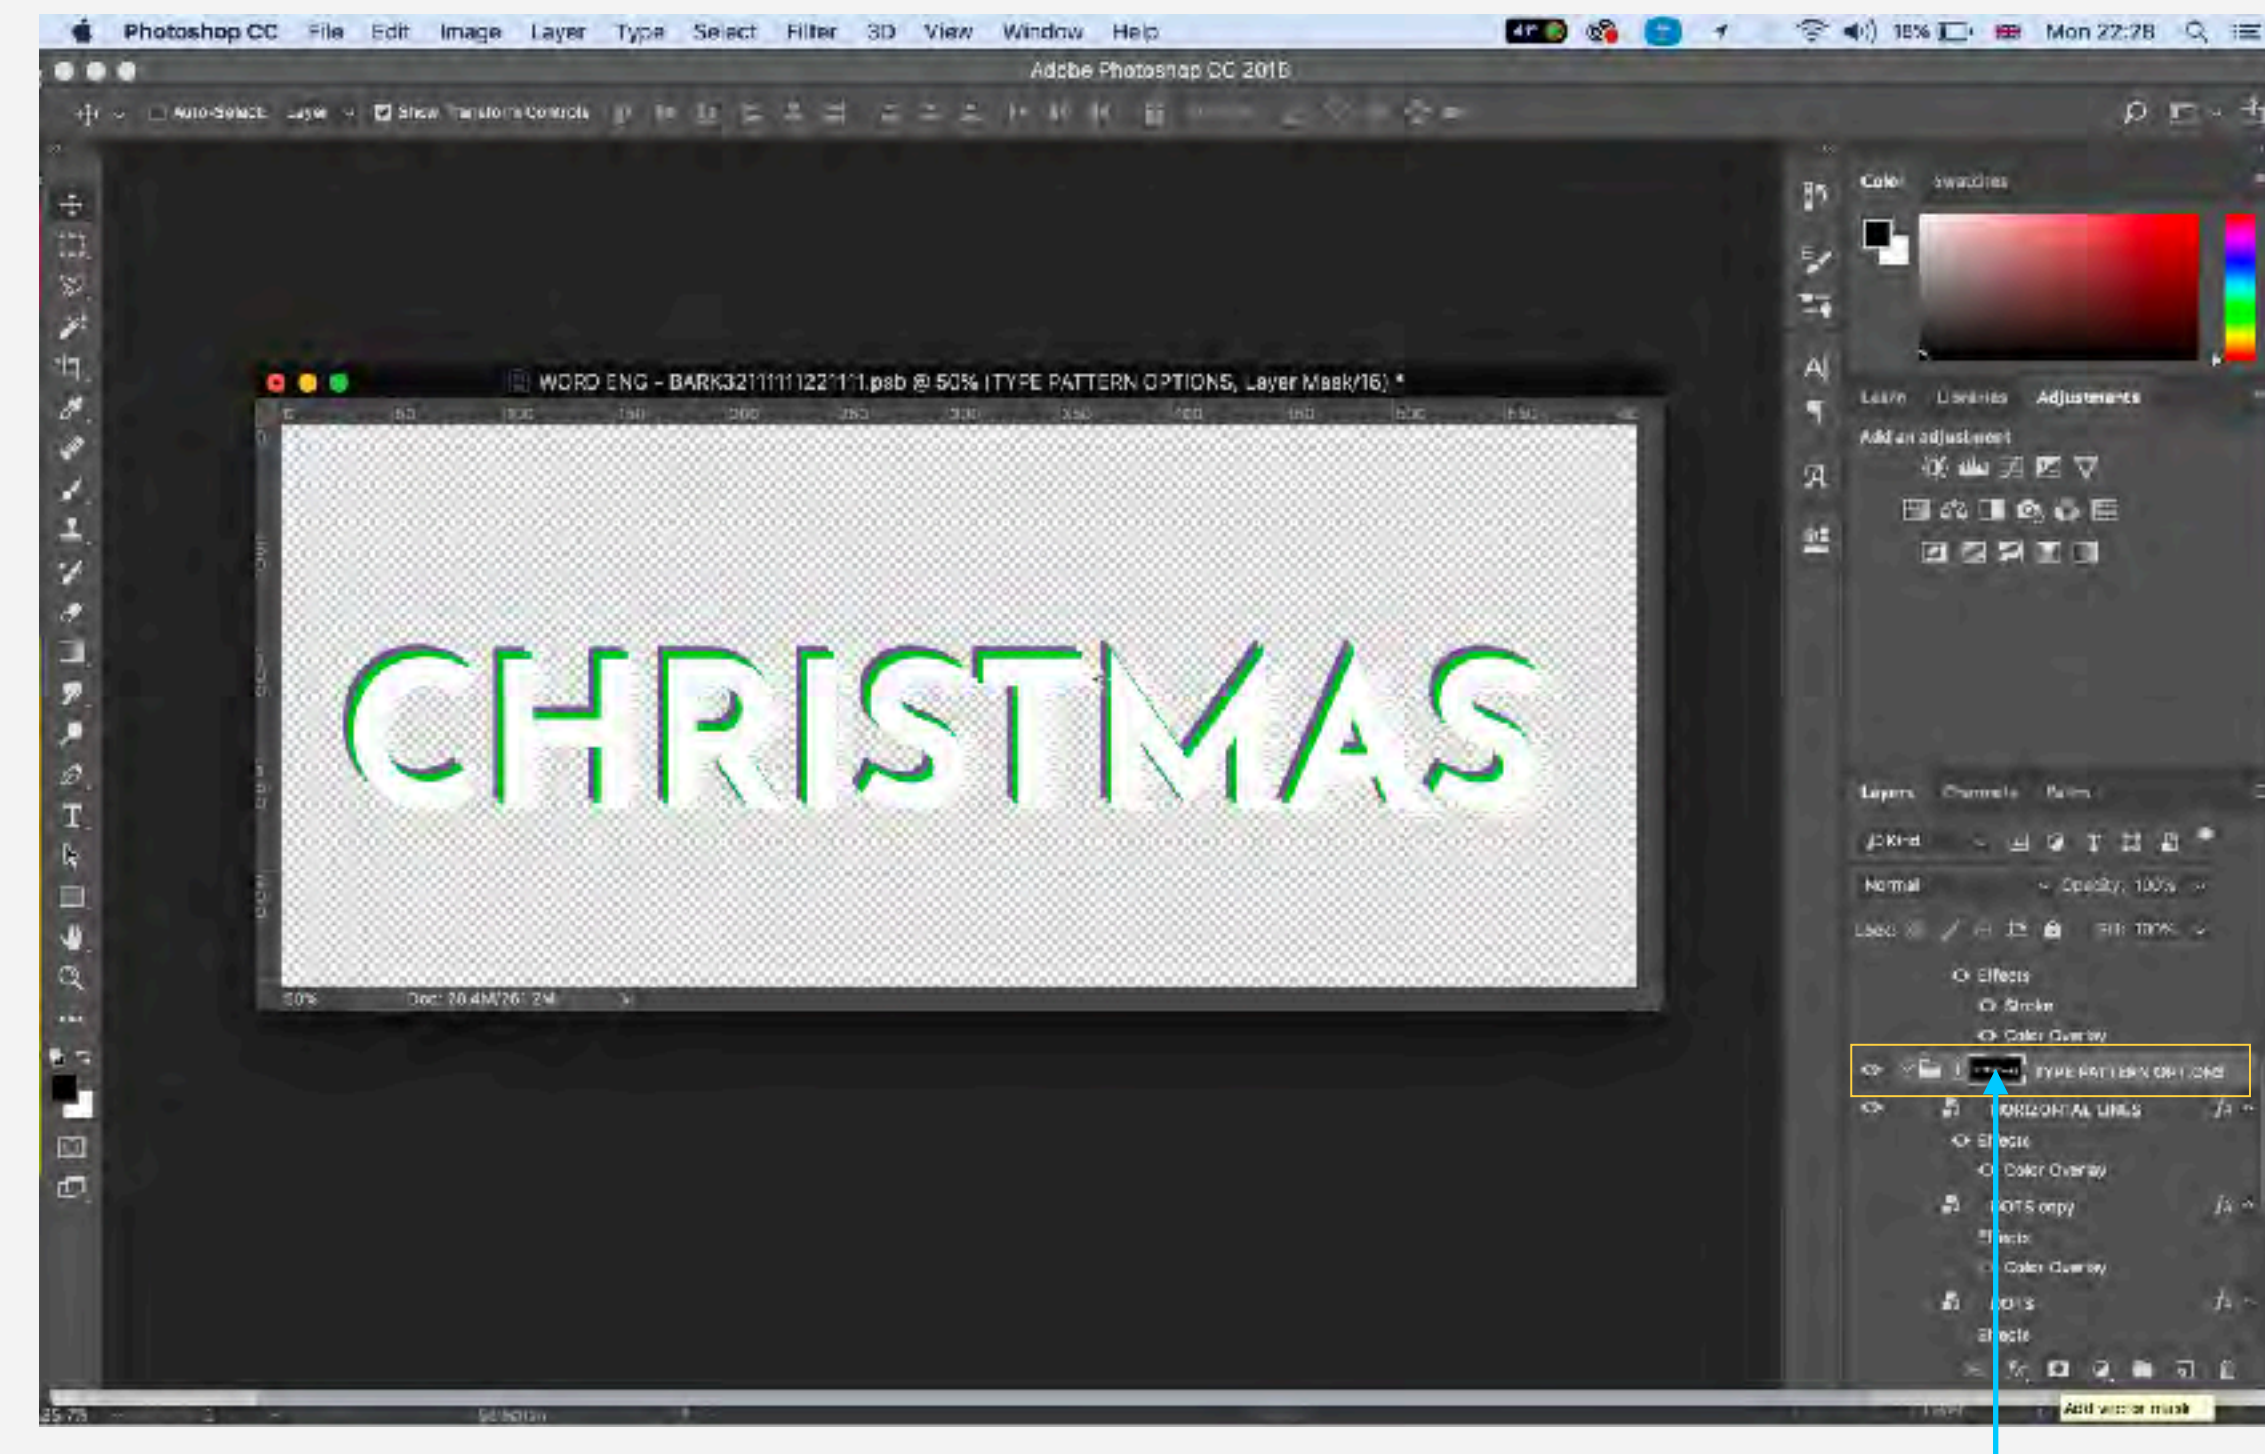

8. If we want to change the texture pattern, we then '**switch on**' the desired pattern layer. Here, we have selected '**Horizontal lines**'.

EDITING TYPE COMPOSITION

WALK-THROUGH >

11. Now you have a selection for your new 'word pattern mask'. Now go back to the group layer 'TYPE PATTERN OPTIONS'.

12. Right click the group layer, then add a the new mask. Once that's done, save and close your smart object to update all your changes.

EDITING TYPE COMPOSITION

WALK-THROUGH >

13. Great... now let's change other words.

14. Now we change our word highlight to red. Transcreation of type complete!

FLATLAY

An image is worth a thousand words. But a thousand words can describe an image. We 'translate' still photography using eye-catching animation that highlights the individual items within a scene.

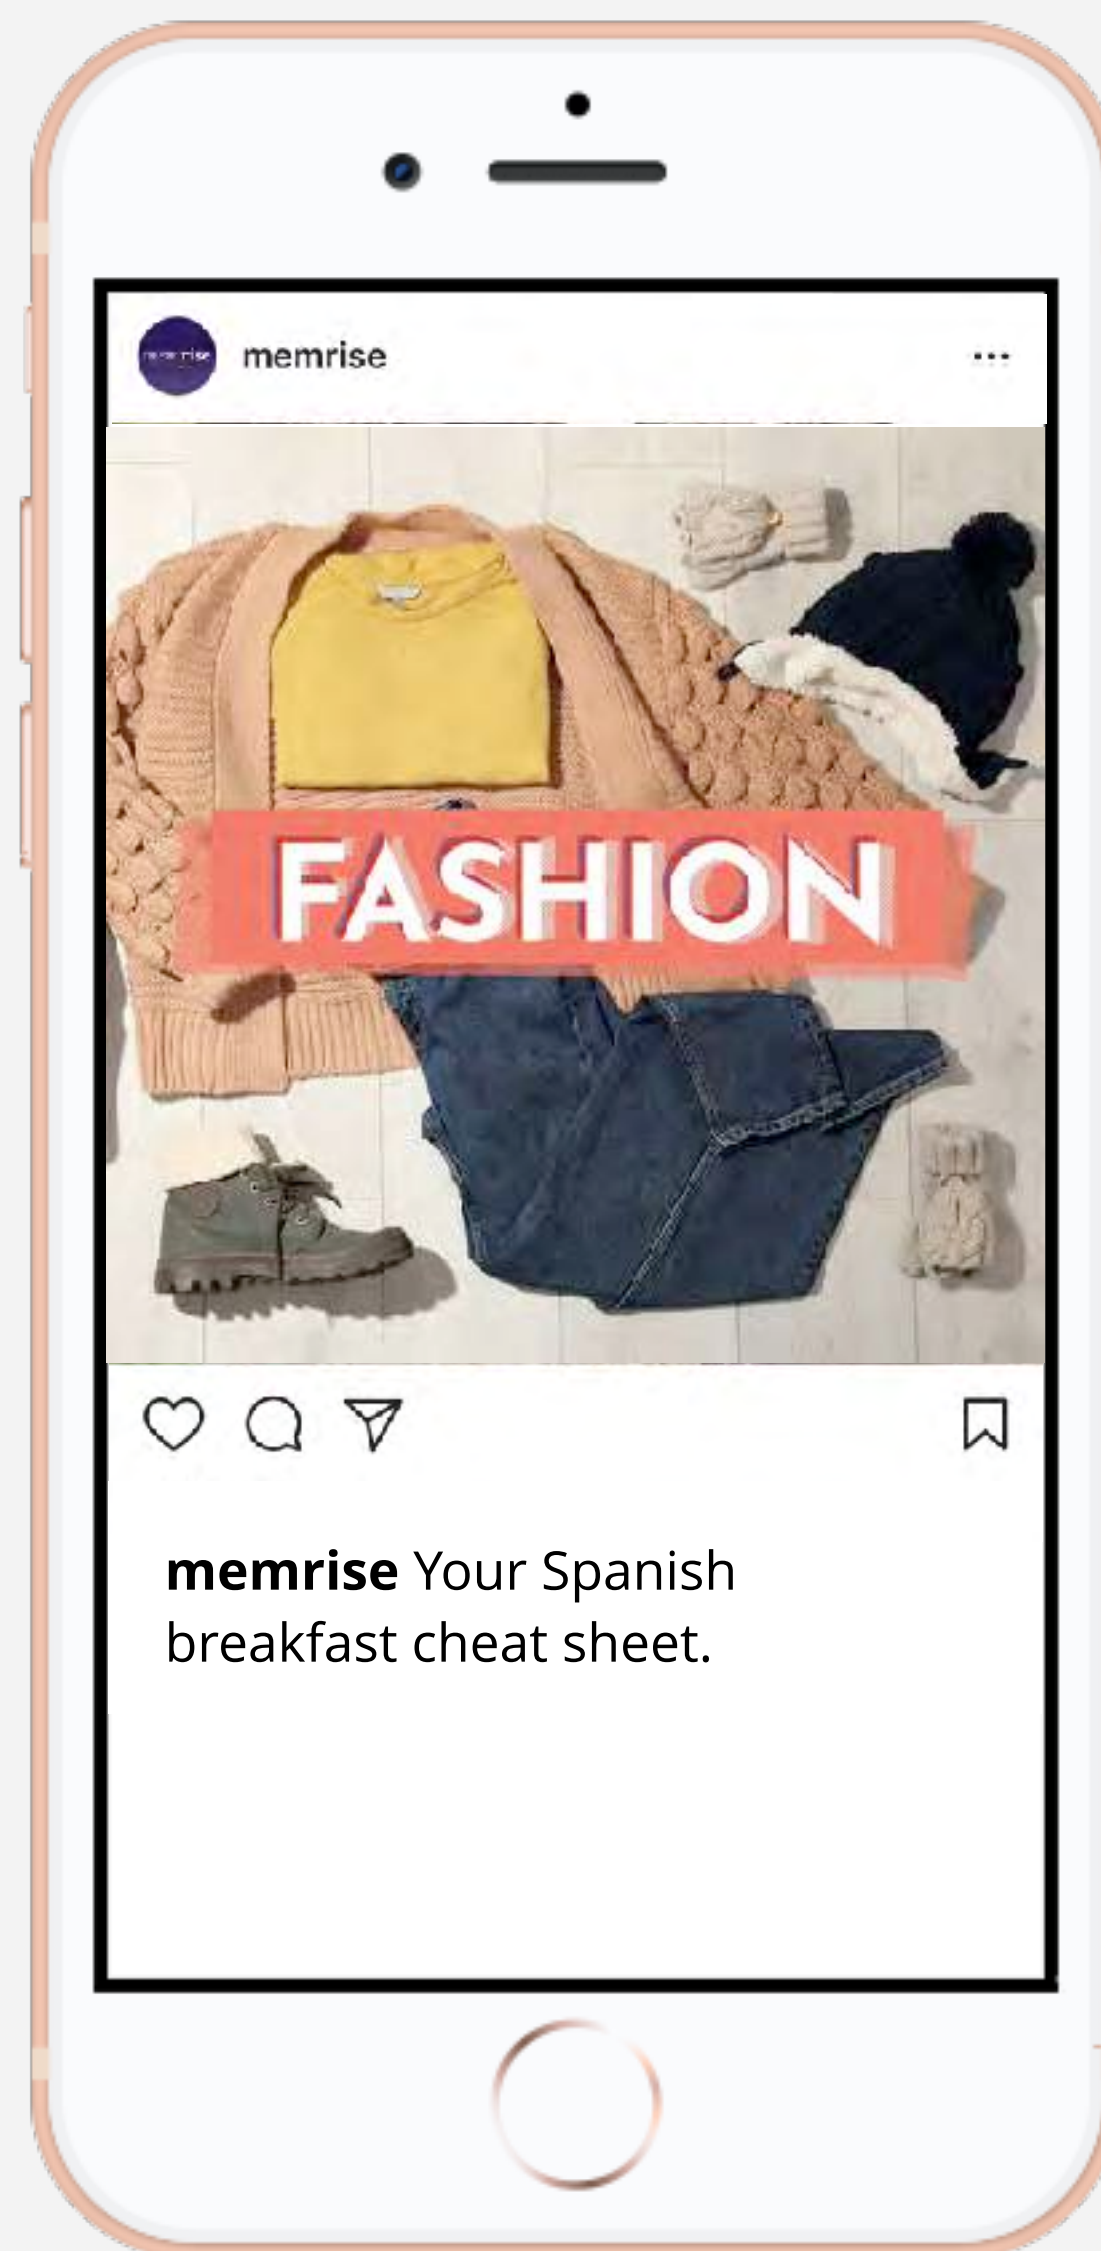

FLATLAY TEMPLATE >

WALK-THROUGH >

The flatlay template are a series of frames that stitches together to make a vocabulary video. The frames reveal the objects labelled with the words in the target language,;

HOW TO CREATE A FLATLAY:

1. You choose a theme for the target language, i.e: cultural, seasonal etc.
2. Source an image
3. Create the word translations in the target language
4. Decide theme colour
5. Edit template in photoshop to highlight objects with language word labels.
6. Output: 1 x video file and 2 x jpegs as a vocabulary cheat sheet that are placed at the end and accessed by swiping.

FLATLAY TEMPLATE >

WALK-THROUGH >

The fundamental elements for this particular flatlay:

TARGET LANGUAGE:

English speaking learning French

THEME:

Winter Fashion

NUMBER OF ADJECTIVES :

3

THEME COLOURS & PATTERN :

Reds and purples for Autumn/Winter feel

FLATLAY TEMPLATE >

EDITING PSDS >

There are two PSD files that are needed to create a new flatlay.

1. Type and image composition

2. The video PSD

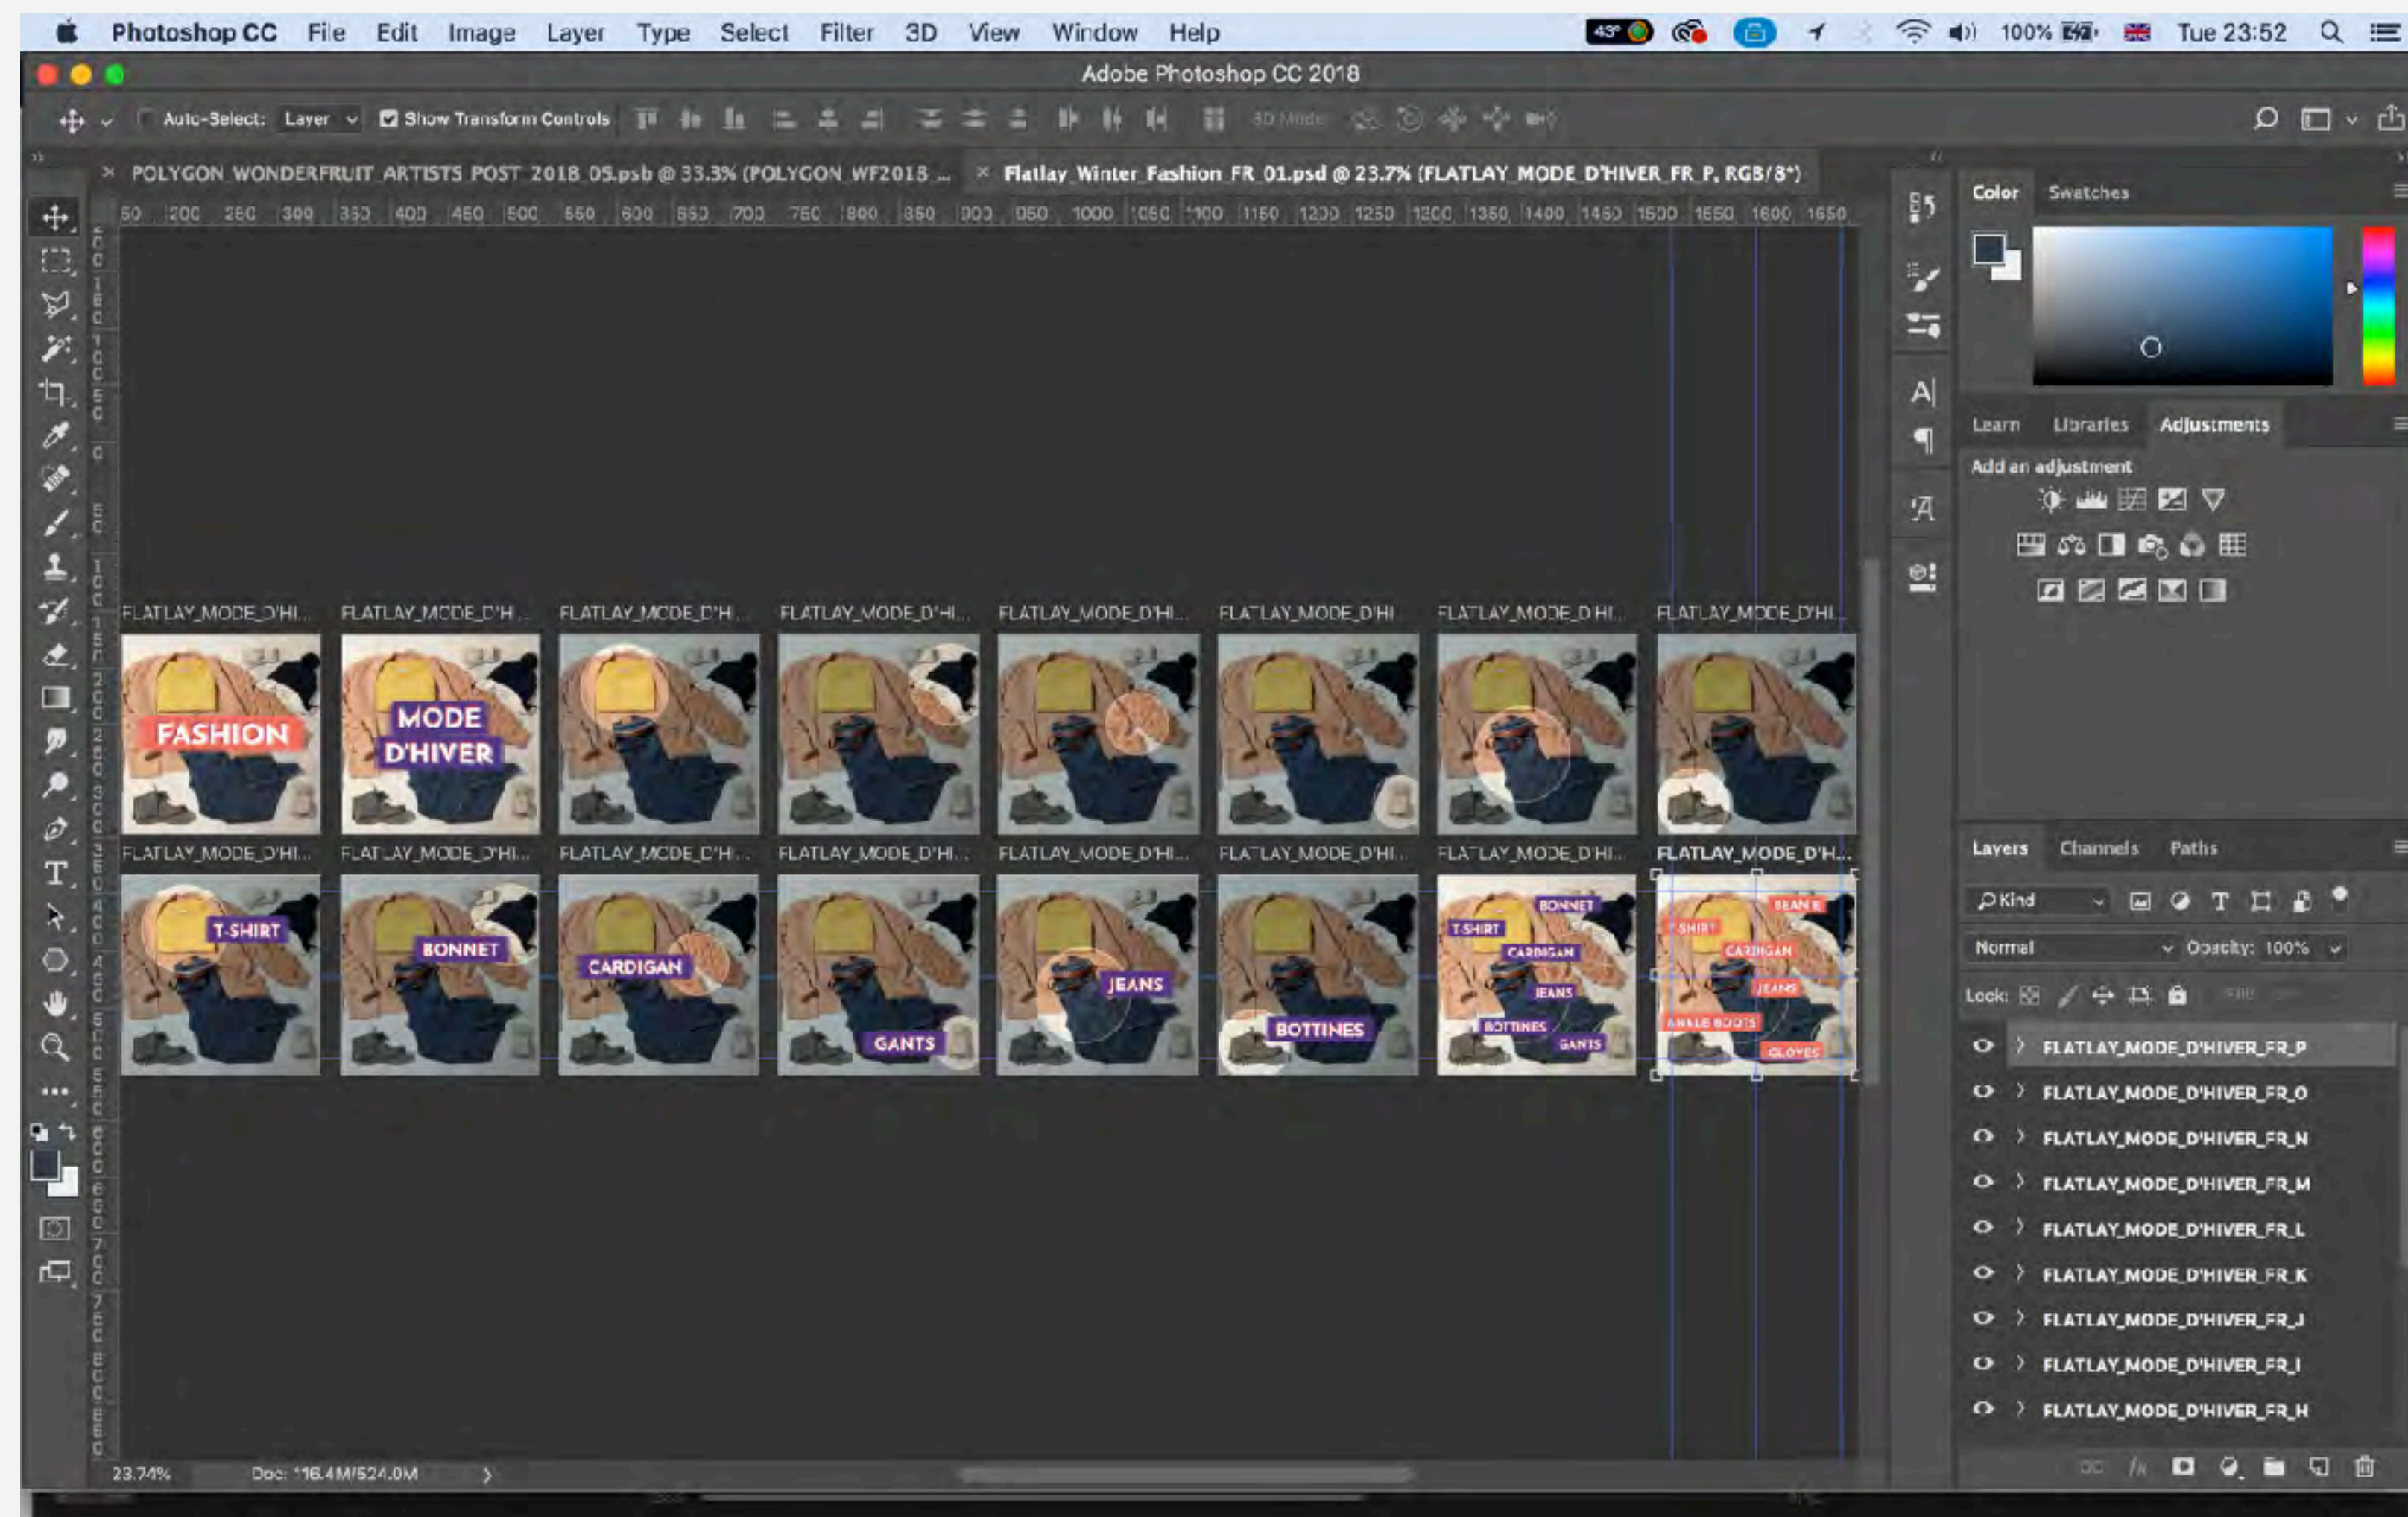

FLATLAY TEMPLATE >

EDITING PSDS >

1. Type & Image Composition:

This PSD is made up of all the stills that is required to make the animation. The PSD has been setup as artboards per frame

PSD File: **D_OT_01_FR_01_EN**
Available upon request.

1. Type and image composition

FLATLAY TEMPLATE >

EDITING PSDS >

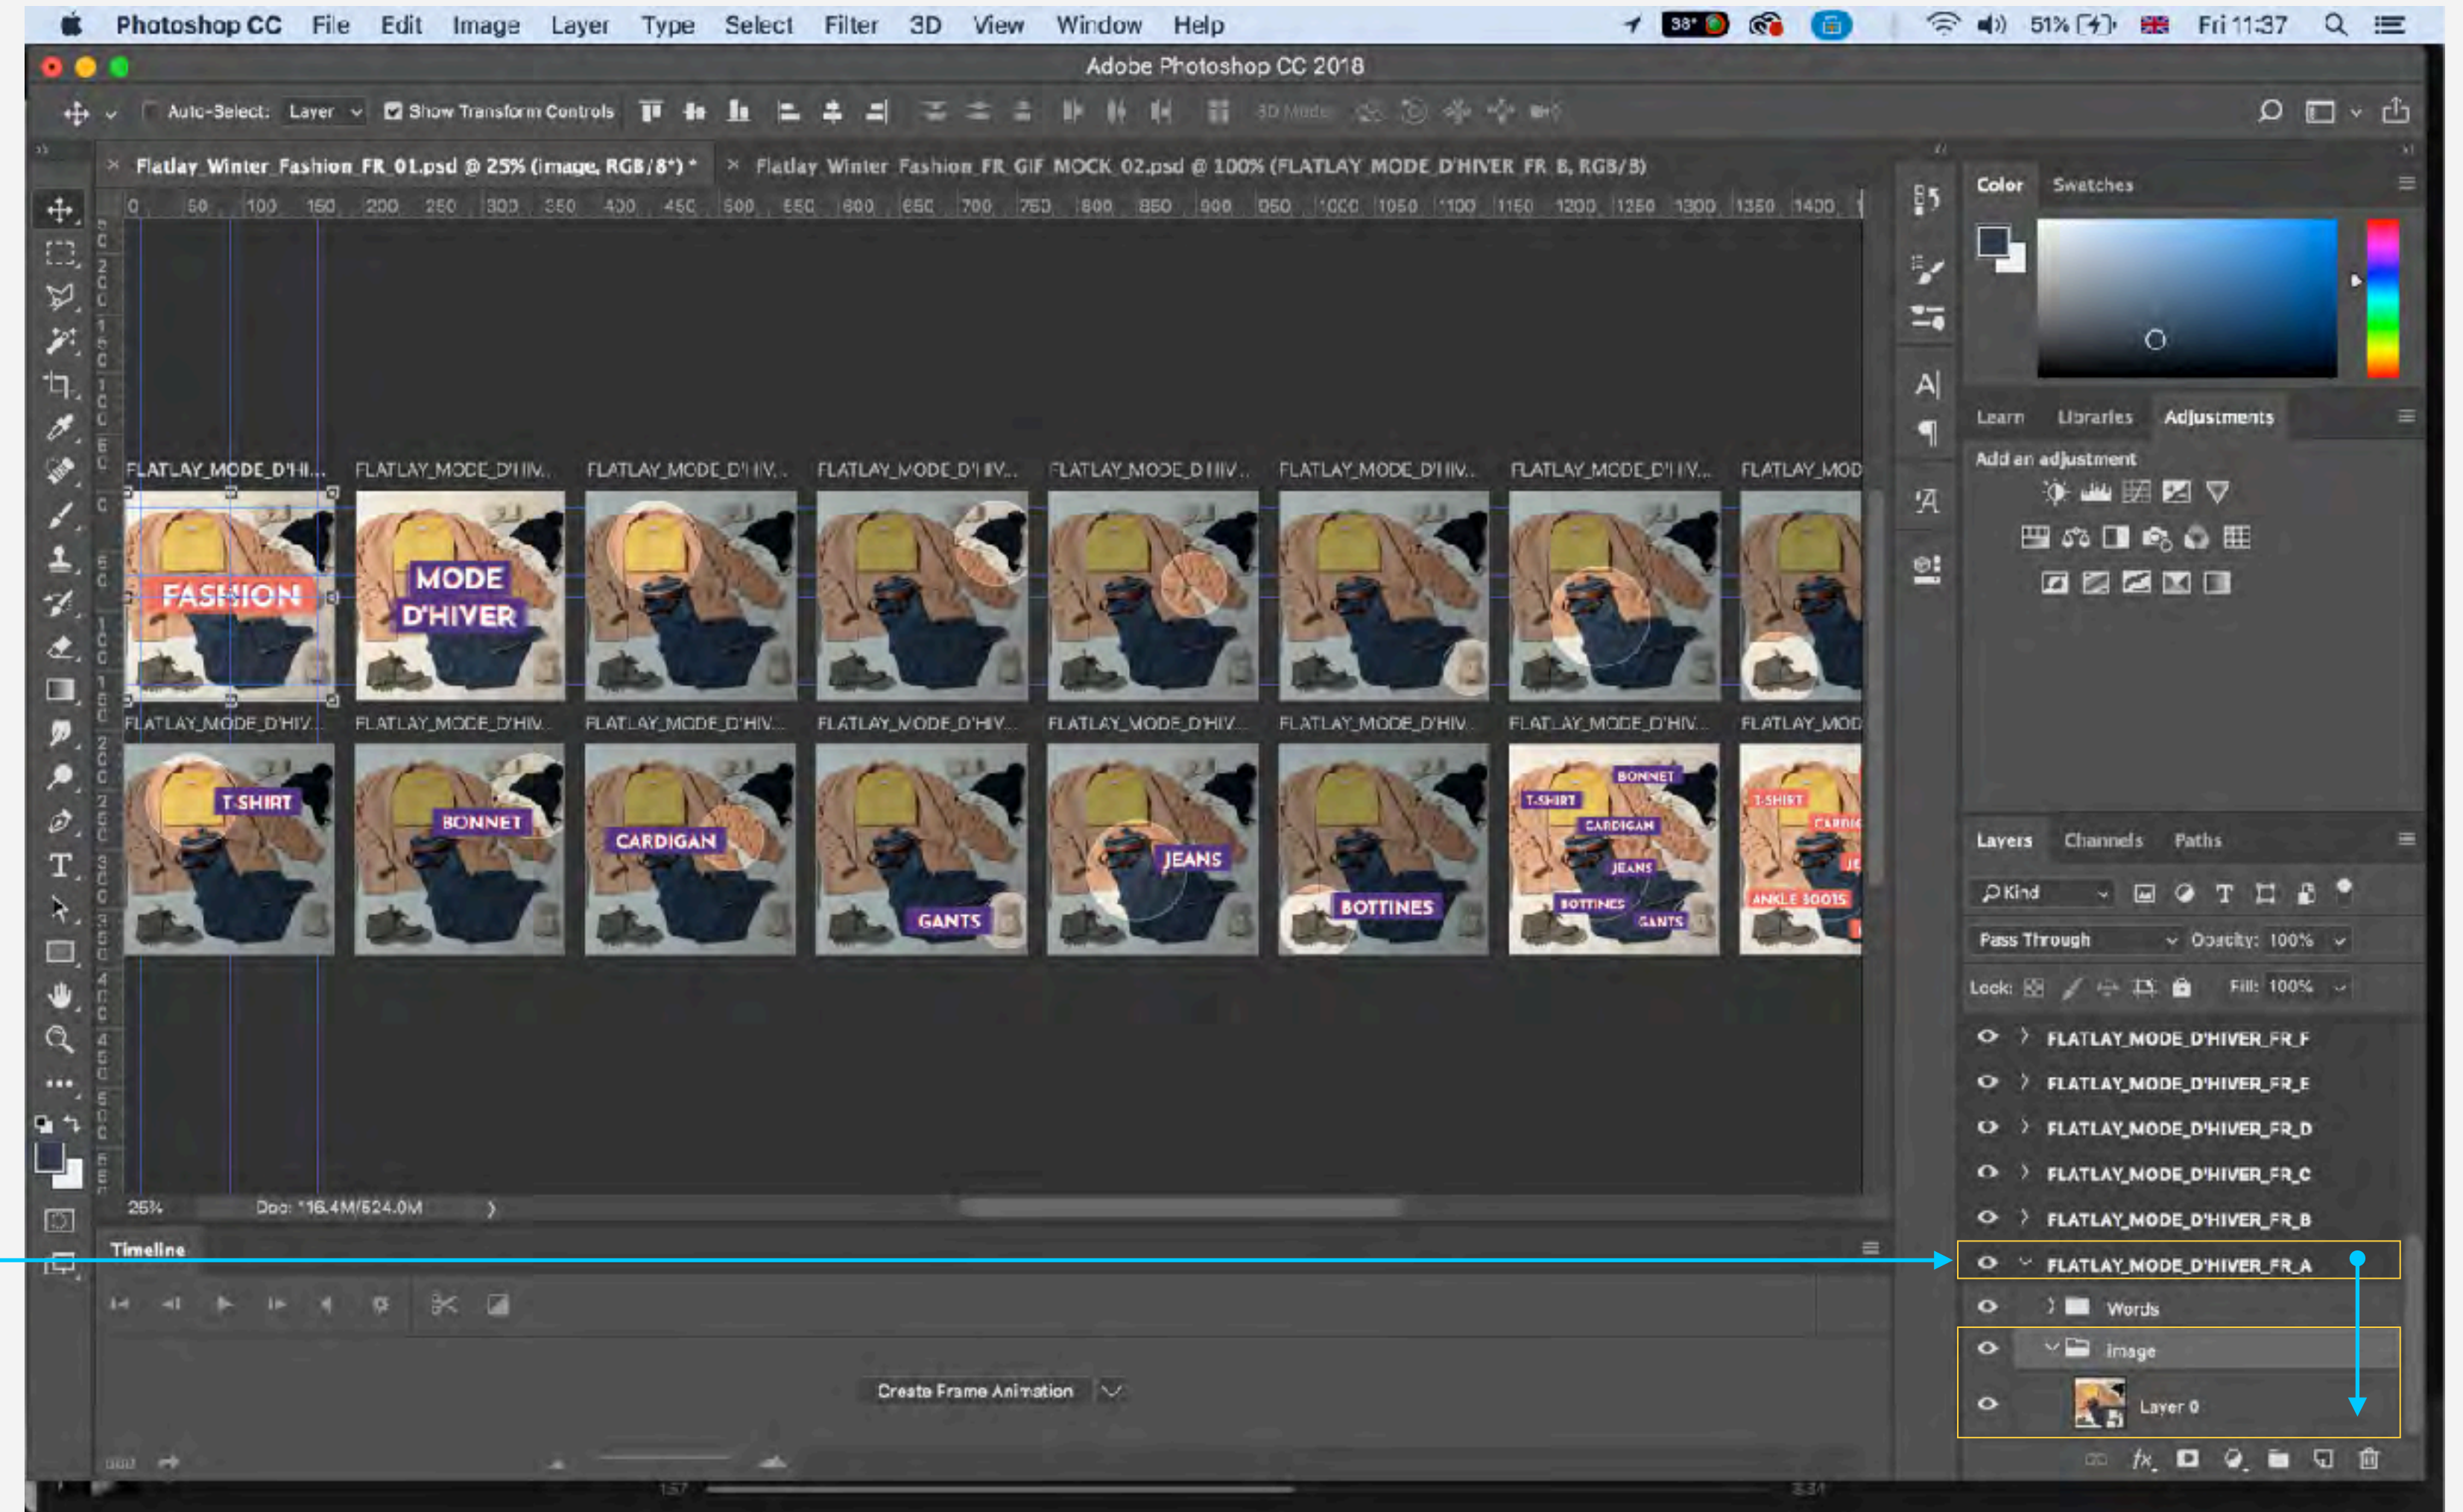

1. Type & Image Composition:

SMART OBJECT IMAGE REPLACEMENT

Go to any one of the image smart objects and double click to change. You just need to update one layer and the rest of the images in the file will update automatically across all the artboards.

1. Smart object image

Double click to change the flatlay image to new replacement

1. Type and image composition

FLATLAY TEMPLATE >

EDITING PSDS >

1. Type & Image Composition:

CHANGE WORDS & TYPE COLOUR HIGHLIGHT

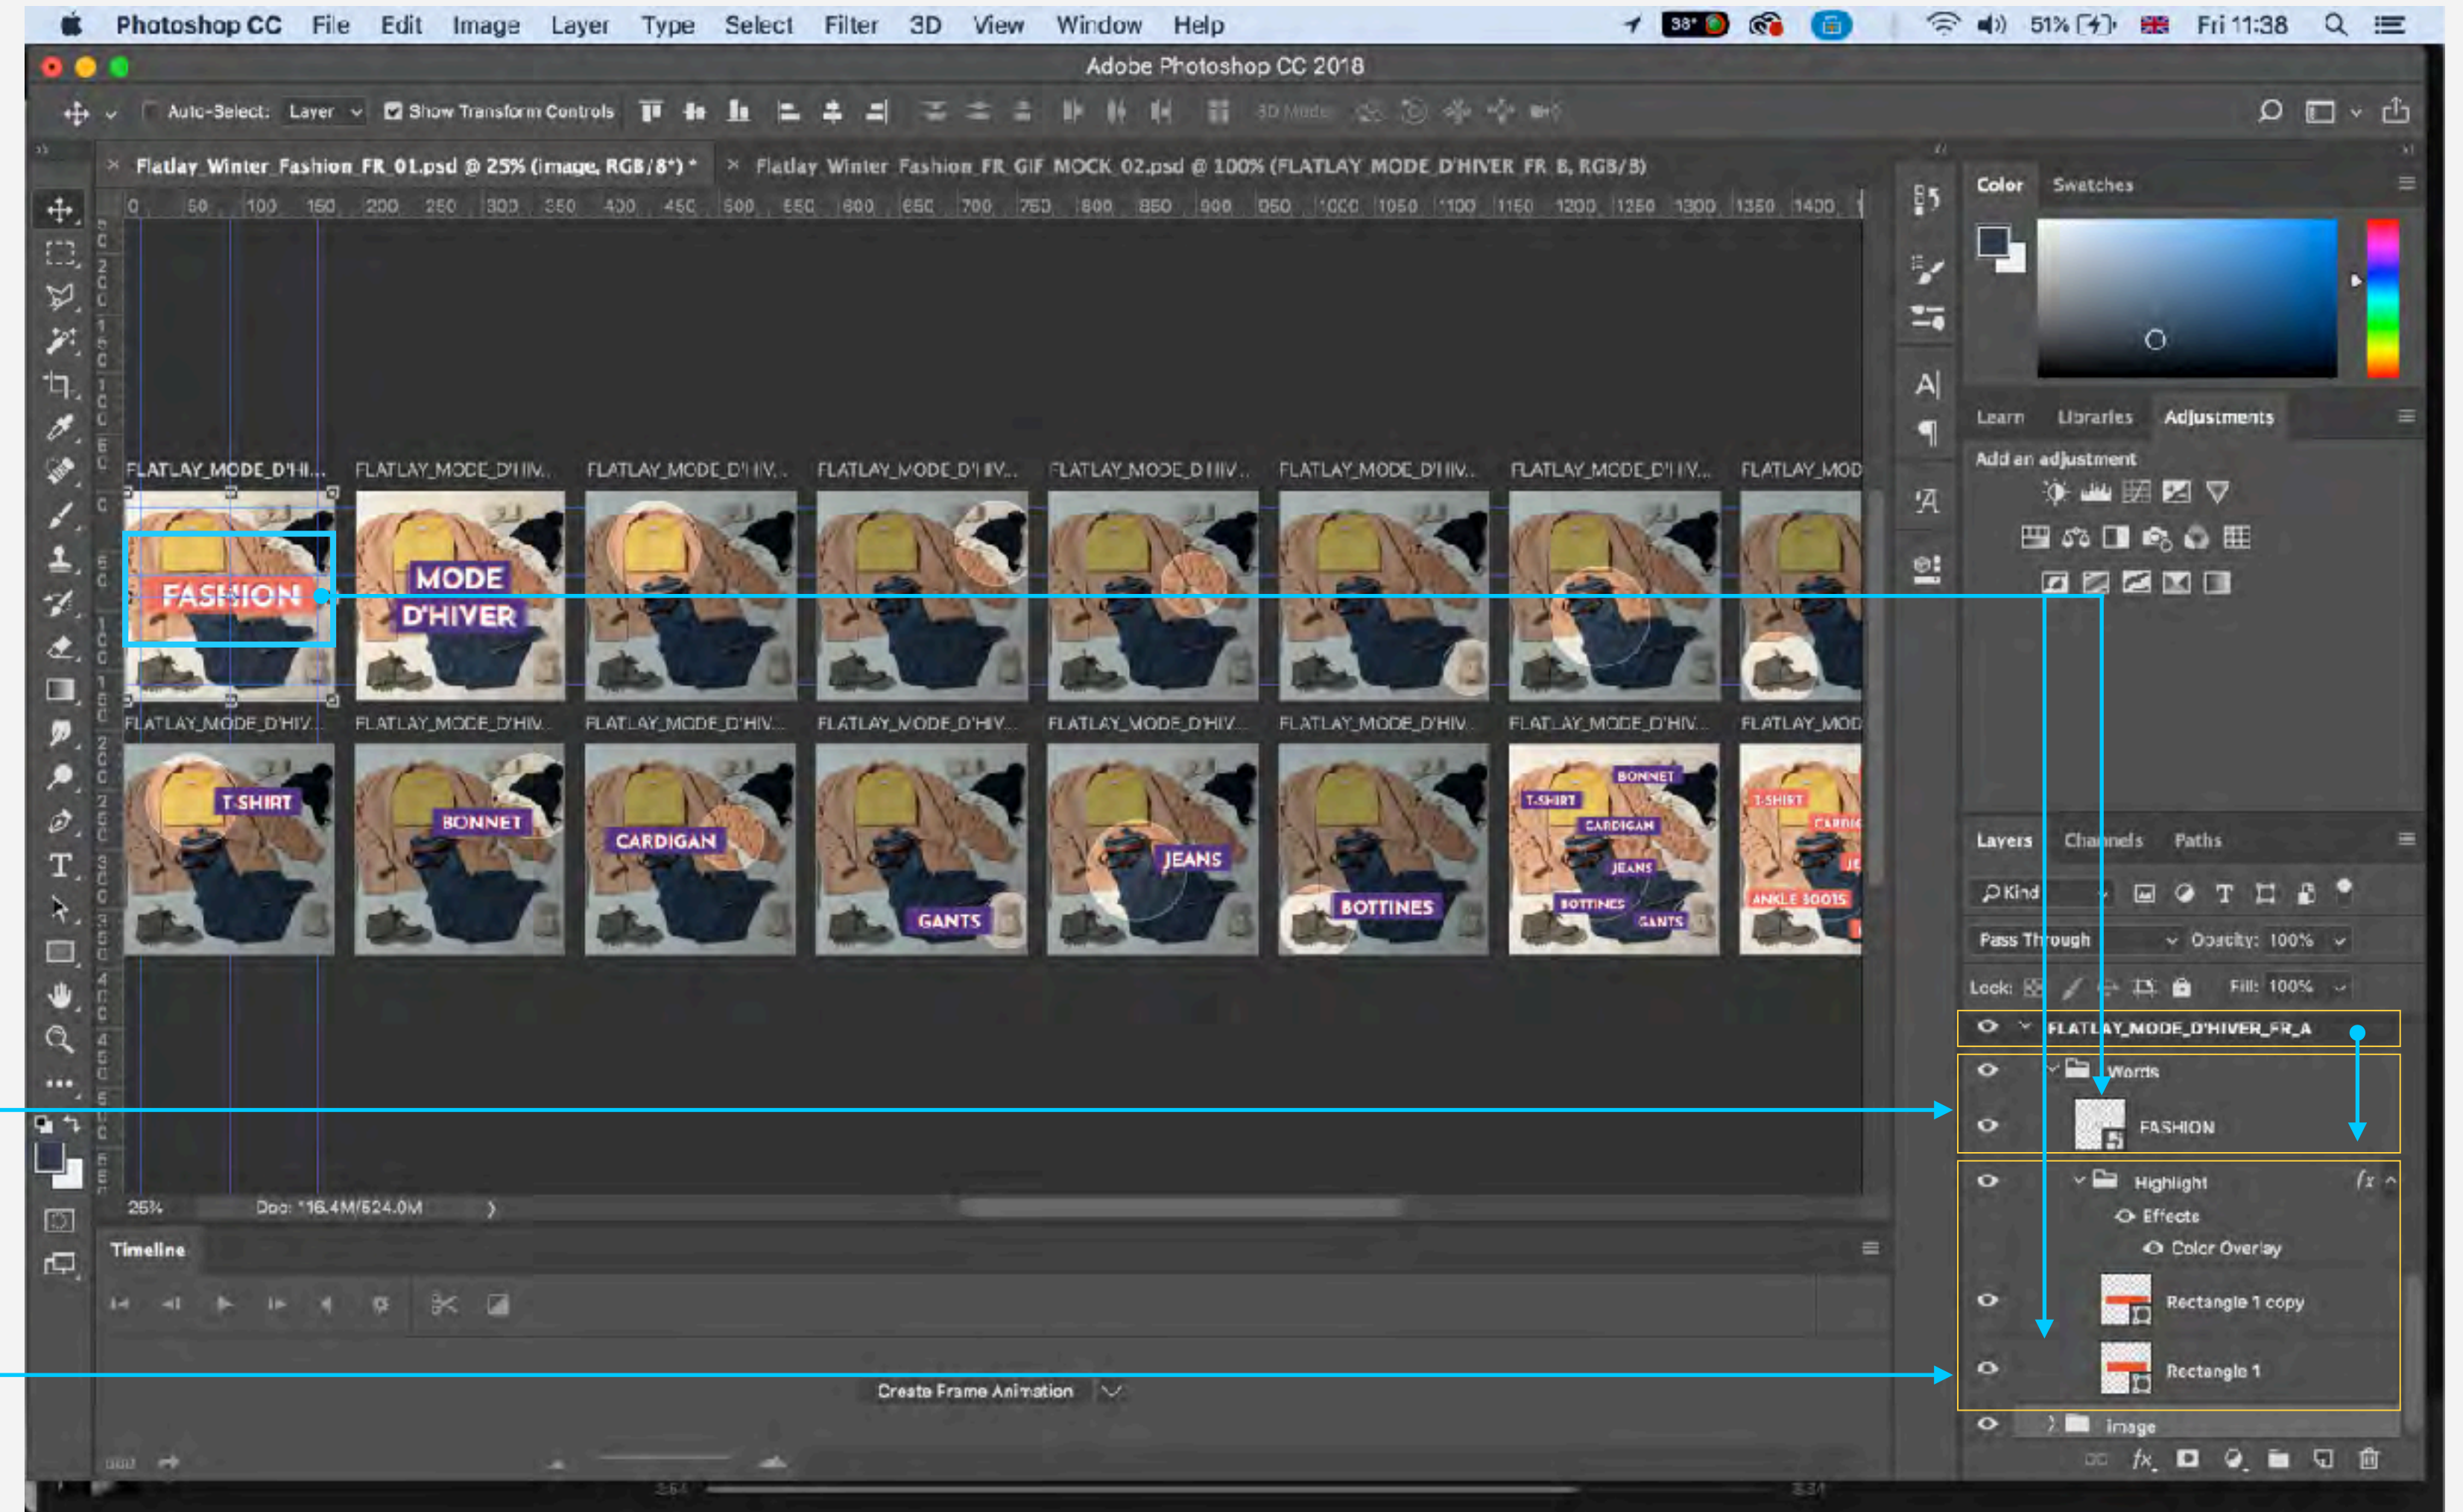

Update your words to now one by one by accessing the layer group 'Words'. And update type highlight colours to new theme colours.

2. Change words

Update words to new ones over your new image.

3. Word highlight

Change the colour of your highlight here nested in the words group.

1. Type and image composition

FLATLAY TEMPLATE >

EDITING PSDS >

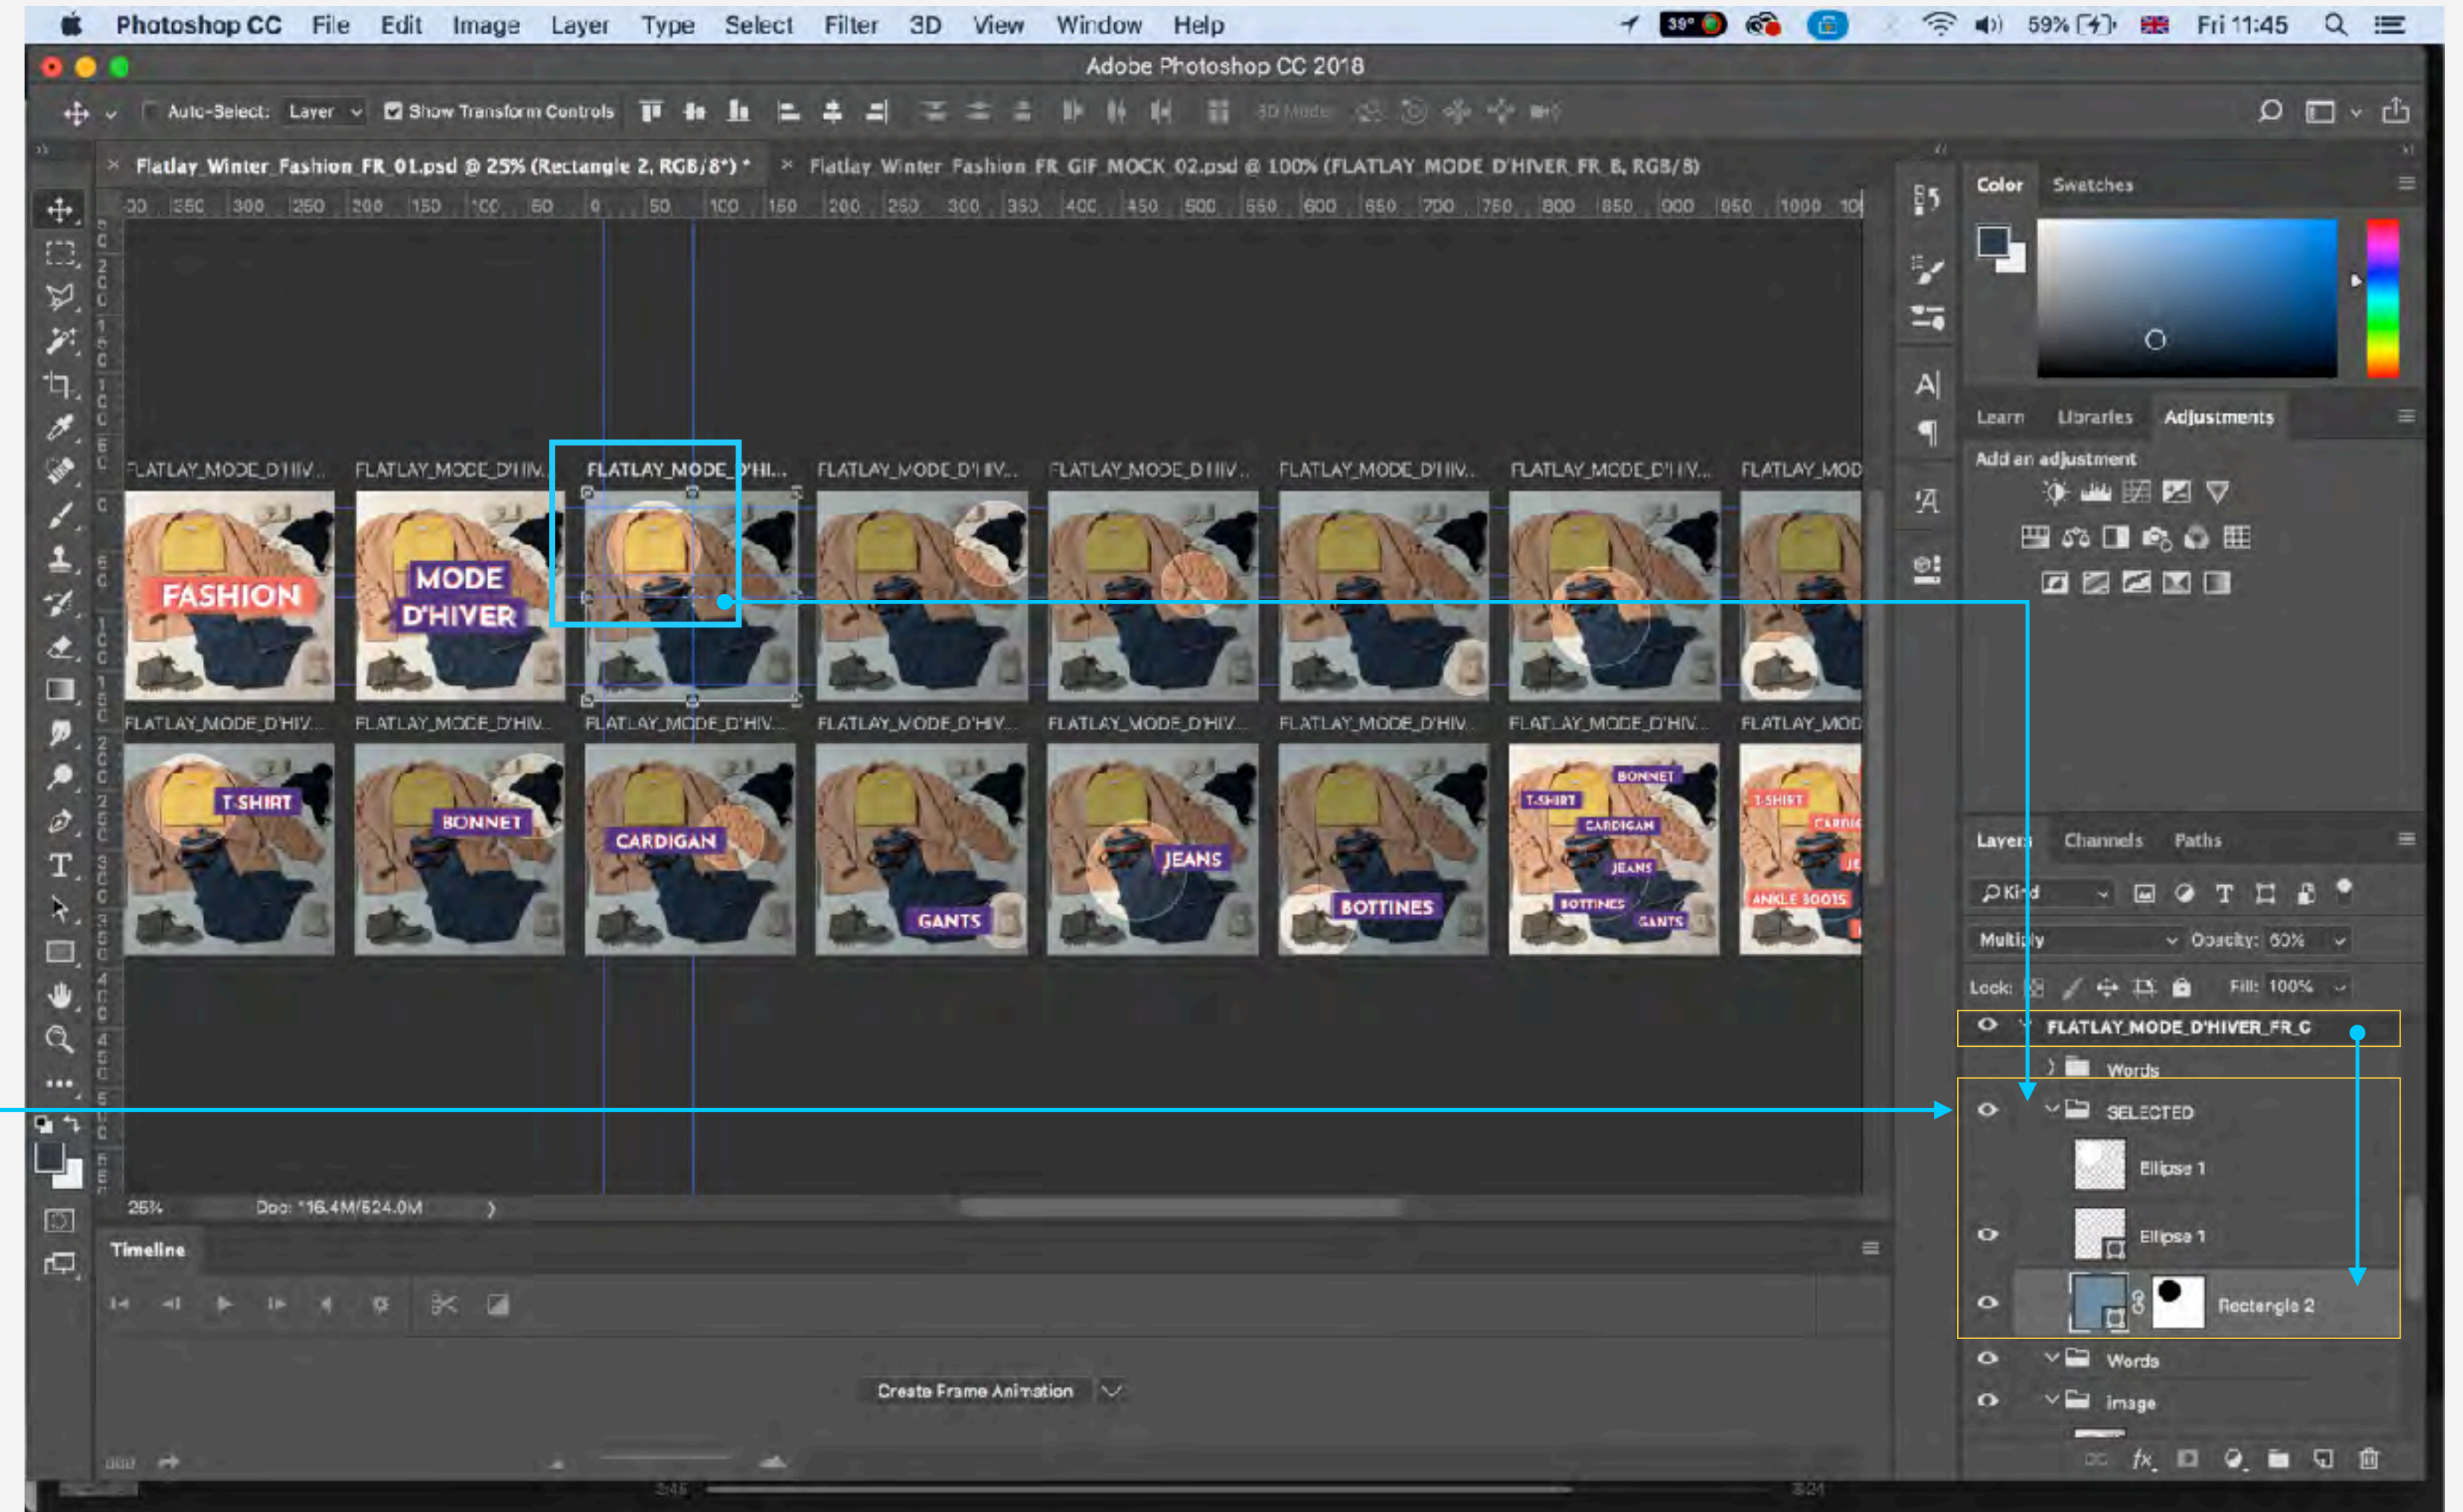

1. Type & Image Composition:

HIGHLIGHTING OBJECTS

Now go through each object and adjust the circles highlighting the objects. This are done with circle highlights created as mask on a colour overlay.

4. Highlighting objects

Adjust placement and selection og objects the 'selected' layer group.

1. Type and image composition

FLATLAY TEMPLATE >

EDITING PSDS >

2. Video PSD:

UPDATE VIDEO PSD:

For rendering the output file for publishing, open the video PSD, then update individually the contents by replacing each image layer by 'relinking' to your newly exported PNGs/Jpegs from your type and image composition PSD.

1. Import your exported image

Relink to file by right clicking on each image layer.

2. The video PSD

FLATLAY TEMPLATE >

EDITING PSDS >

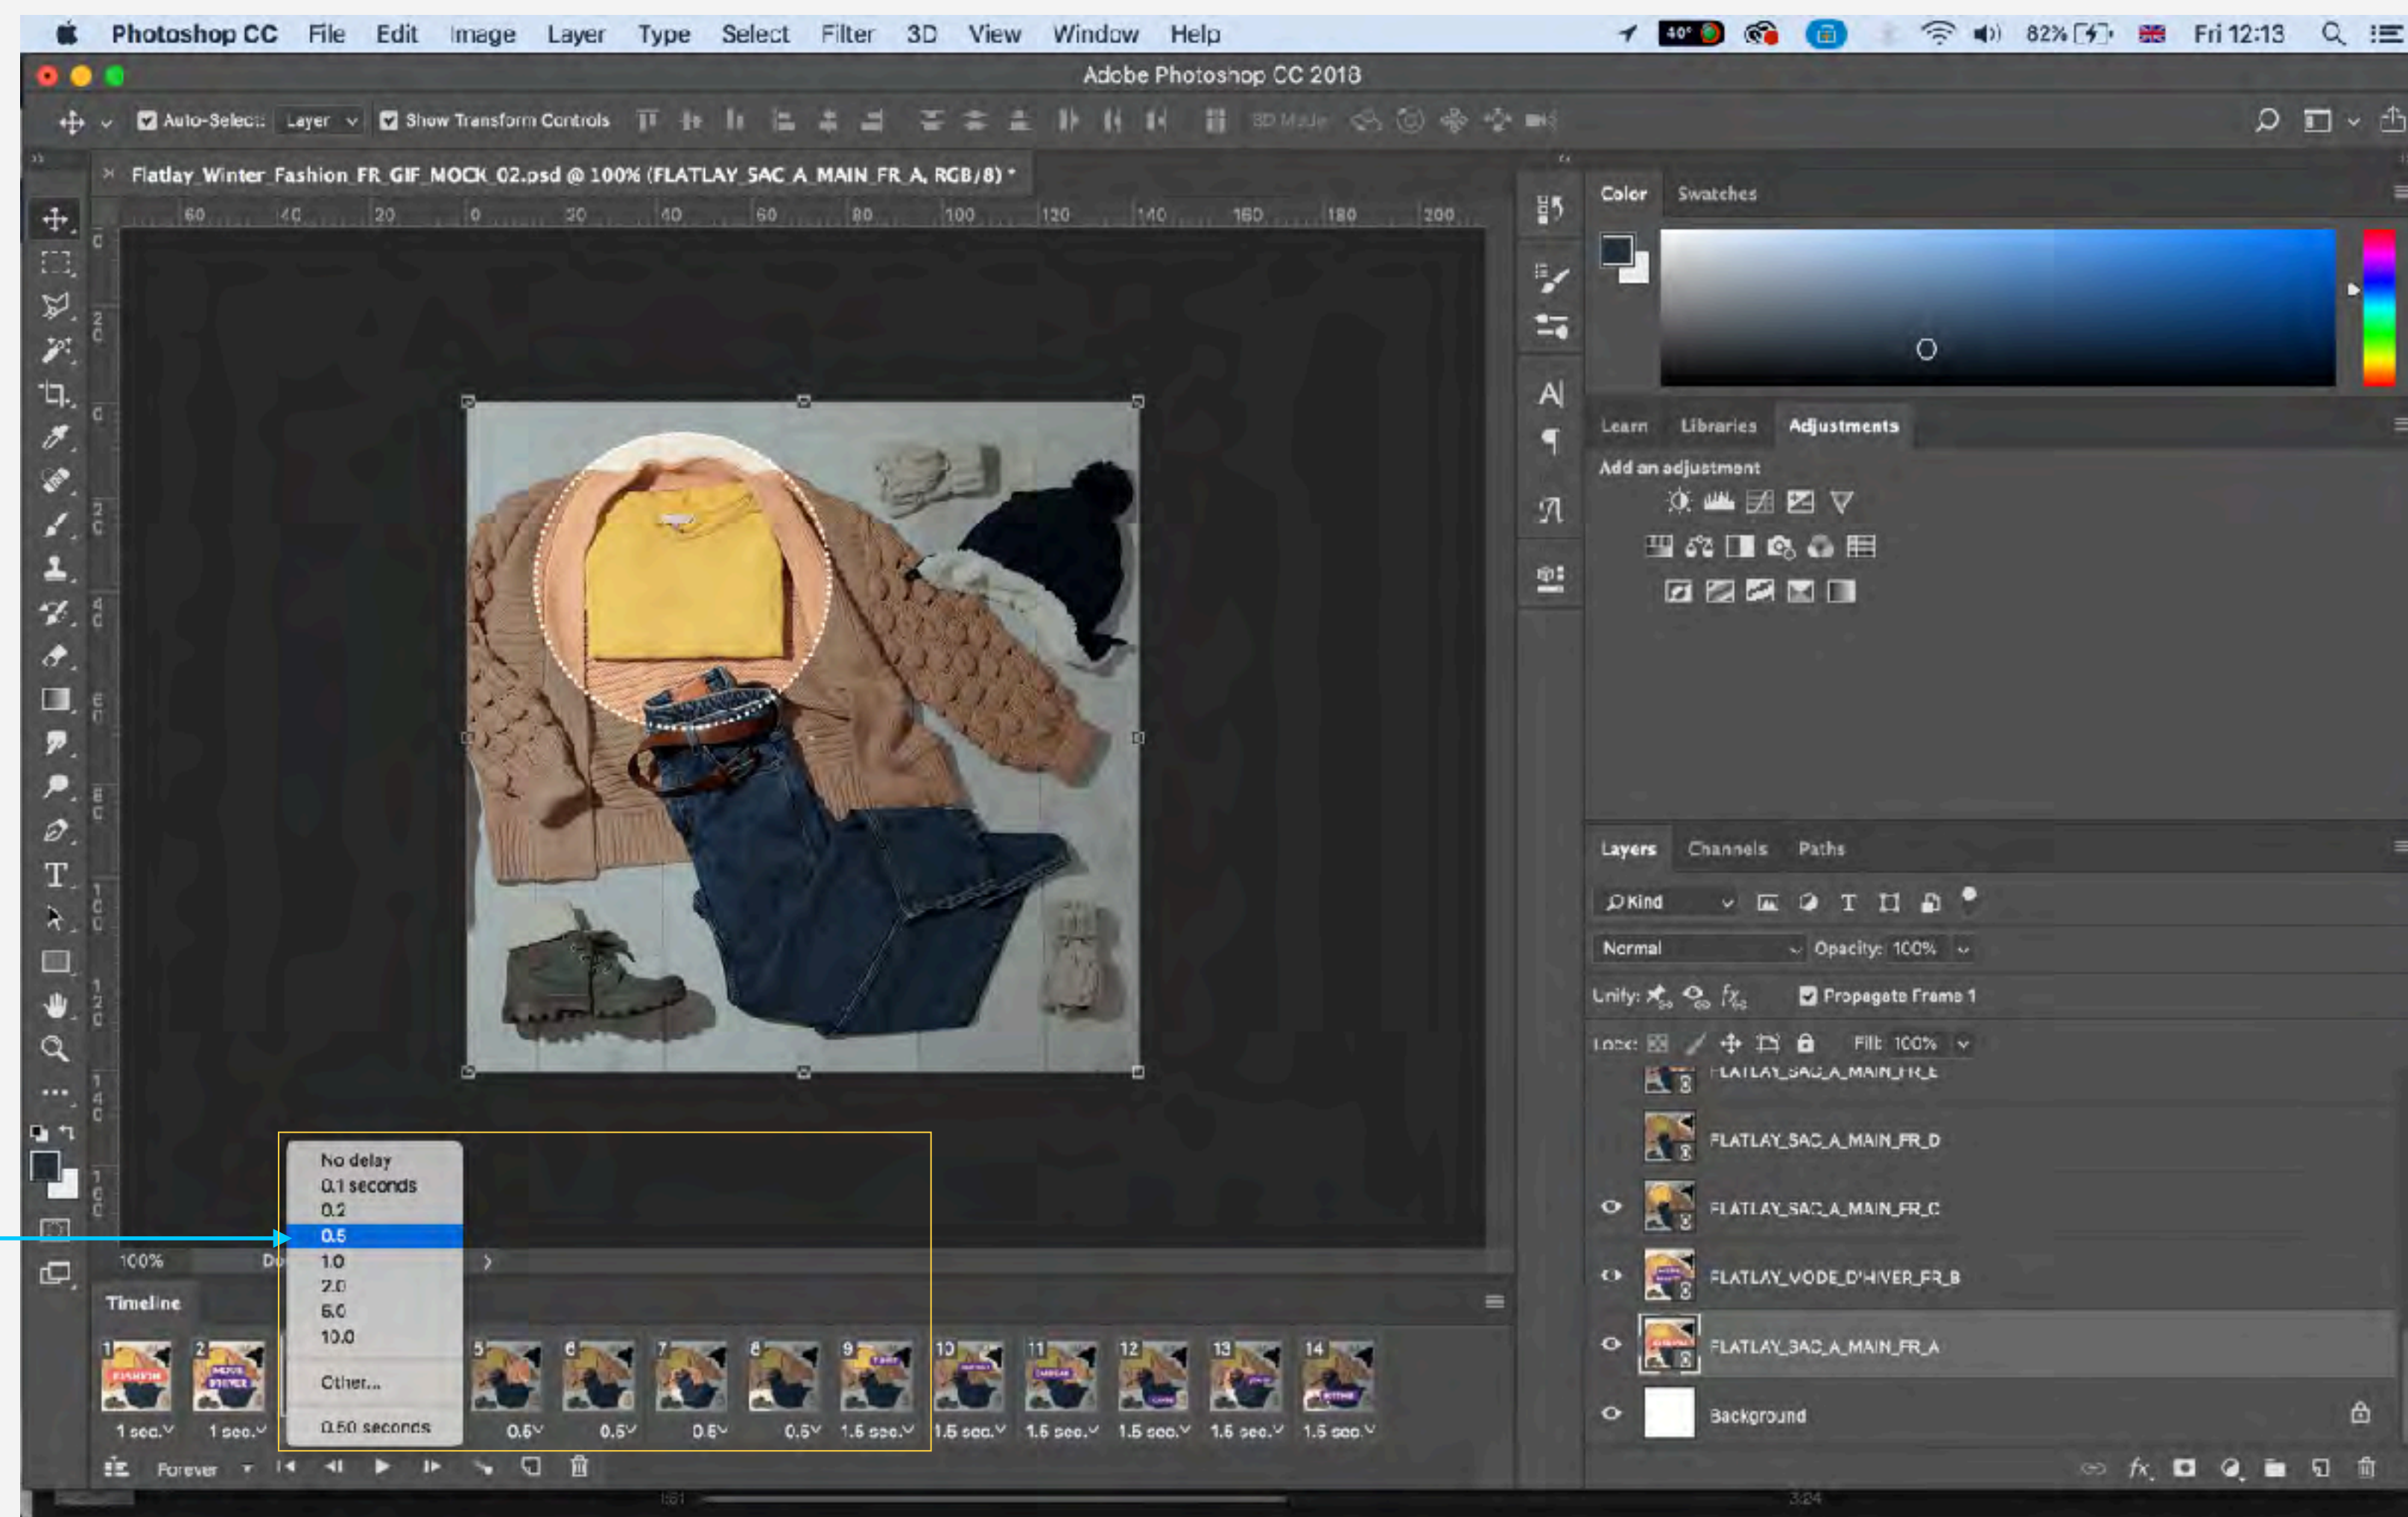

2. Video PSD:

CHECK TIMELINE TIMINGS:

Adjust the timing on each frame so they correlate to the timings as shown in the walk-through of this guide in the previous pages.

2. Adjust frame time

Go through each frame on the timeline to adjust timings per frame are correct.

2. The video PSD

FLATLAY TEMPLATE >

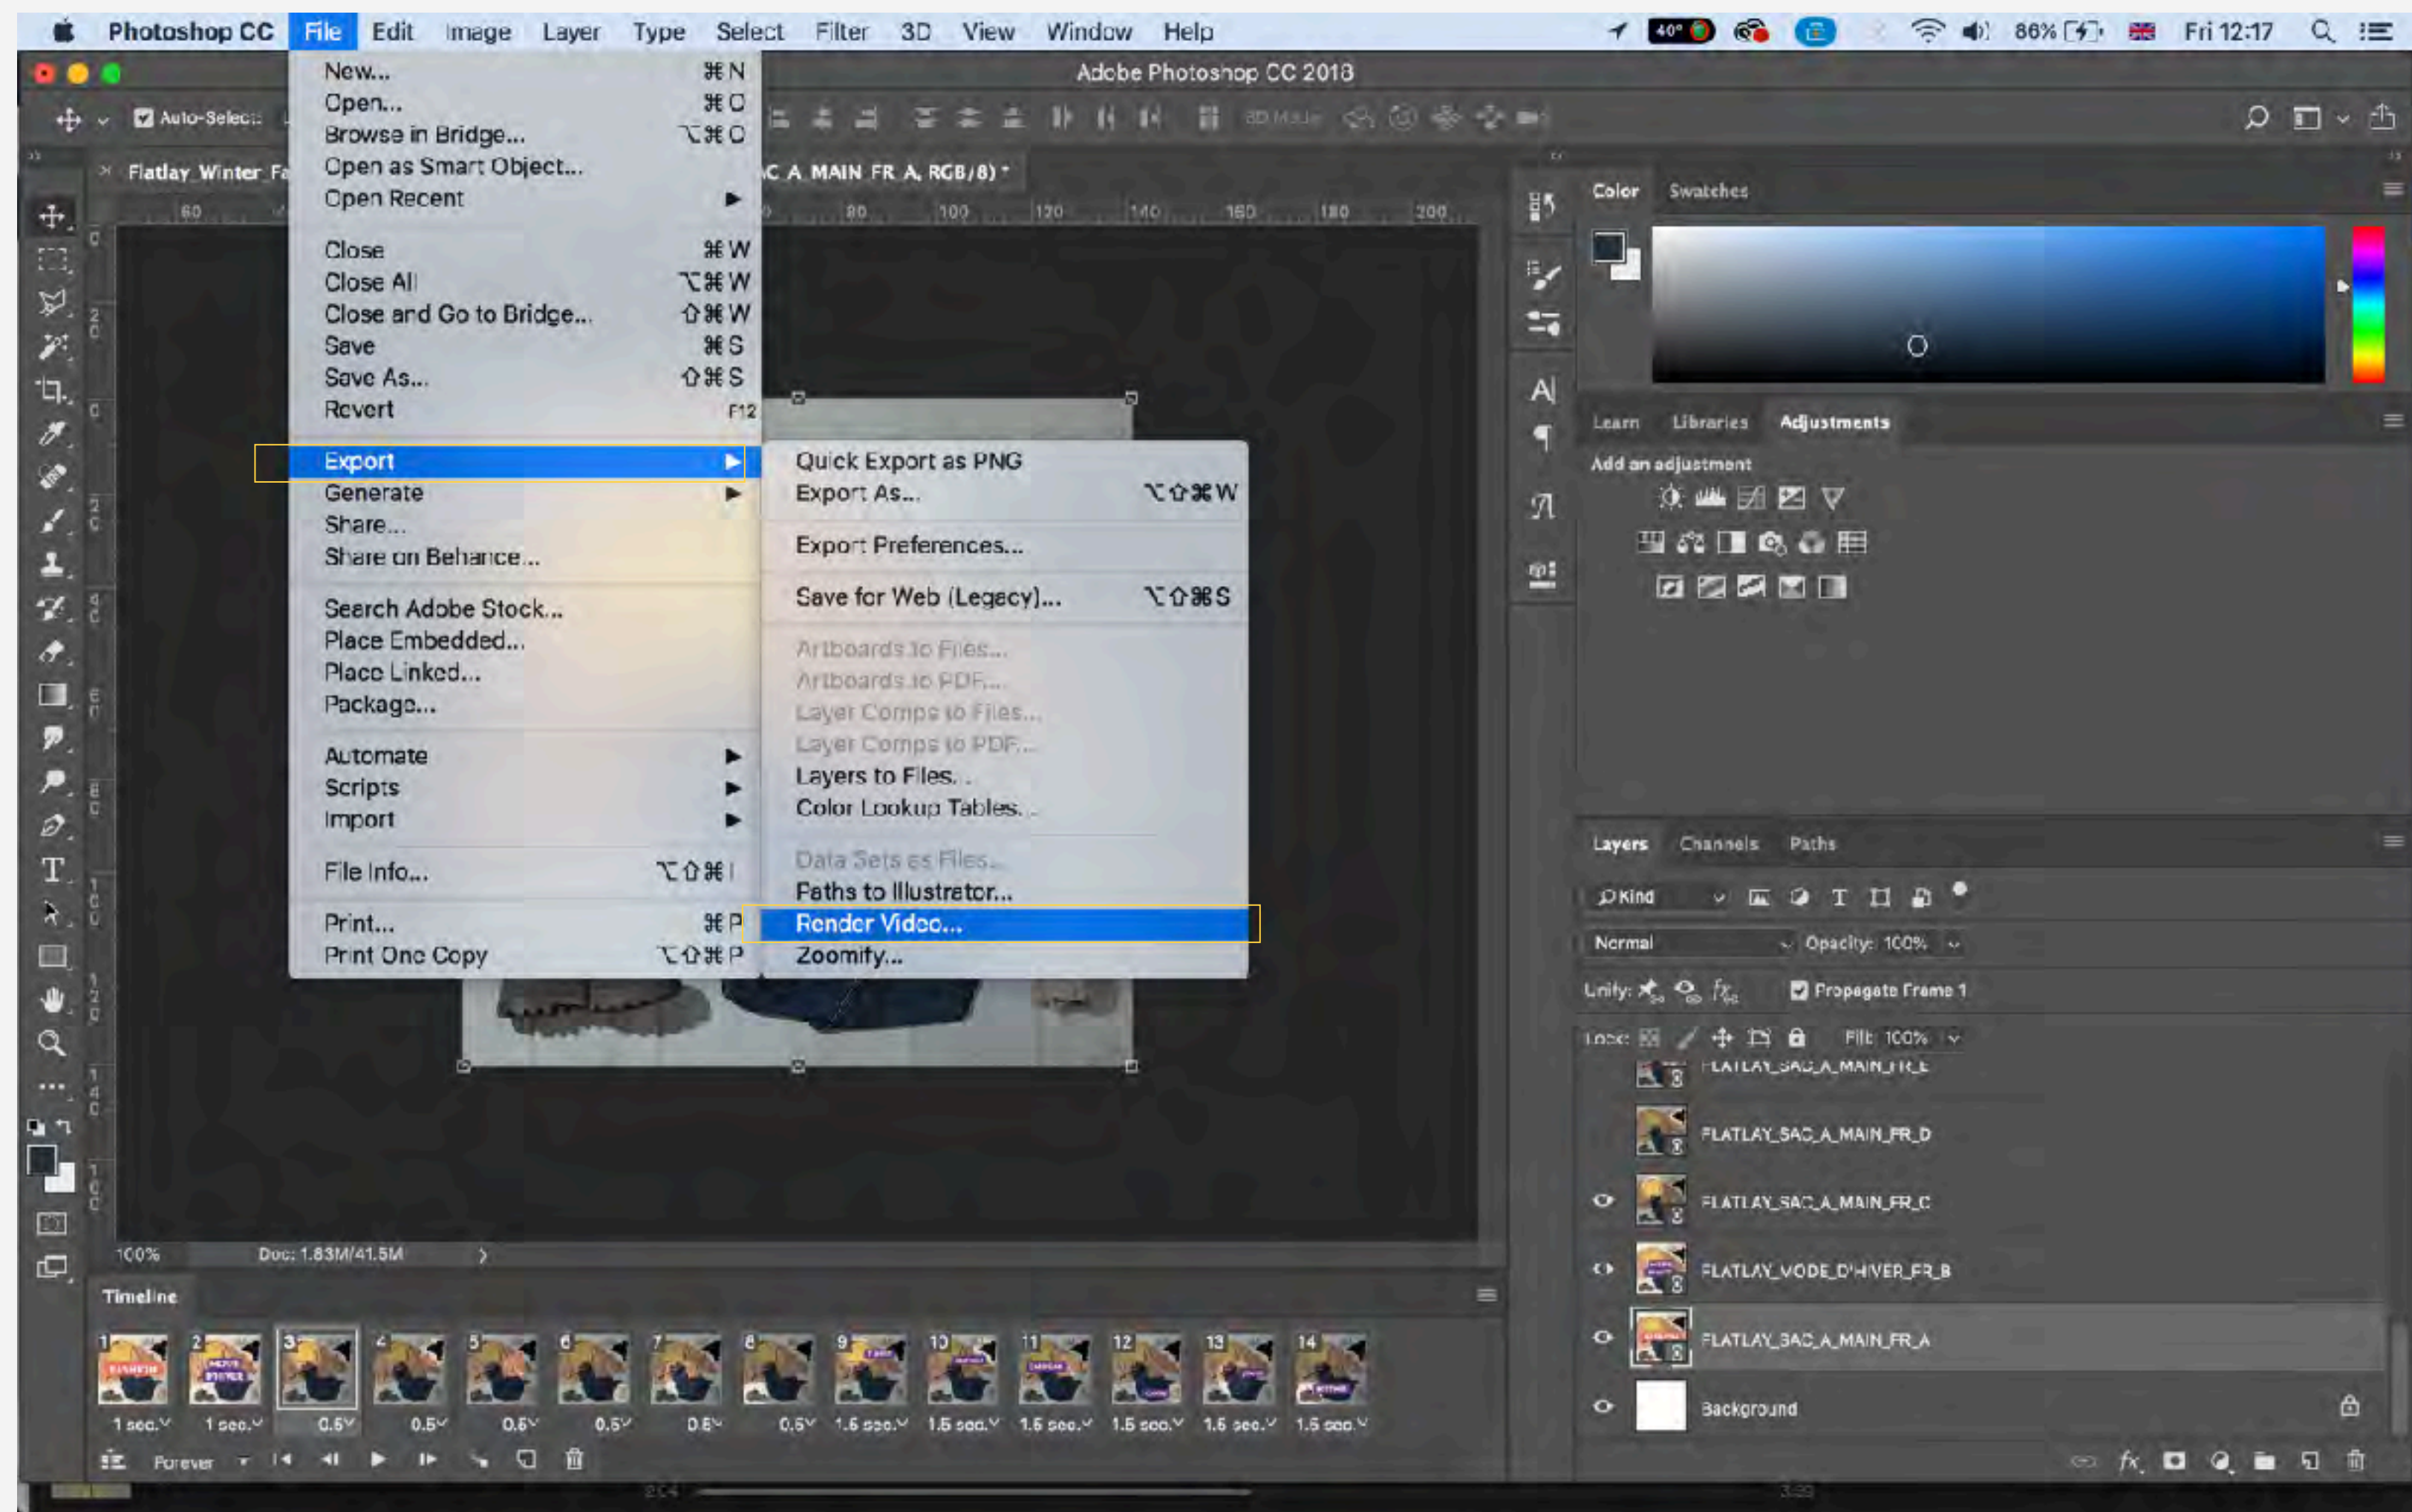

EDITING PSDS >

2. Video PSD:

RENDERING VIDEO FOR OUTPUT:

Once all is finalised in the editing. Go to file > Export > Render video.

Export to a size suitable for online viewing.

2. The video PSD

TYPEADJECTIVE

Combining witty typographic executions and playful use of IG formats to land the meaning of different adjectives.

TYPEADJECTIVES TEMPLATE >

WALK-THROUGH >

Typeadjectives are formatted for insta/FB carousels. There are usually 3 words that are designed to visually play on the meanings of the adjectives, using typography and simple illustrations, when appearing sequentially makes the post appear connected when swiping through them:

HOW TO CREATE TYPEADJECTIVES:

1. You choose a theme for the target language, i.e: fun words in Spanish related to being drunk. See example on the right.
2. Decide theme colour and adjectives
3. Create the word translations in the target language using the PSD template
4. Output JPEGs for publishing on Instagram or Facebook.

TYPEADJECTIVES TEMPLATE >

WALK-THROUGH >

The fundamental elements for this particular Typeadjective:

TARGET LANGUAGE:

English speaking learning Spanish

THEME:

Words related to being drunk

NUMBER OF ADJECTIVES :

3

POST COLOURS & PATTERNS :

#C72B70

#E4E9F4

B, Dots

TYPEADJECTIVES TEMPLATE >

EDITING PSDS >

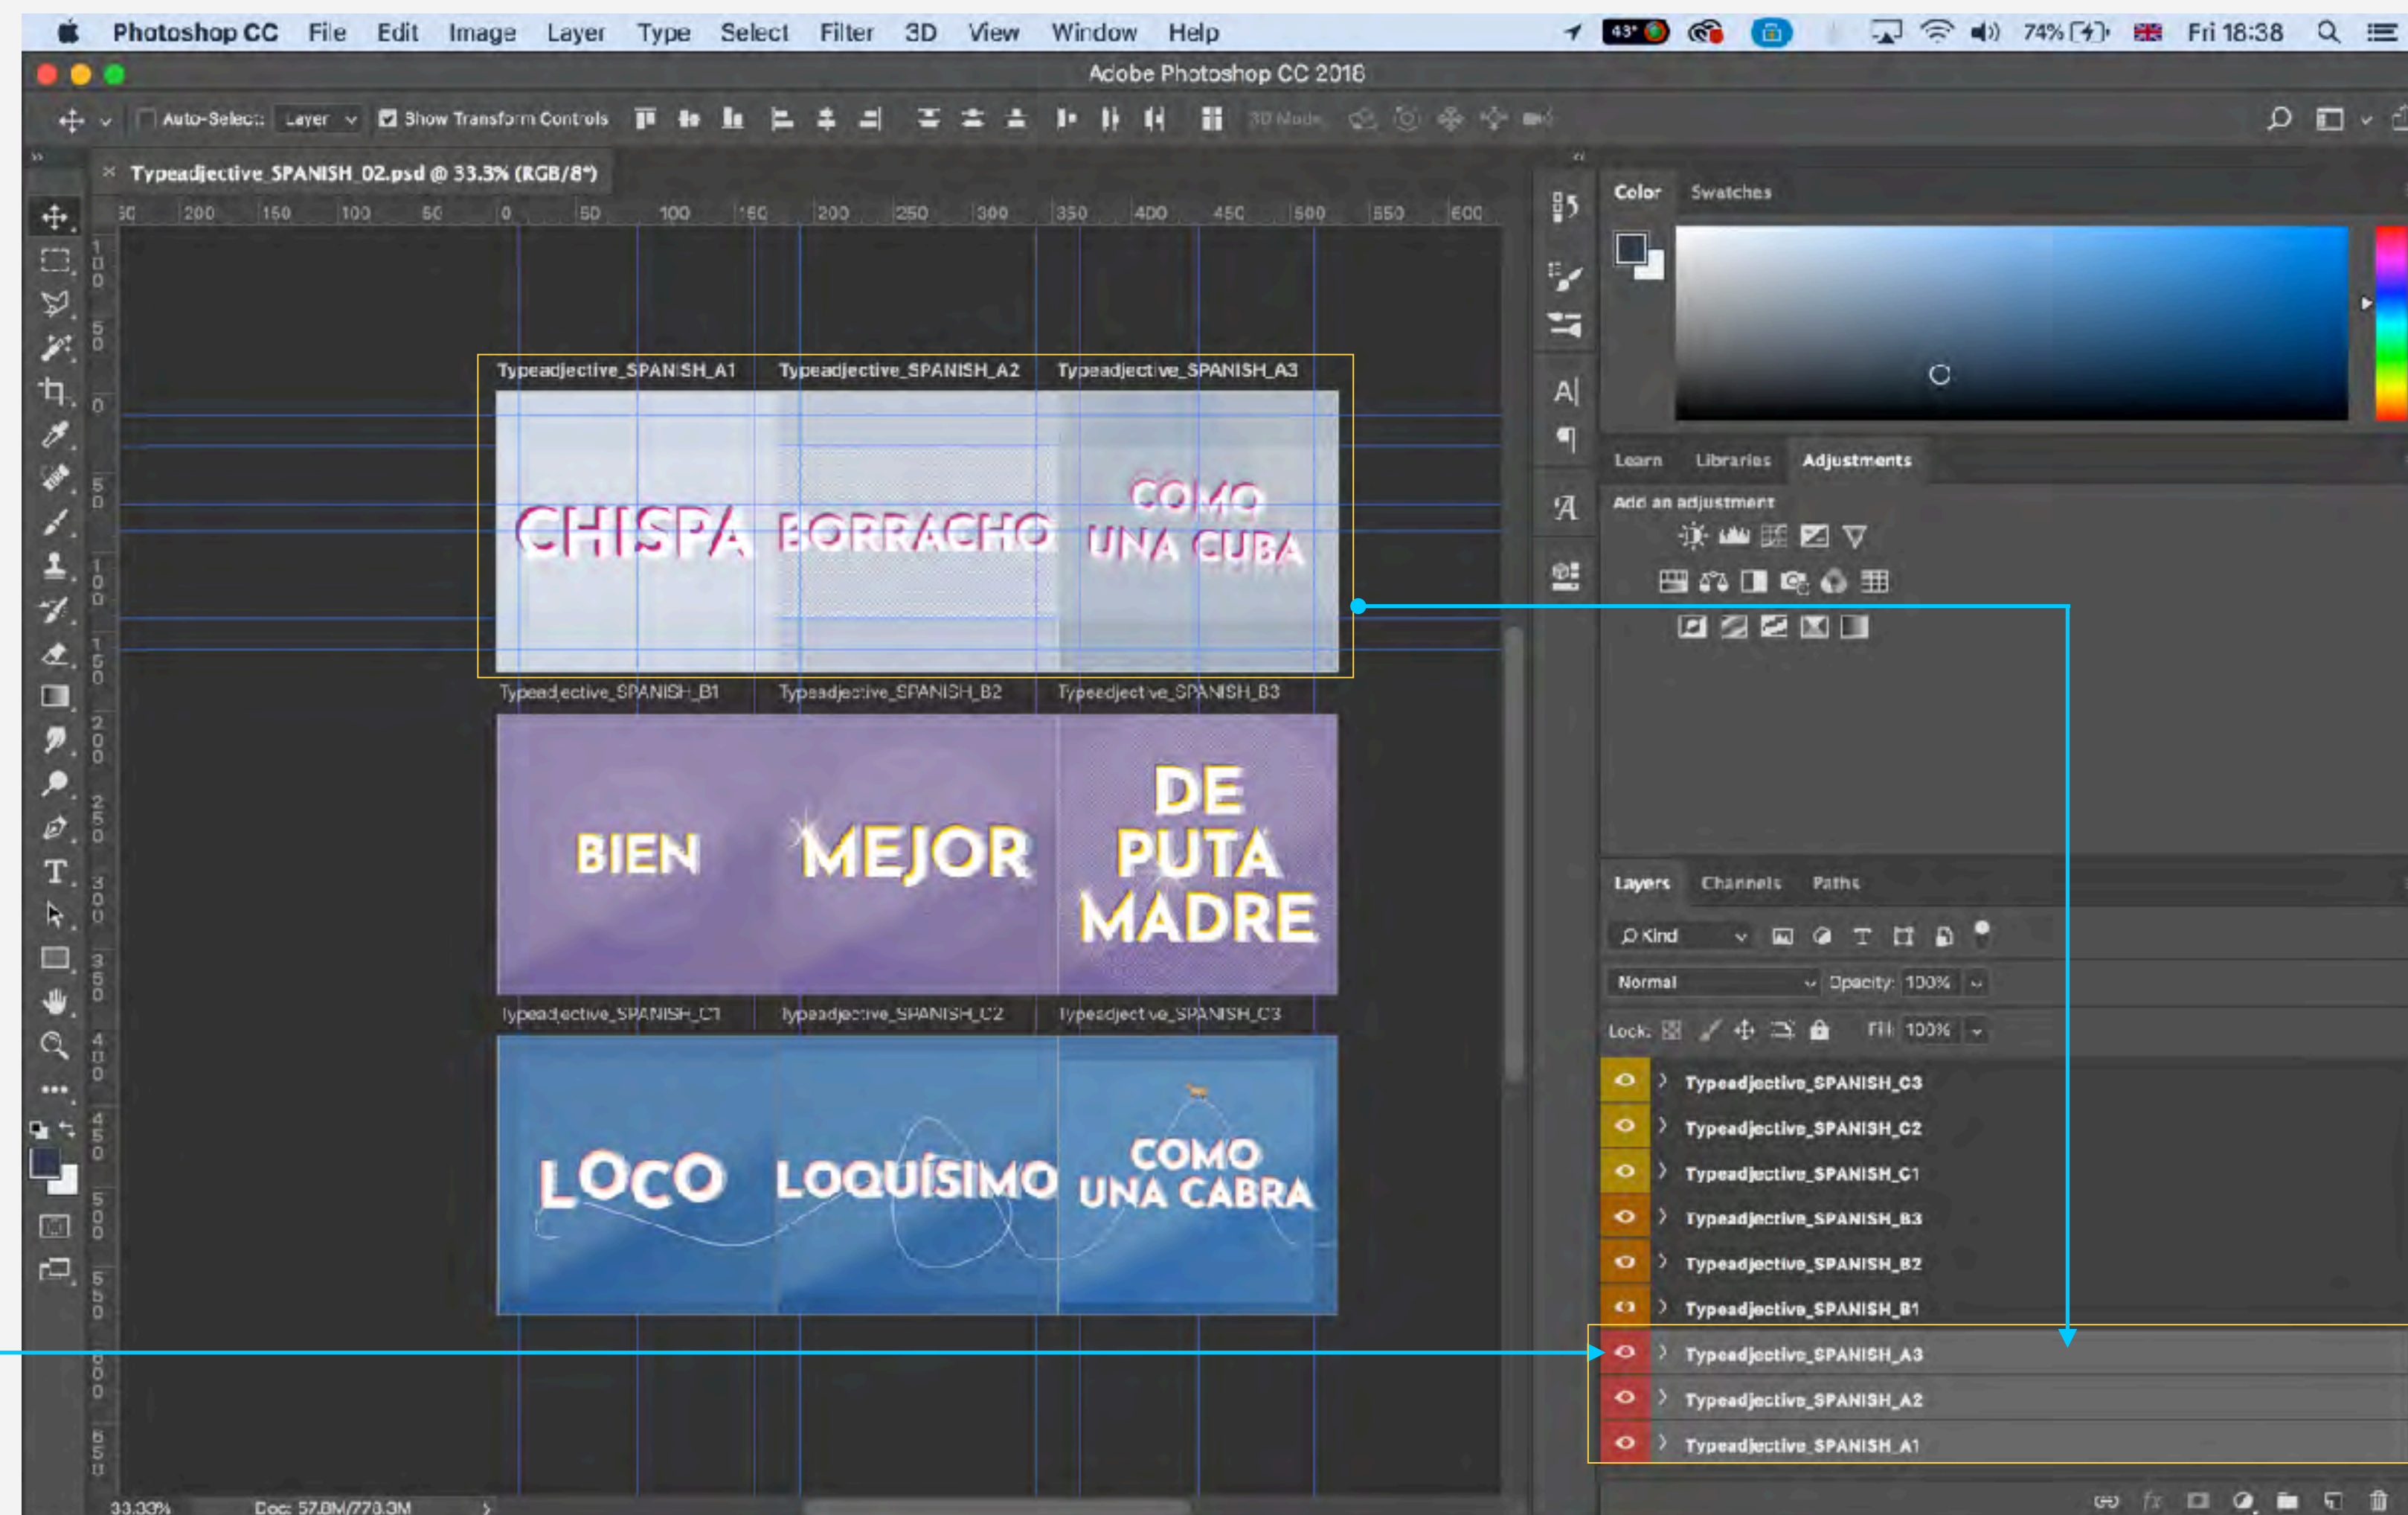

1. PSD Setup

You'll see that the typeadjectives are arranged in artboards in sets of 3. Delete any artboards that are not needed.

PSD File: **D_OT_02_SP_01_EN**
Available upon request.

1. Artboards sets of 3

This is a set of typeadjectives.

TYPEADJECTIVES TEMPLATE >

EDITING PSDS >

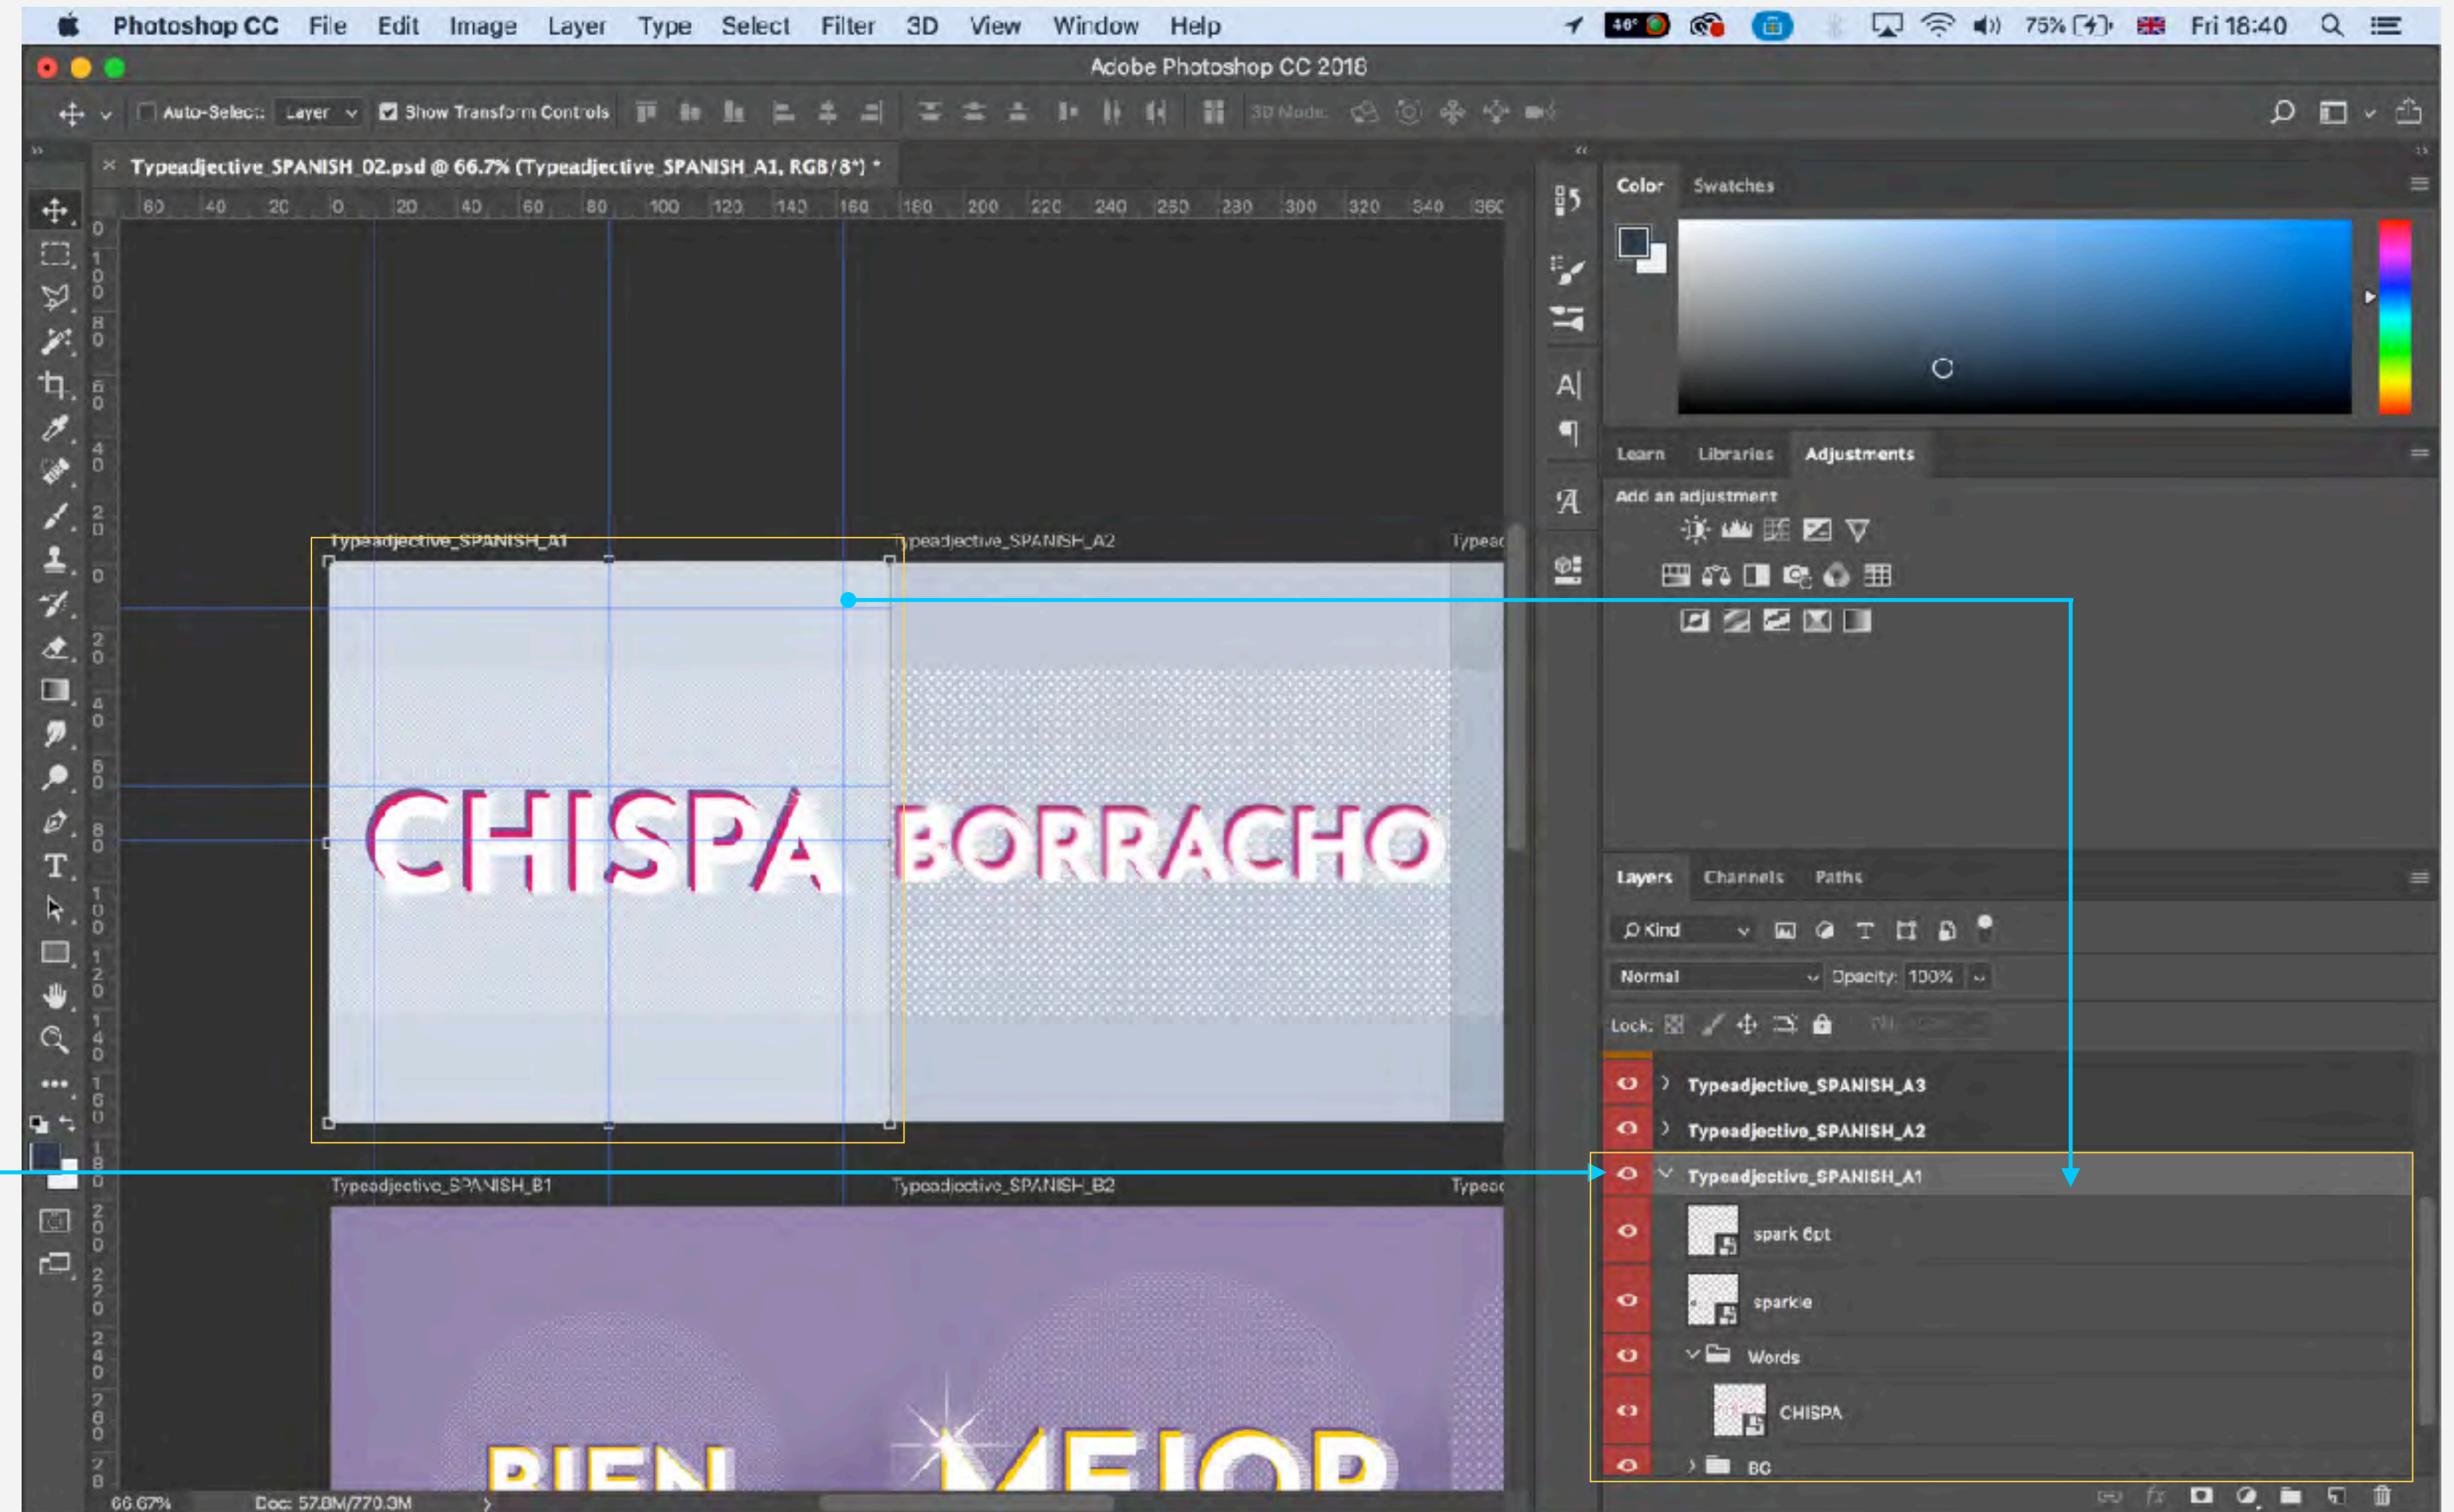

2. EDITING THE TEMPLATE:

As the Typeadjective assets are all different, it requires illustration creation and typographic arrangement bespoke to each Typeadjective concept.

This will require some design thought and creation. So everything will change accordingly to the concept. But the templates contain all the fundamental elements that are required to create new typeadjectives.

2. Editing artboards

Your artboards contain type/word smart objects and background colour with texture.

DICTIONARY SLANG

We take the most popular slang words from a country and break down their meaning with a definition and etymology.

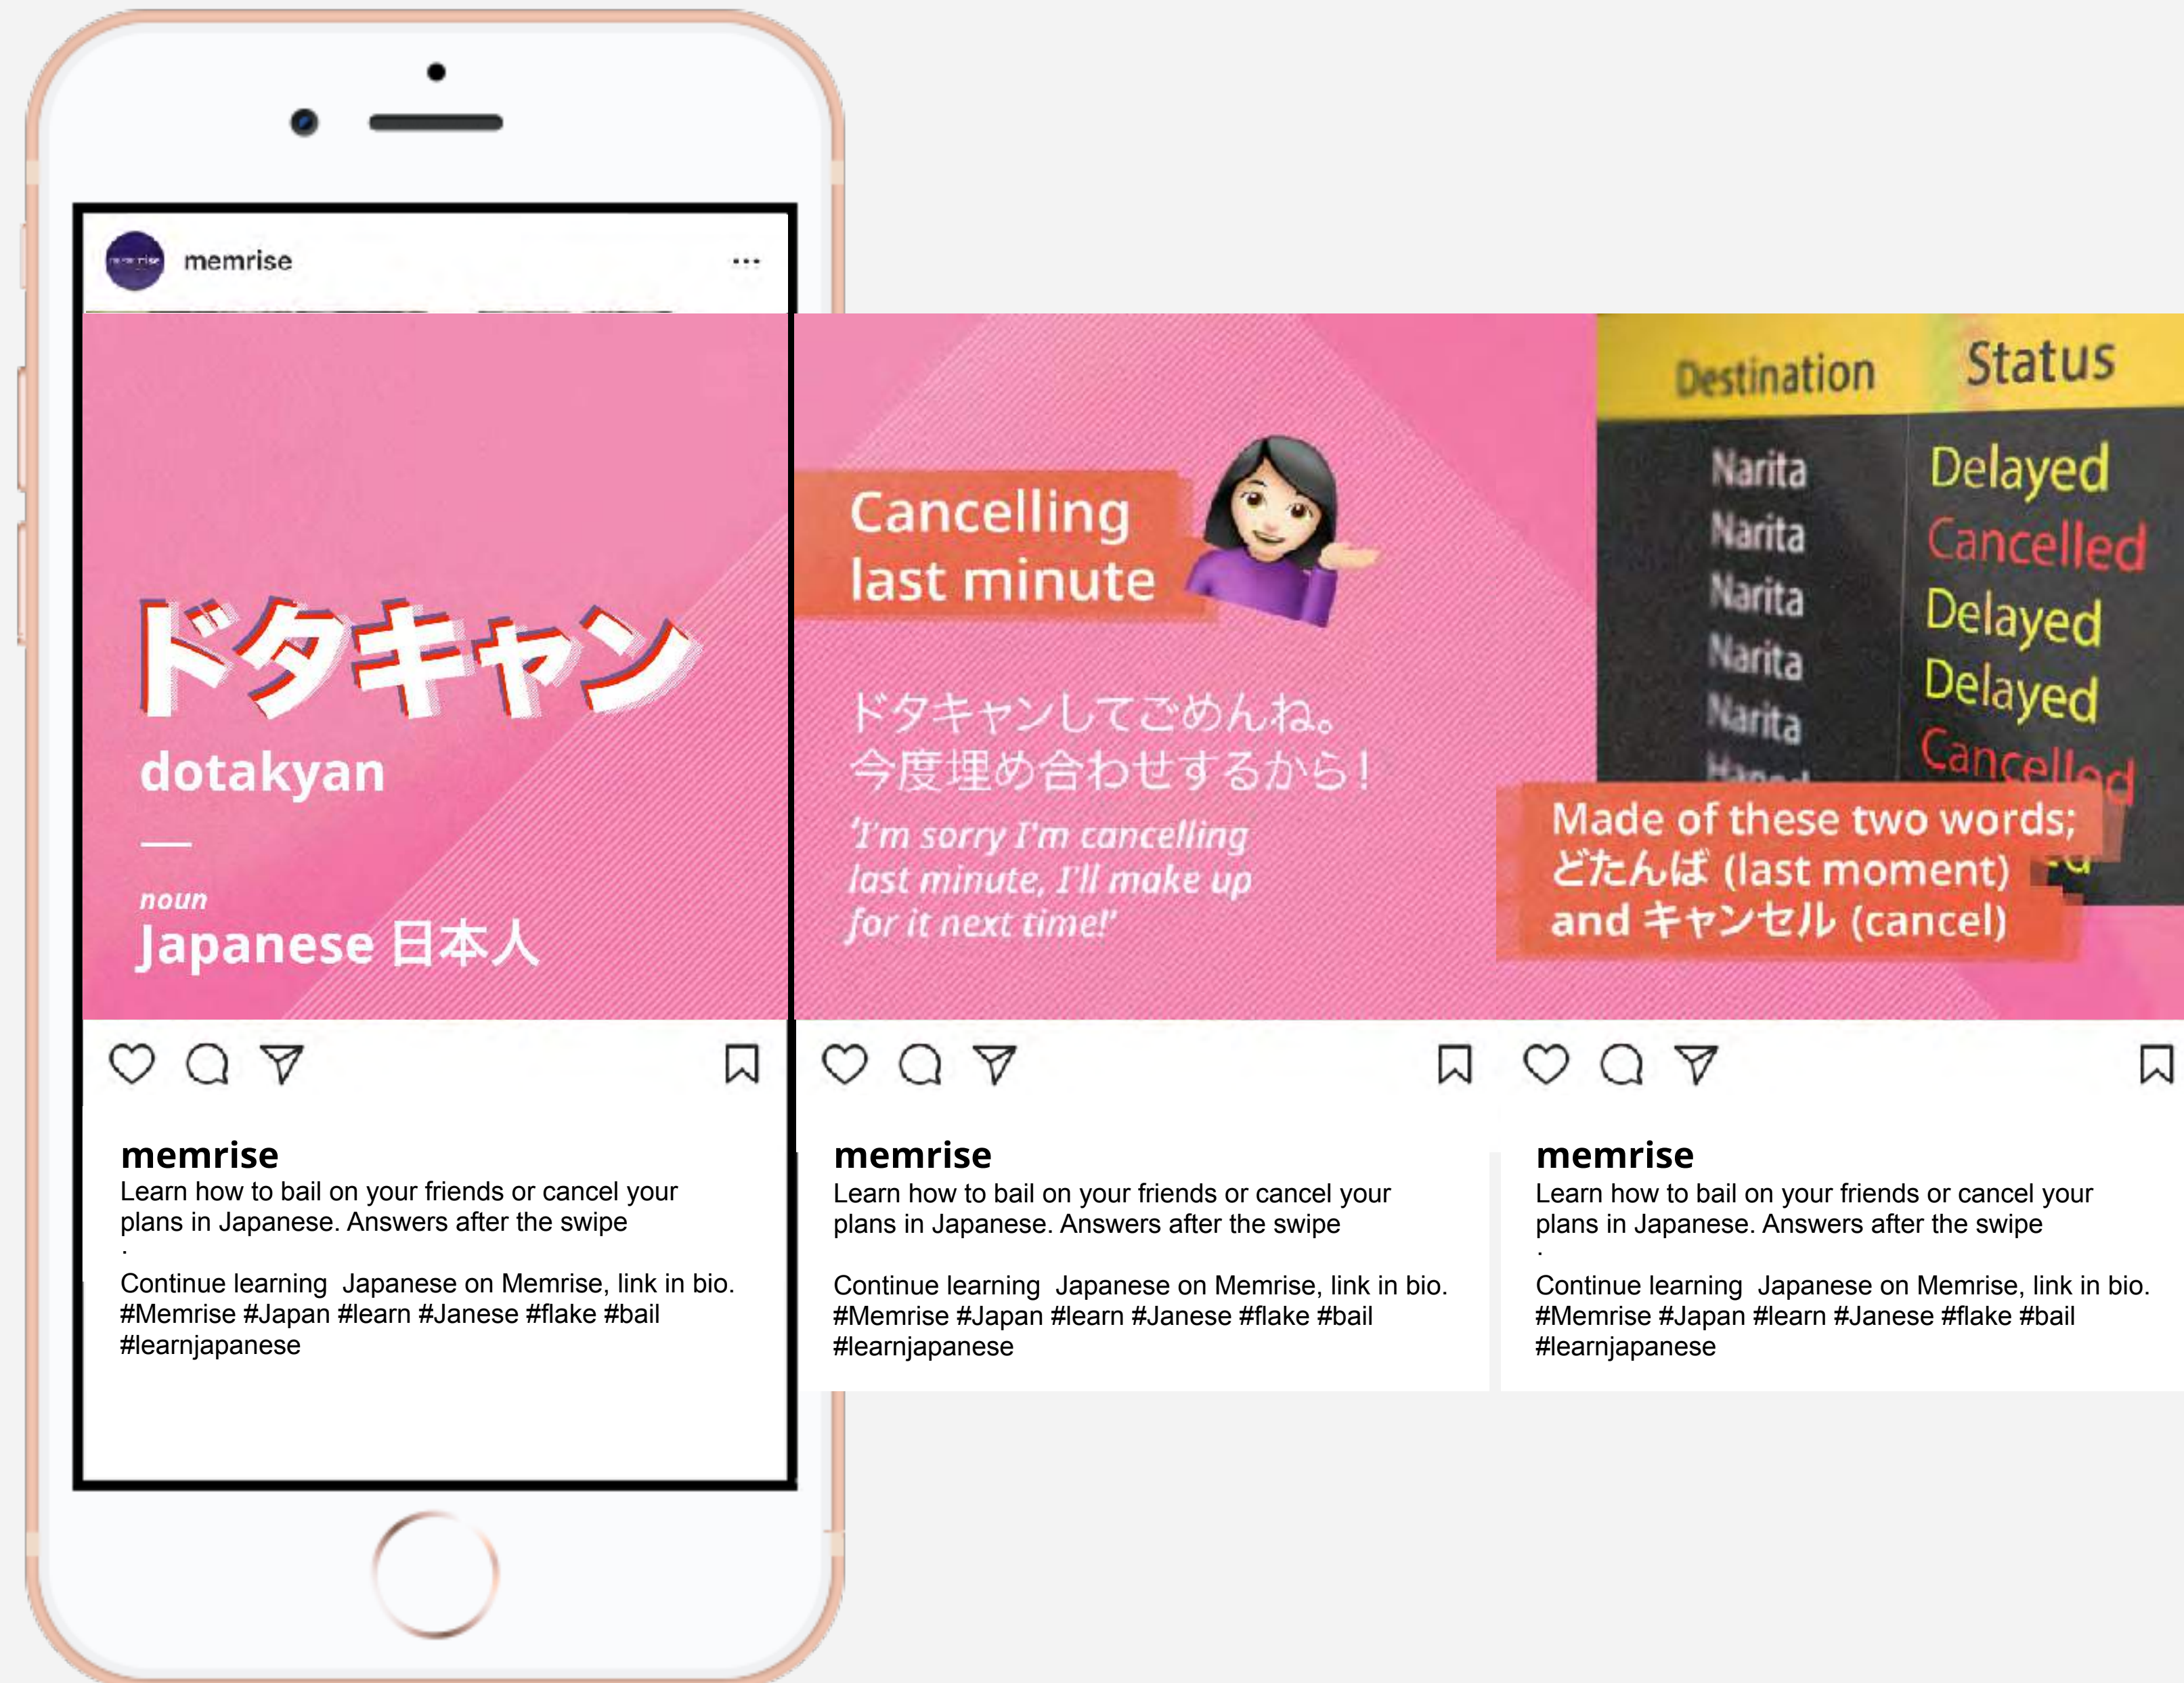

SLANG DICTIONARY TEMPLATE >

WALK-THROUGH >

Slang Dictionary are comprised of 3 jpeg outputs placed one after another in a carousel format that gives you detailed insight into a slang word. Each Slang Dictionary is laid out in a stylised template using a dictionary format that's easy to follow:

SLANG DICTIONARY ARE MADE UP OF THE FOLLOWING 3 FRAMES:

1. Slang word in target language
2. Definition in target language and source language, include a relevant emoji.
3. Image accompanied by etymology of the slang word.

SLANG DICTIONARY TEMPLATE >

WALK-THROUGH >

The fundamental elements for this particular slang:

TARGET LANGUAGE:

English speaking learning Japanese

THEME:

To cancel last minute

IMAGERY:

- Emoji on second image output
- Photography that summarises slang word

With / without Memrise

Original bitesize content that dramatises the benefit of being able to speak another language

Using stock we show moments where the viewer interacts with someone speaking another language.

We pause at the moment they speak and show the world without memrise:

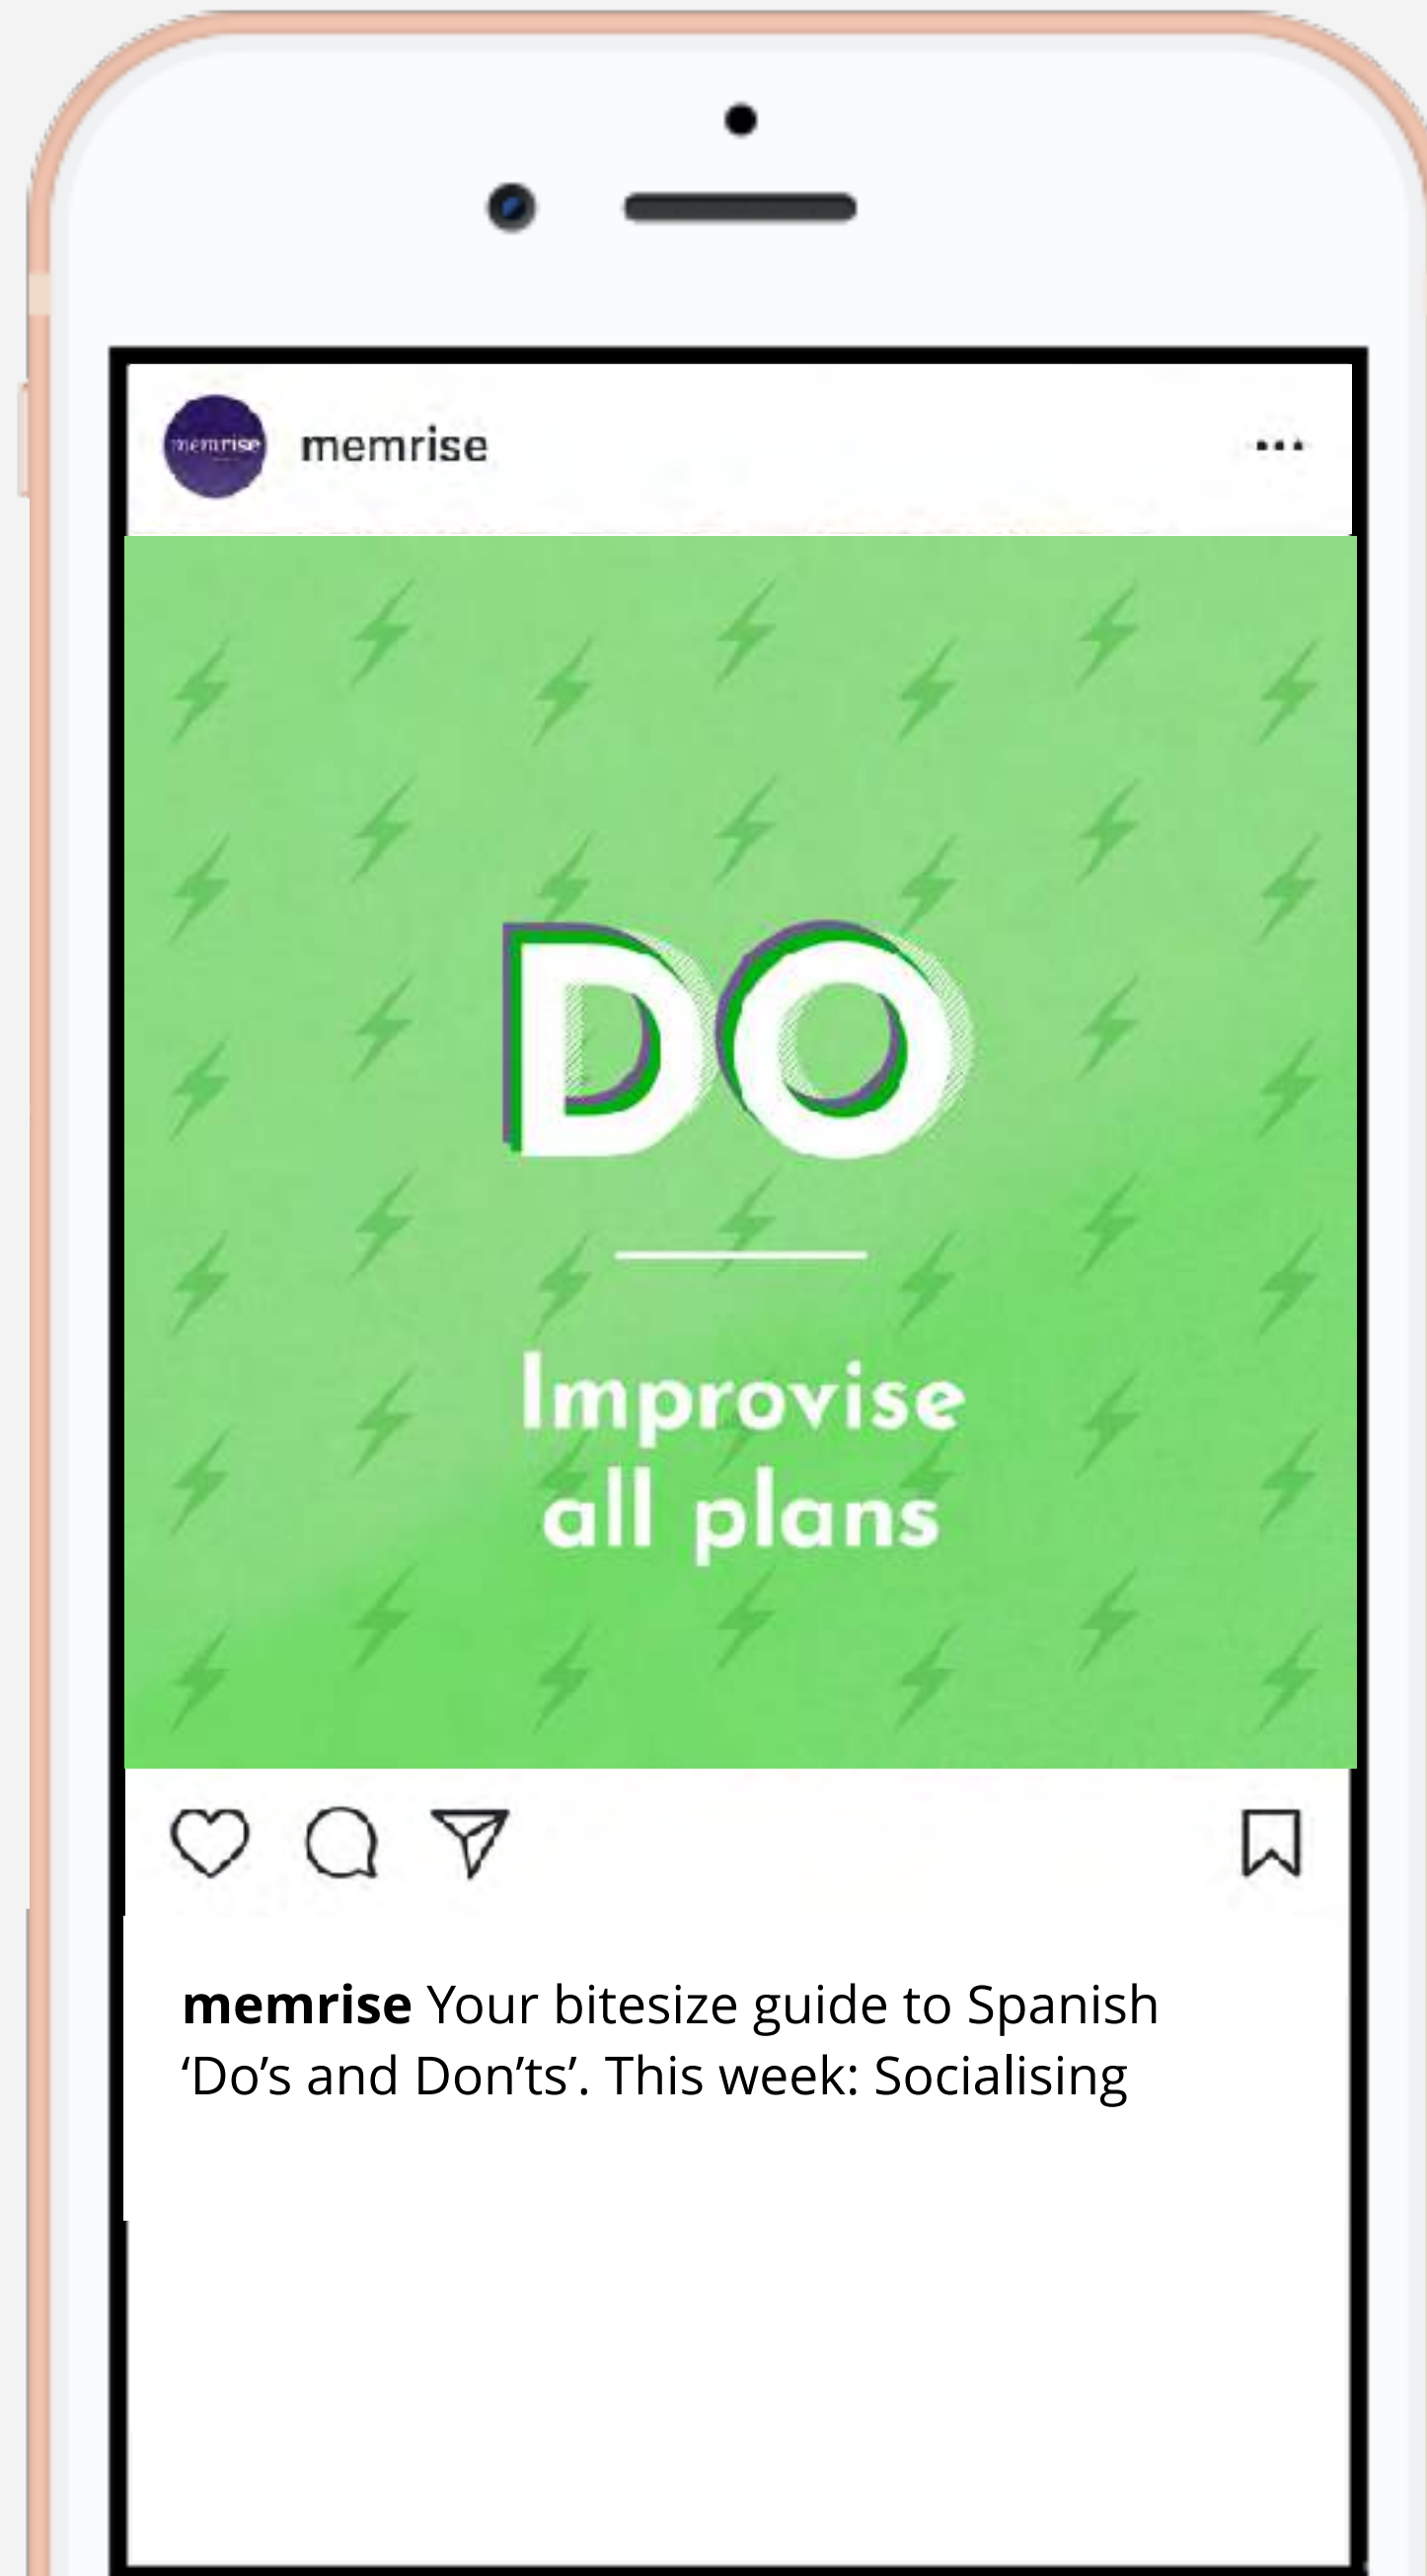

Eg. A Thai Street Food Vendor (in Thai with English SUPER):

"...that's 14 Baht"

We rewind the scene and show how it would play with Memrise language skills.

DO'S & DON'TS

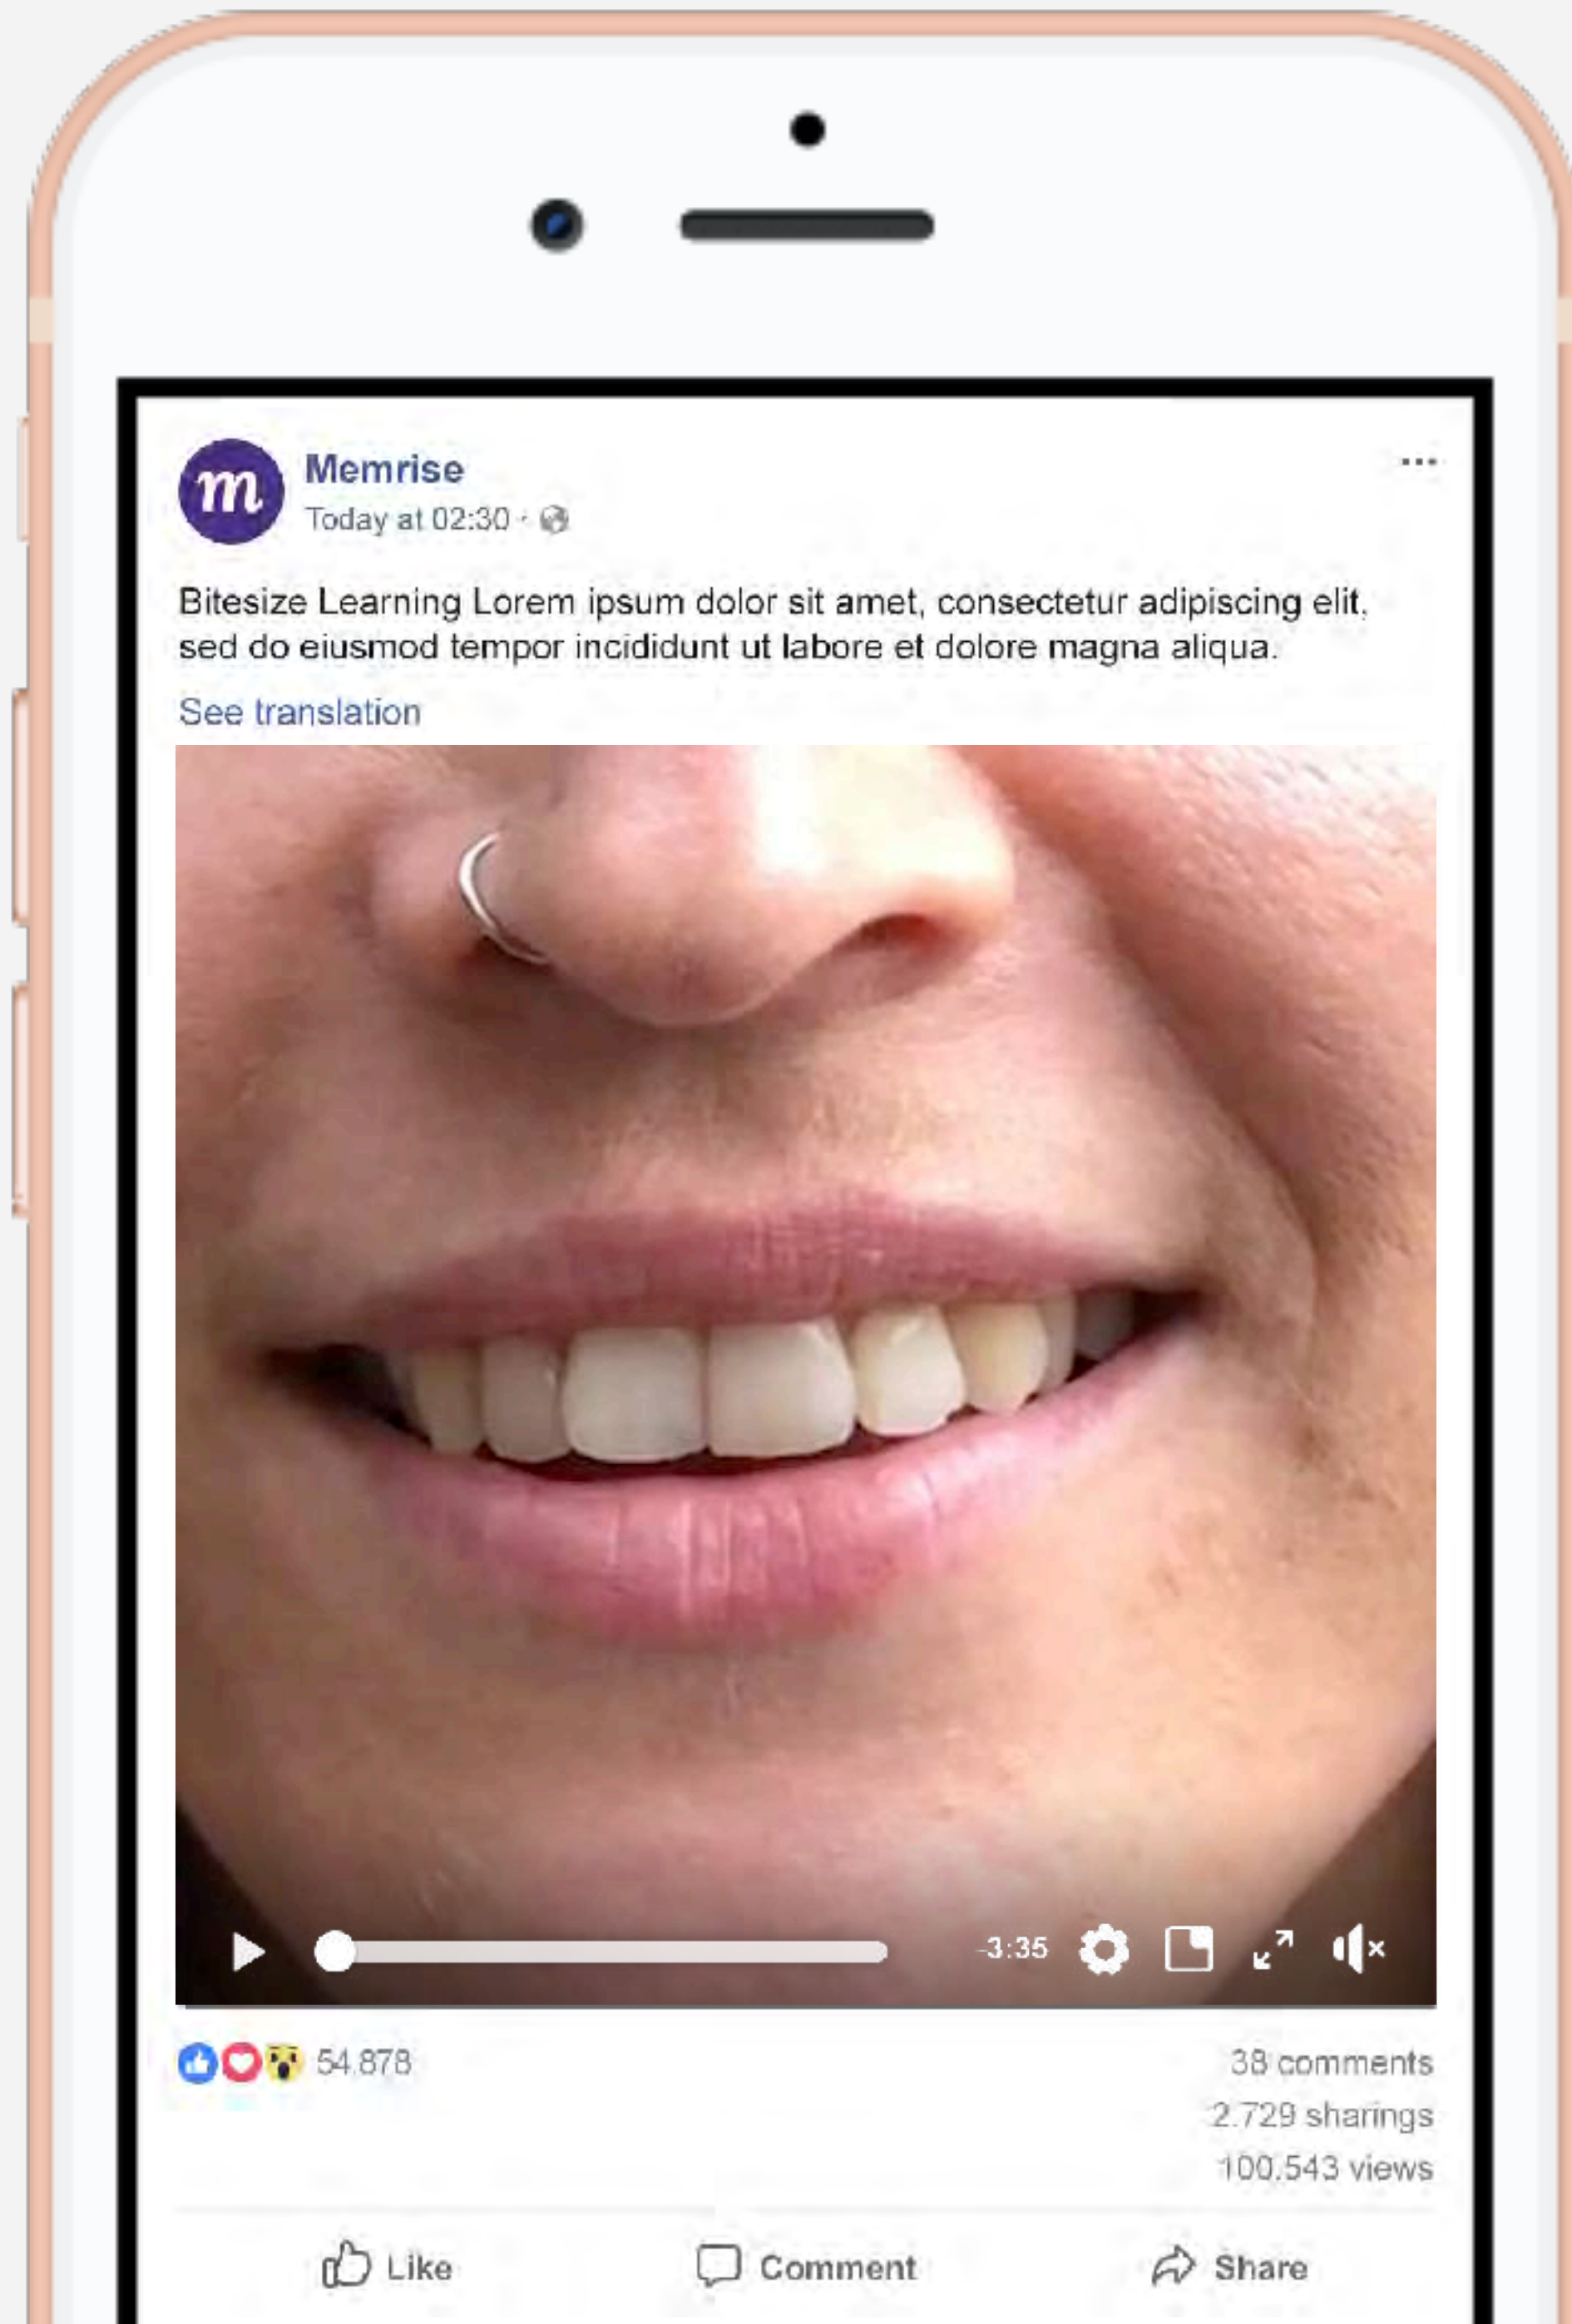

We use carousel posts to bring the social etiquettes of different cultures to life.

OT - 09 - Done (Missing footage)

'PAGMAMANO' (FILIPINO)

"A sign of respect to elders. Usually performed with the right hand, the person giving the greeting bows forward and presses their forehead to the elder's knuckles. In context, someone may Pagmamano to his or her older relatives upon entry into their home"

SOCIAL TEMPLATES
'WHAT ARE THEY SAYING?' CHALLENGE
OT - 12 WIP

Using a simple 'reply in comments' mechanic we incentivise engagement with LWL's content.

Users hear a LWL phrase and answer what they think is being said.

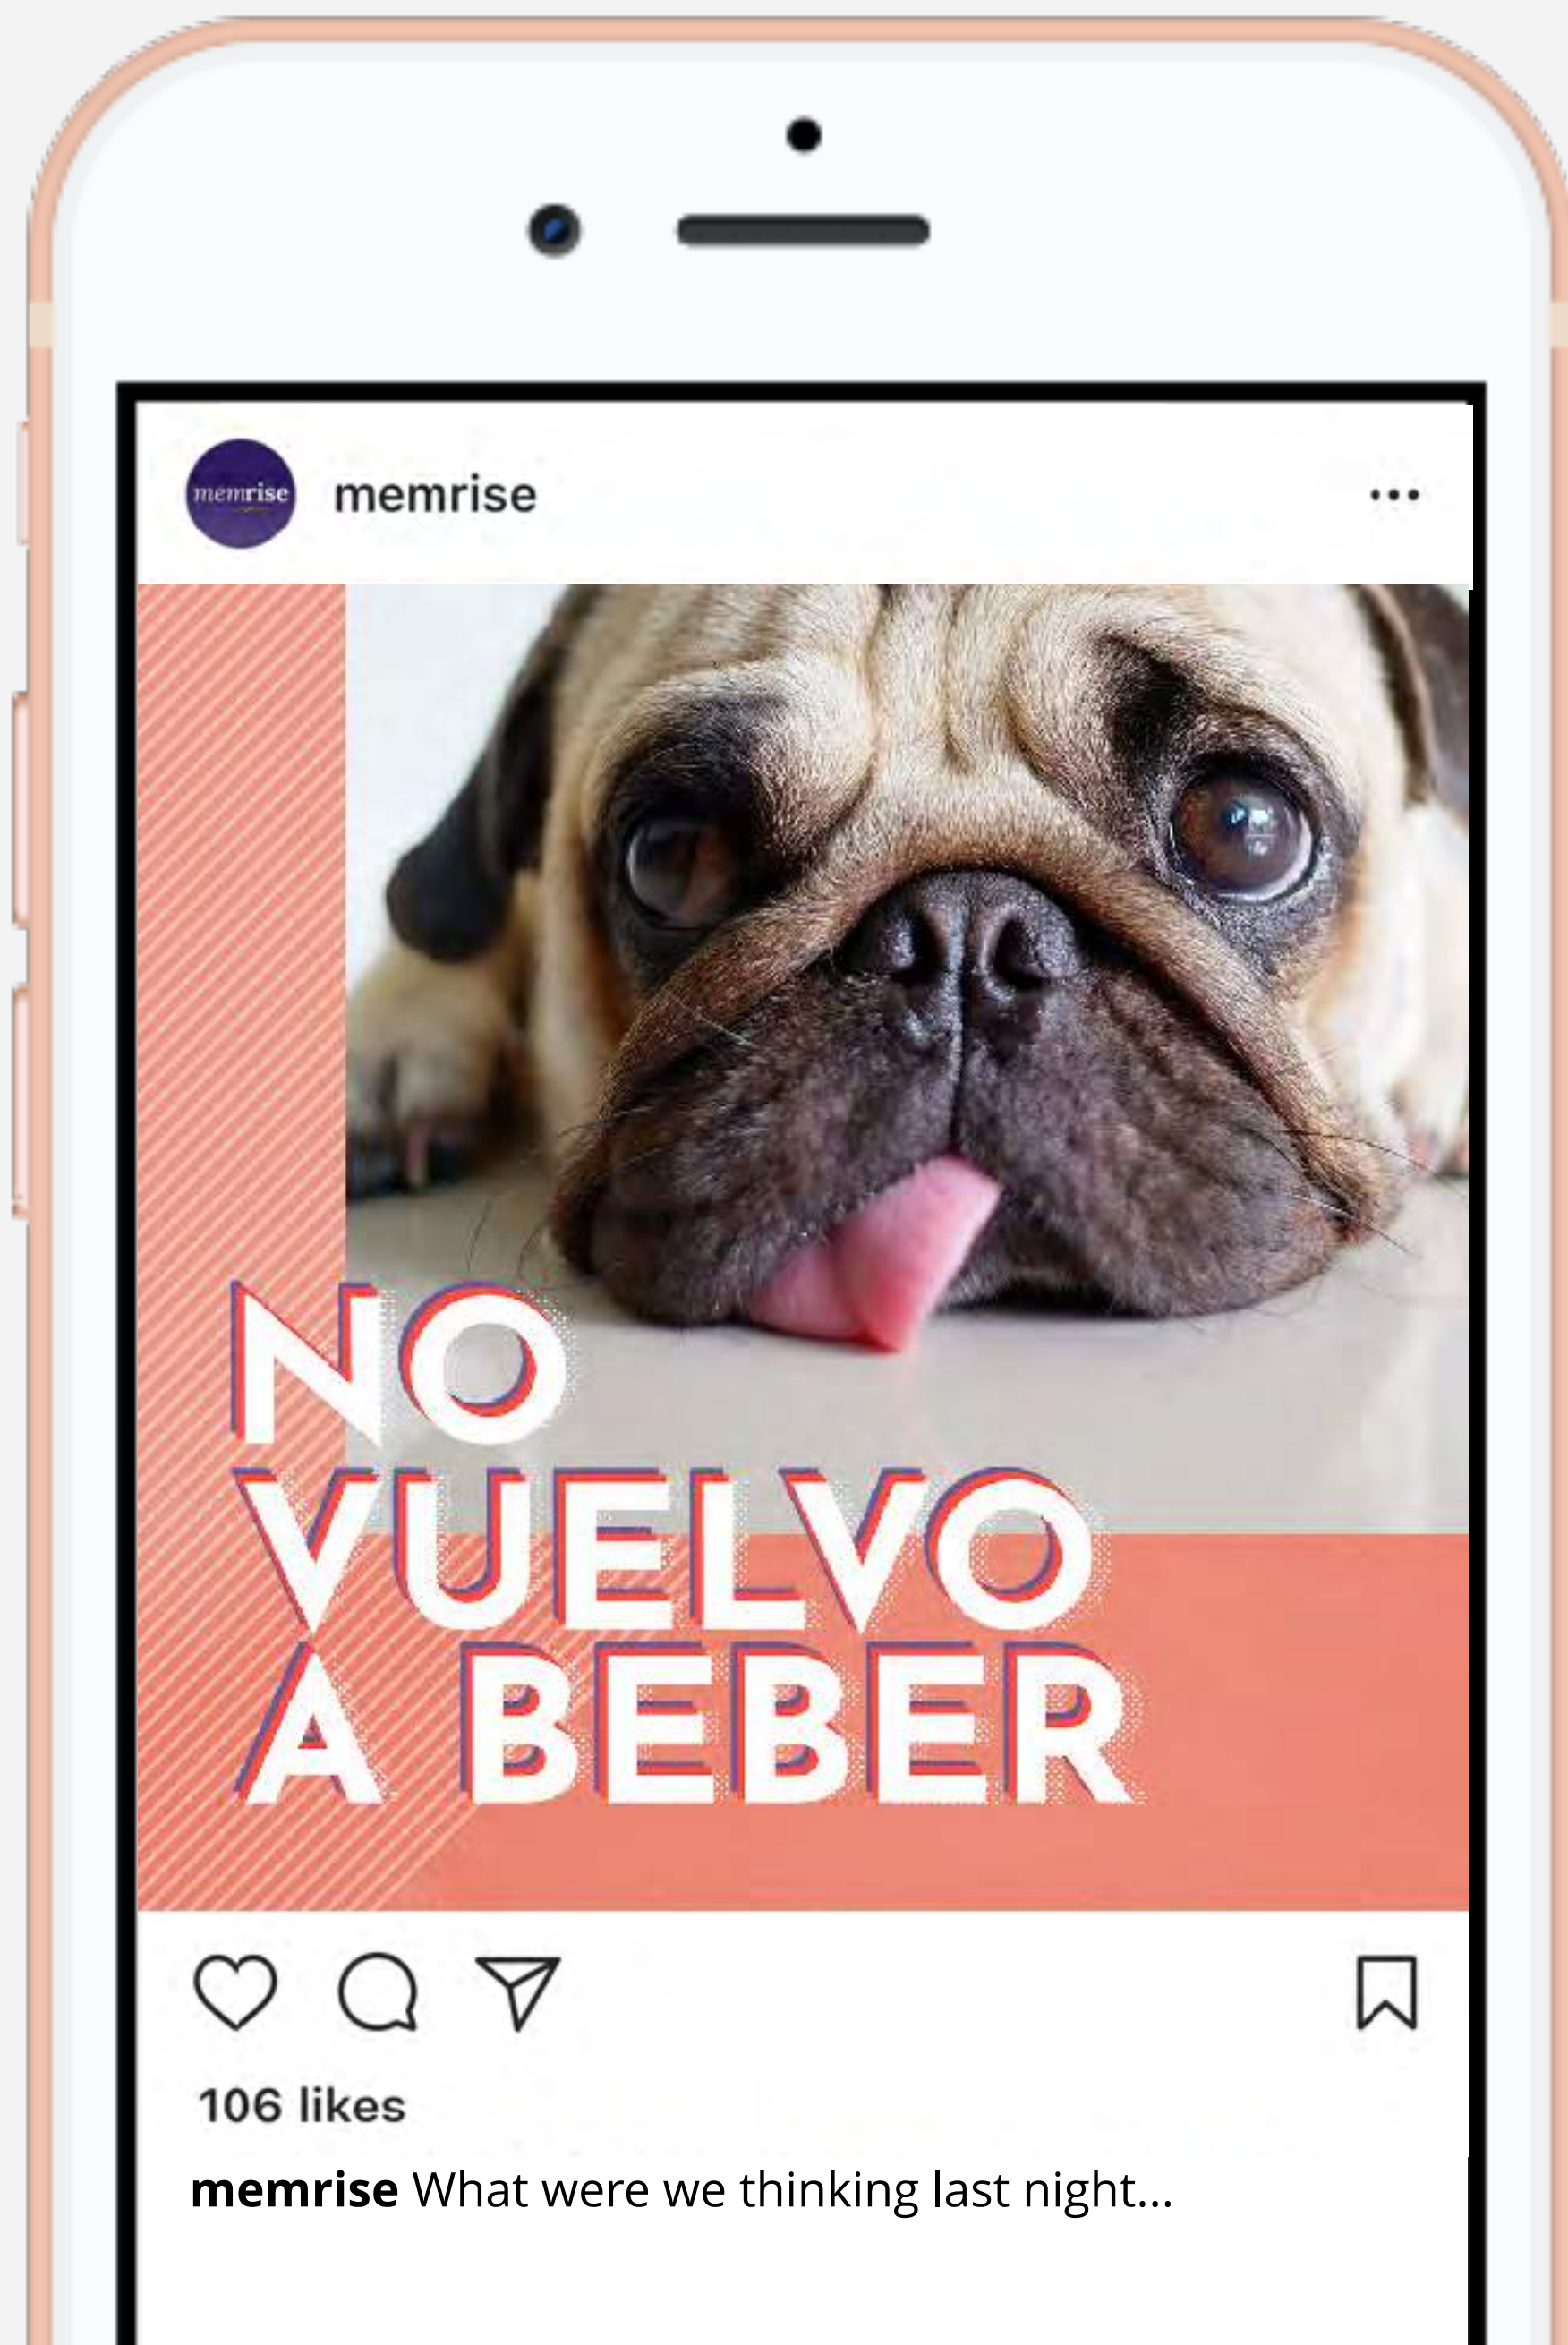

Correct answers are pooled for the chance to win a prize. Eg. a month of Memrise Pro.

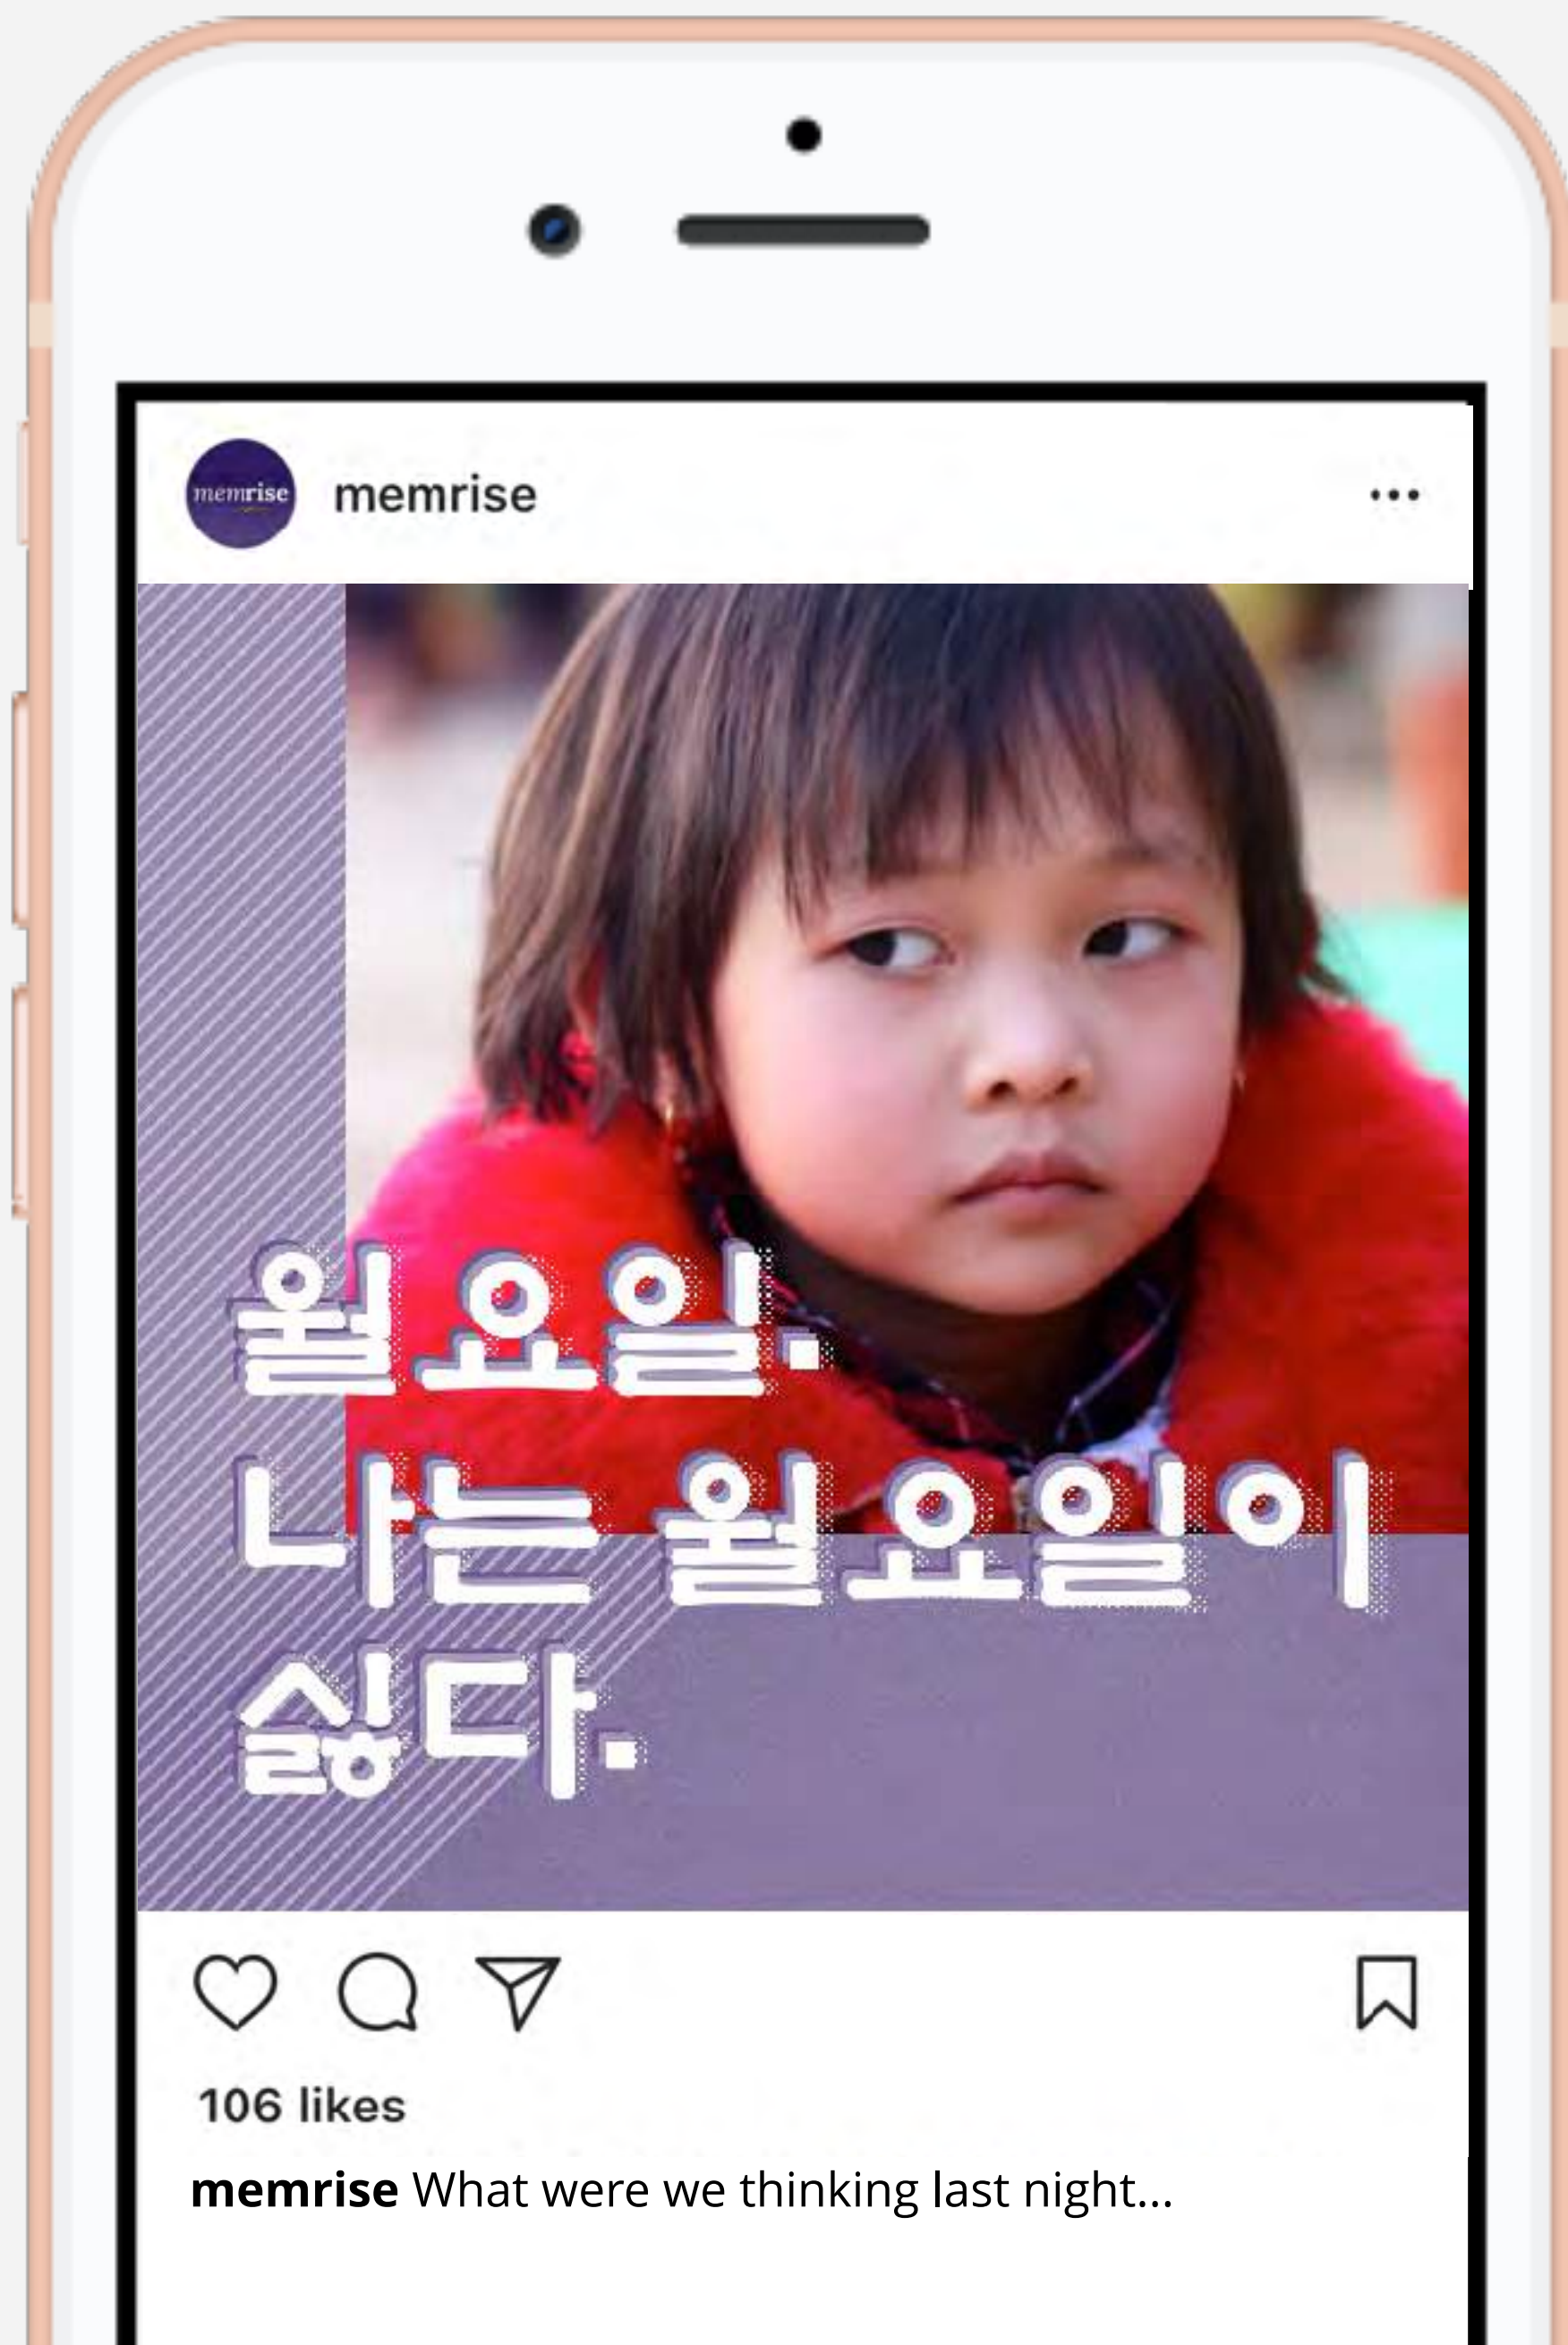

Community Managers engage with respondents, for example liking the correct answers.

TAG A FRIEND

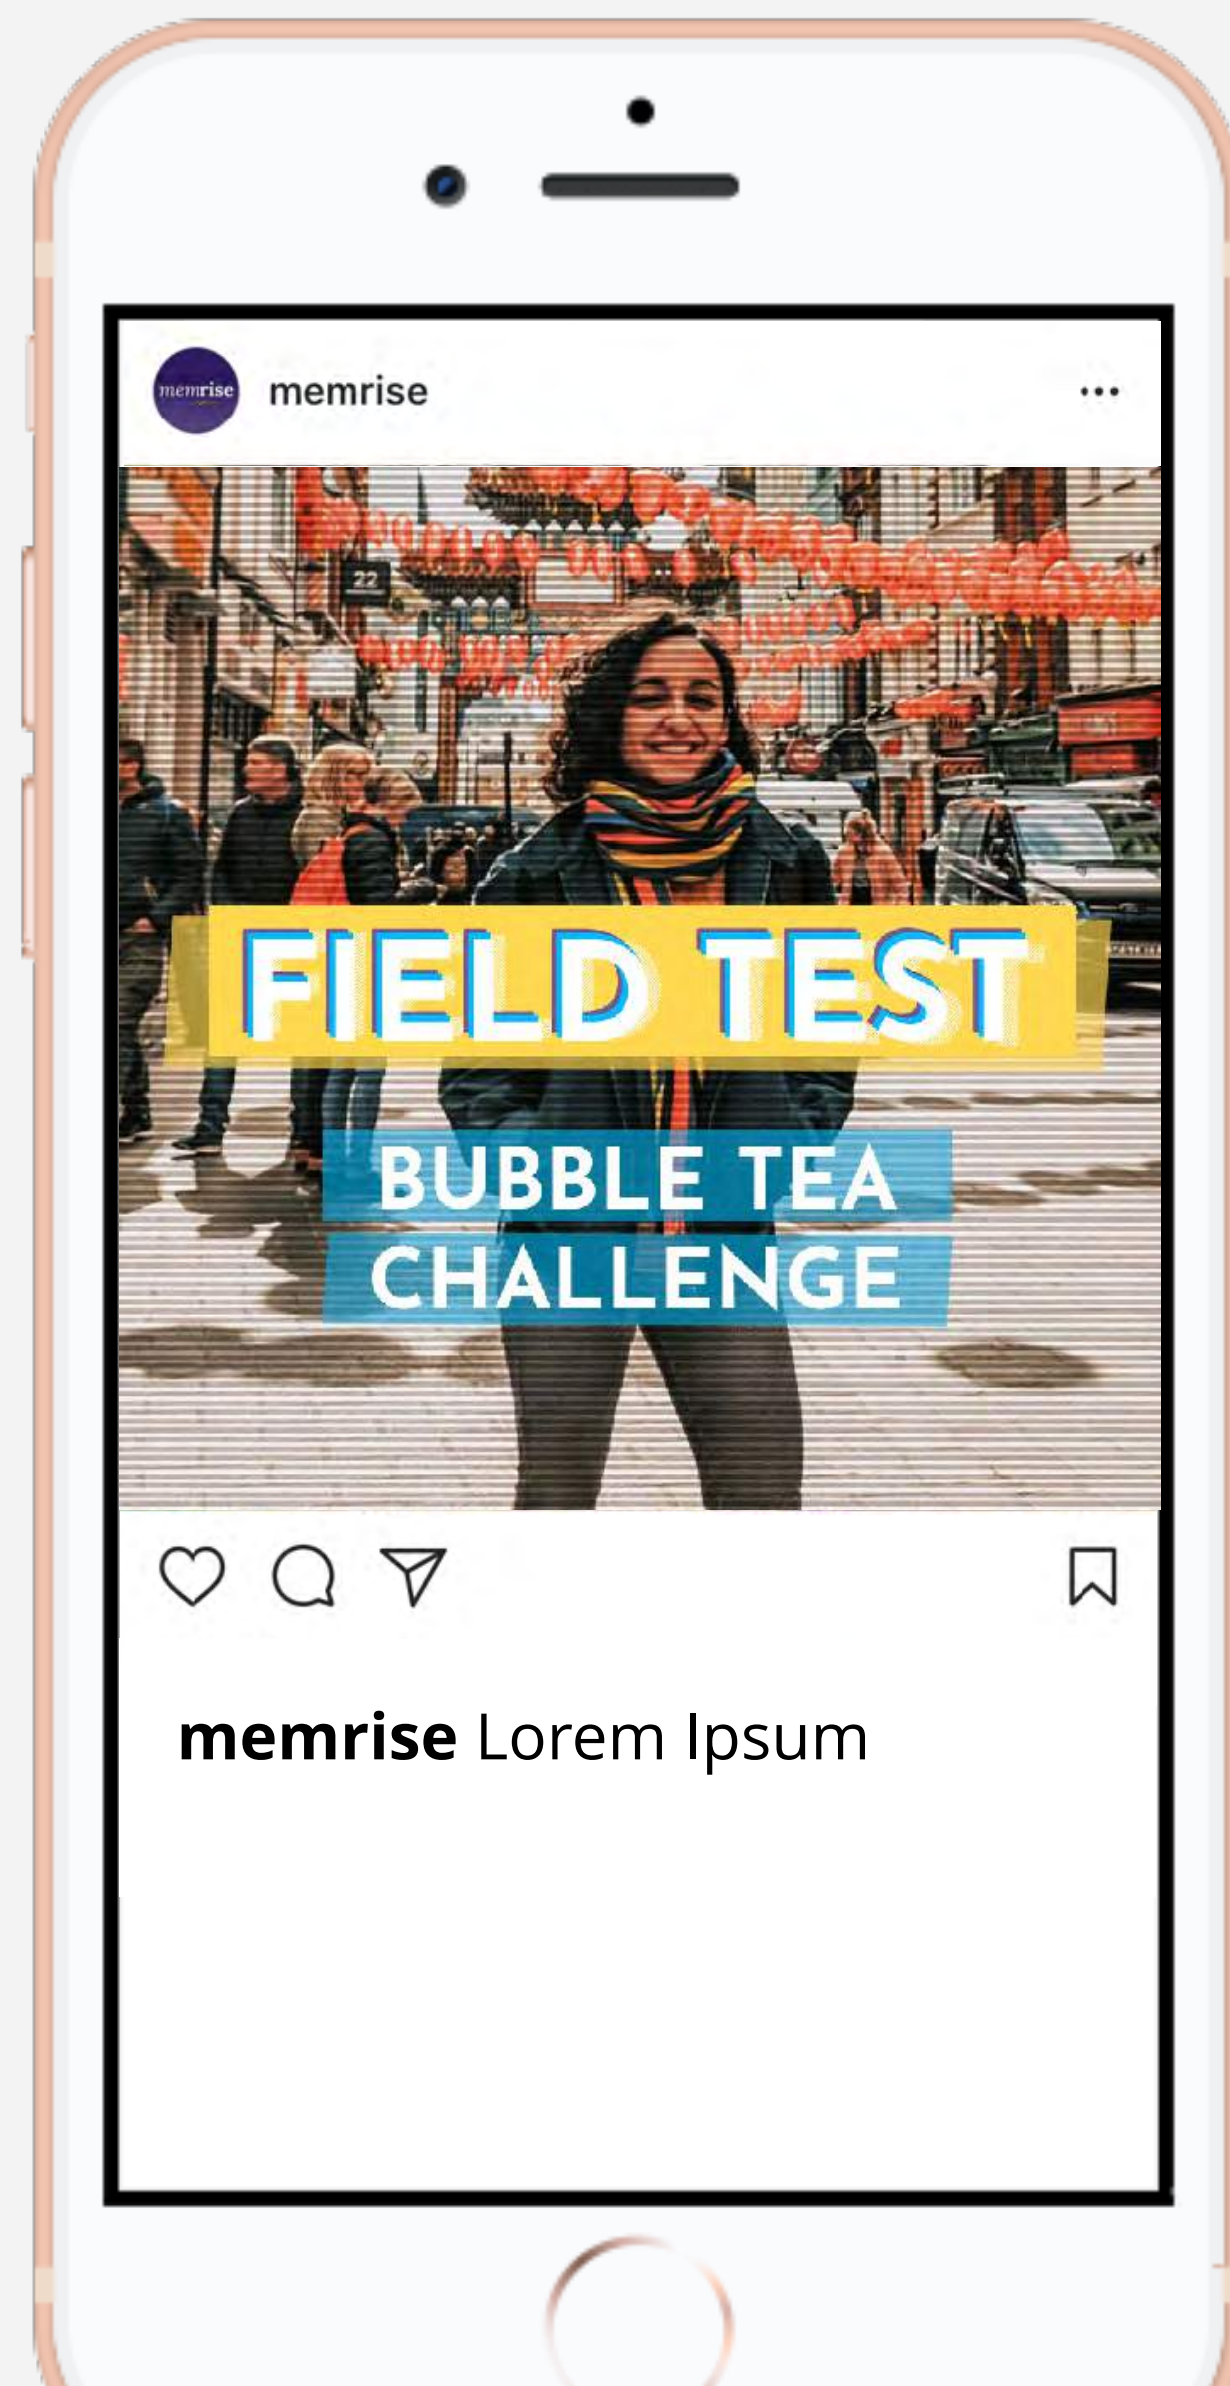

Timely, contextually relevant posts (translated into our target language) that encourage audience engagement.

FIELD TEST

We take new Memrise learners out to field test what they've learned. Bitesize video shows their attempts to use their new found skills among the expat communities where they live.

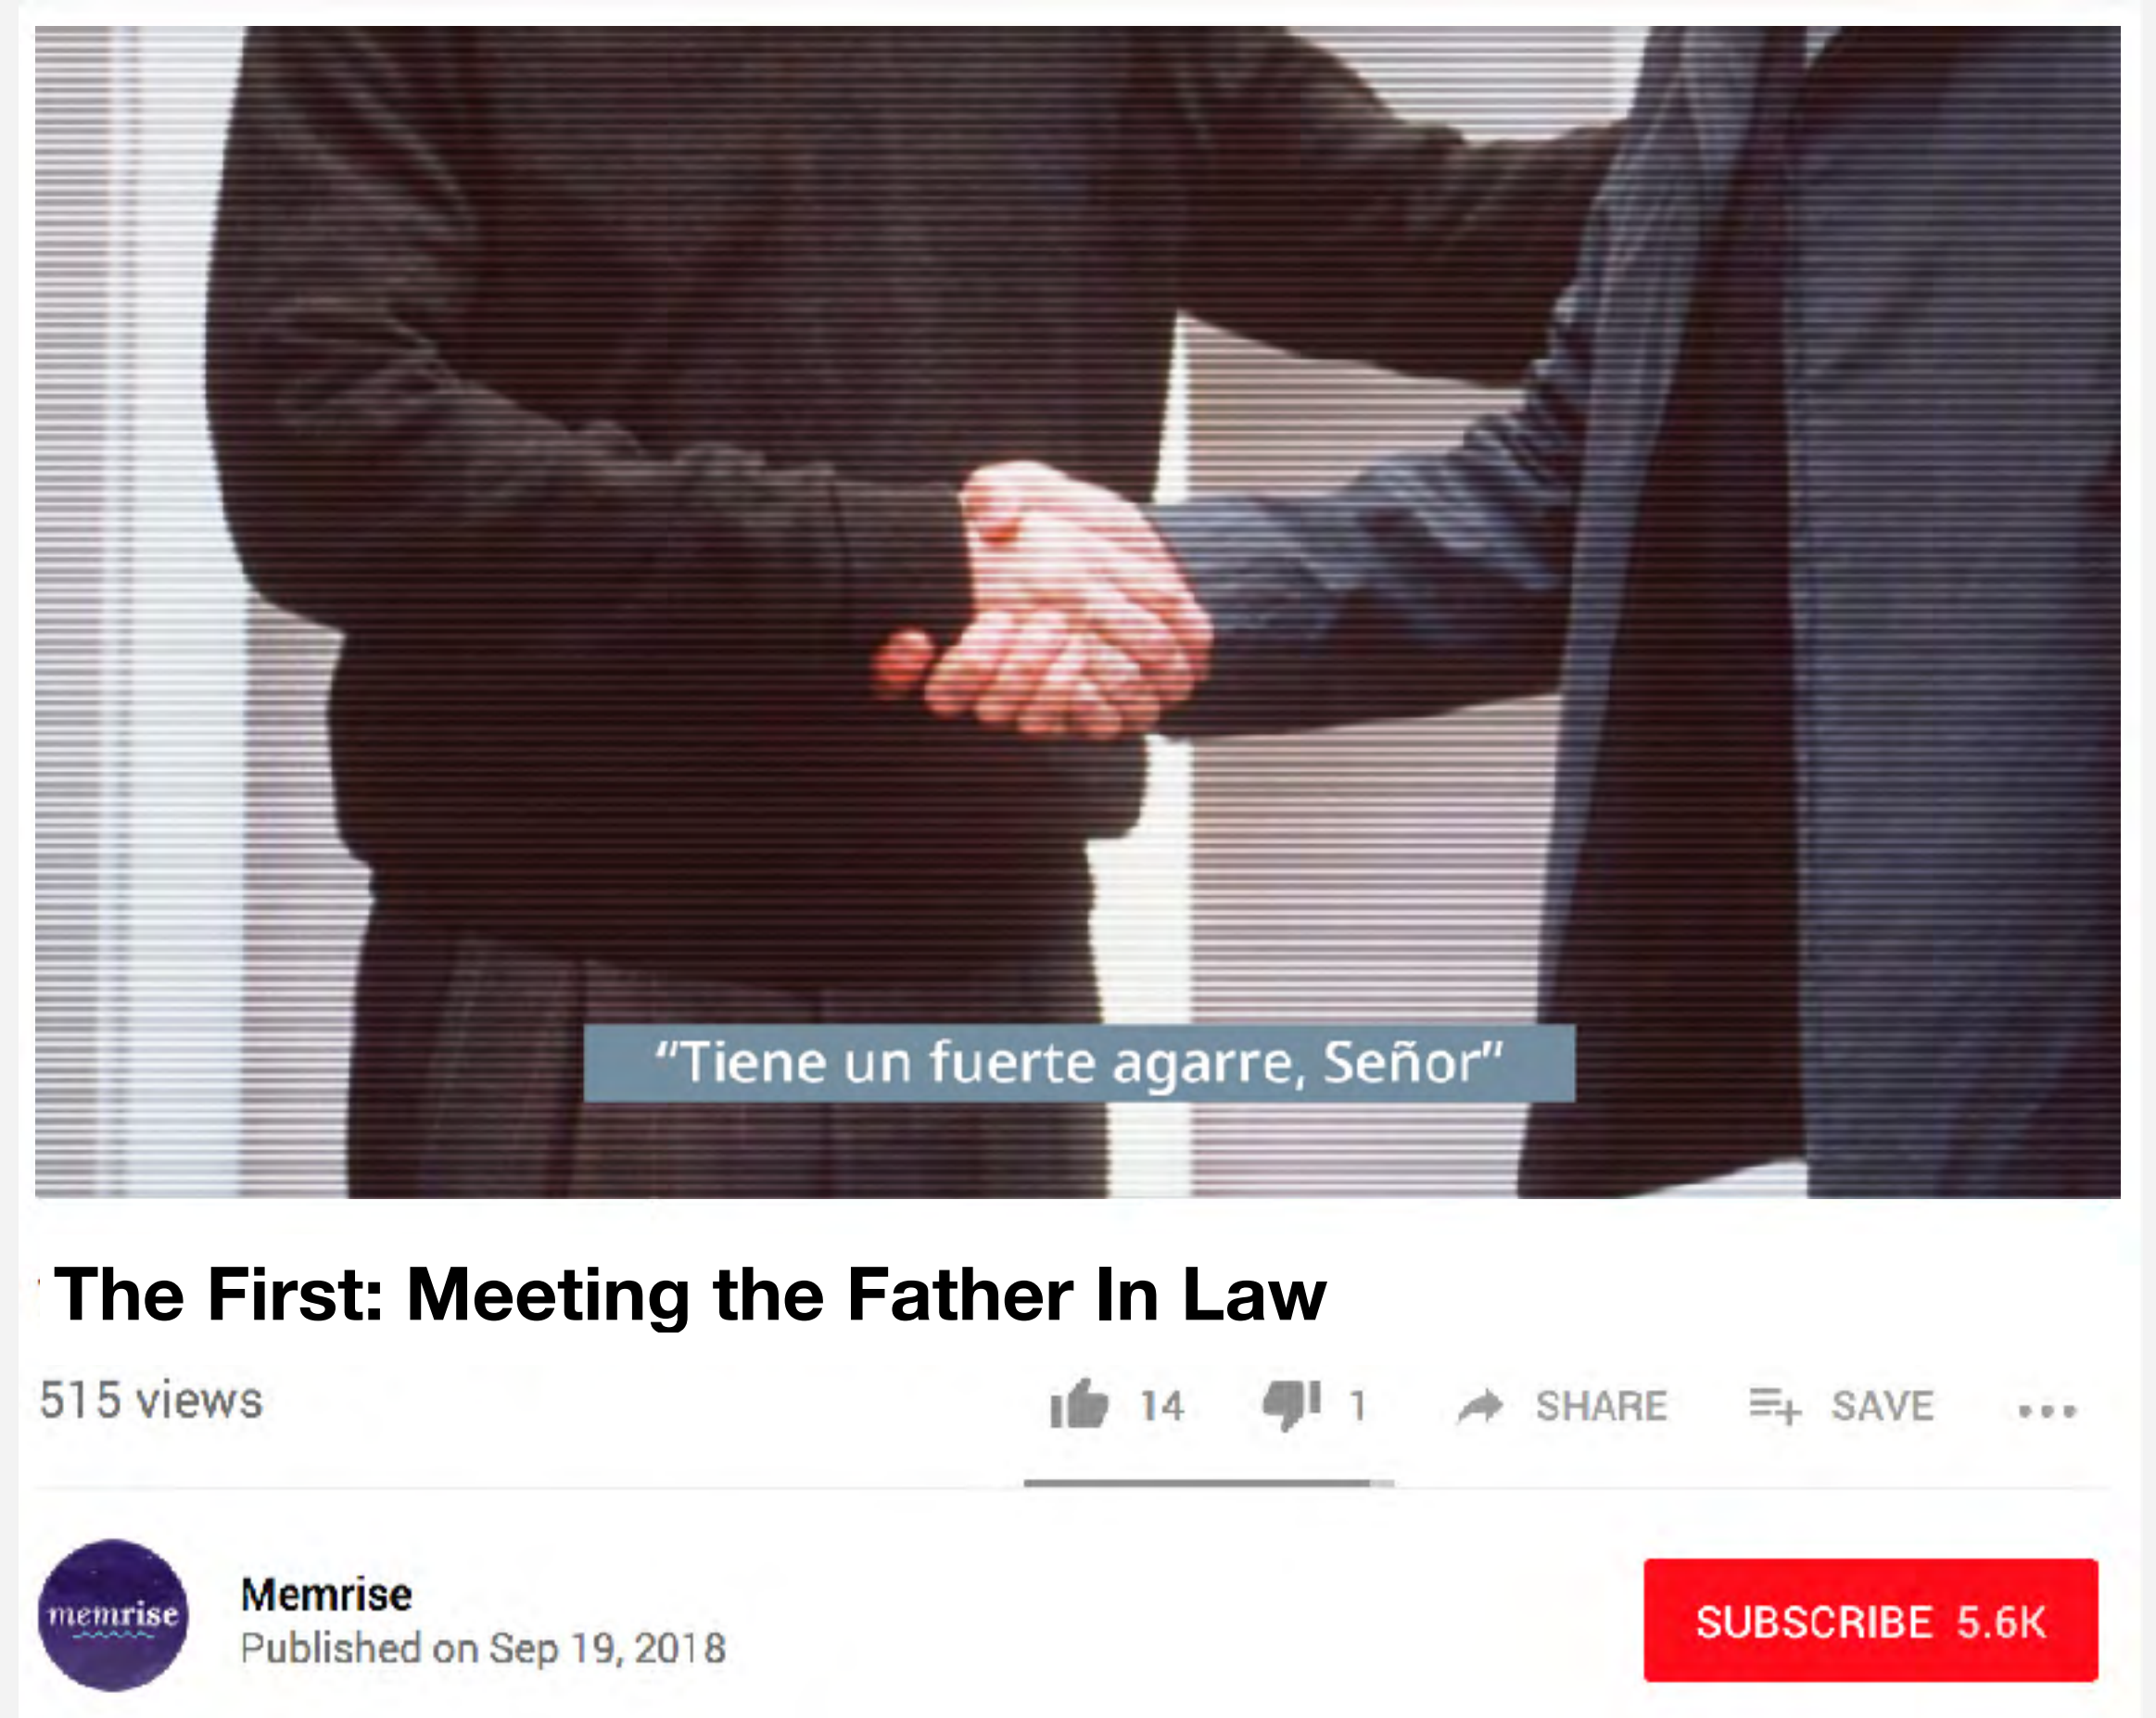

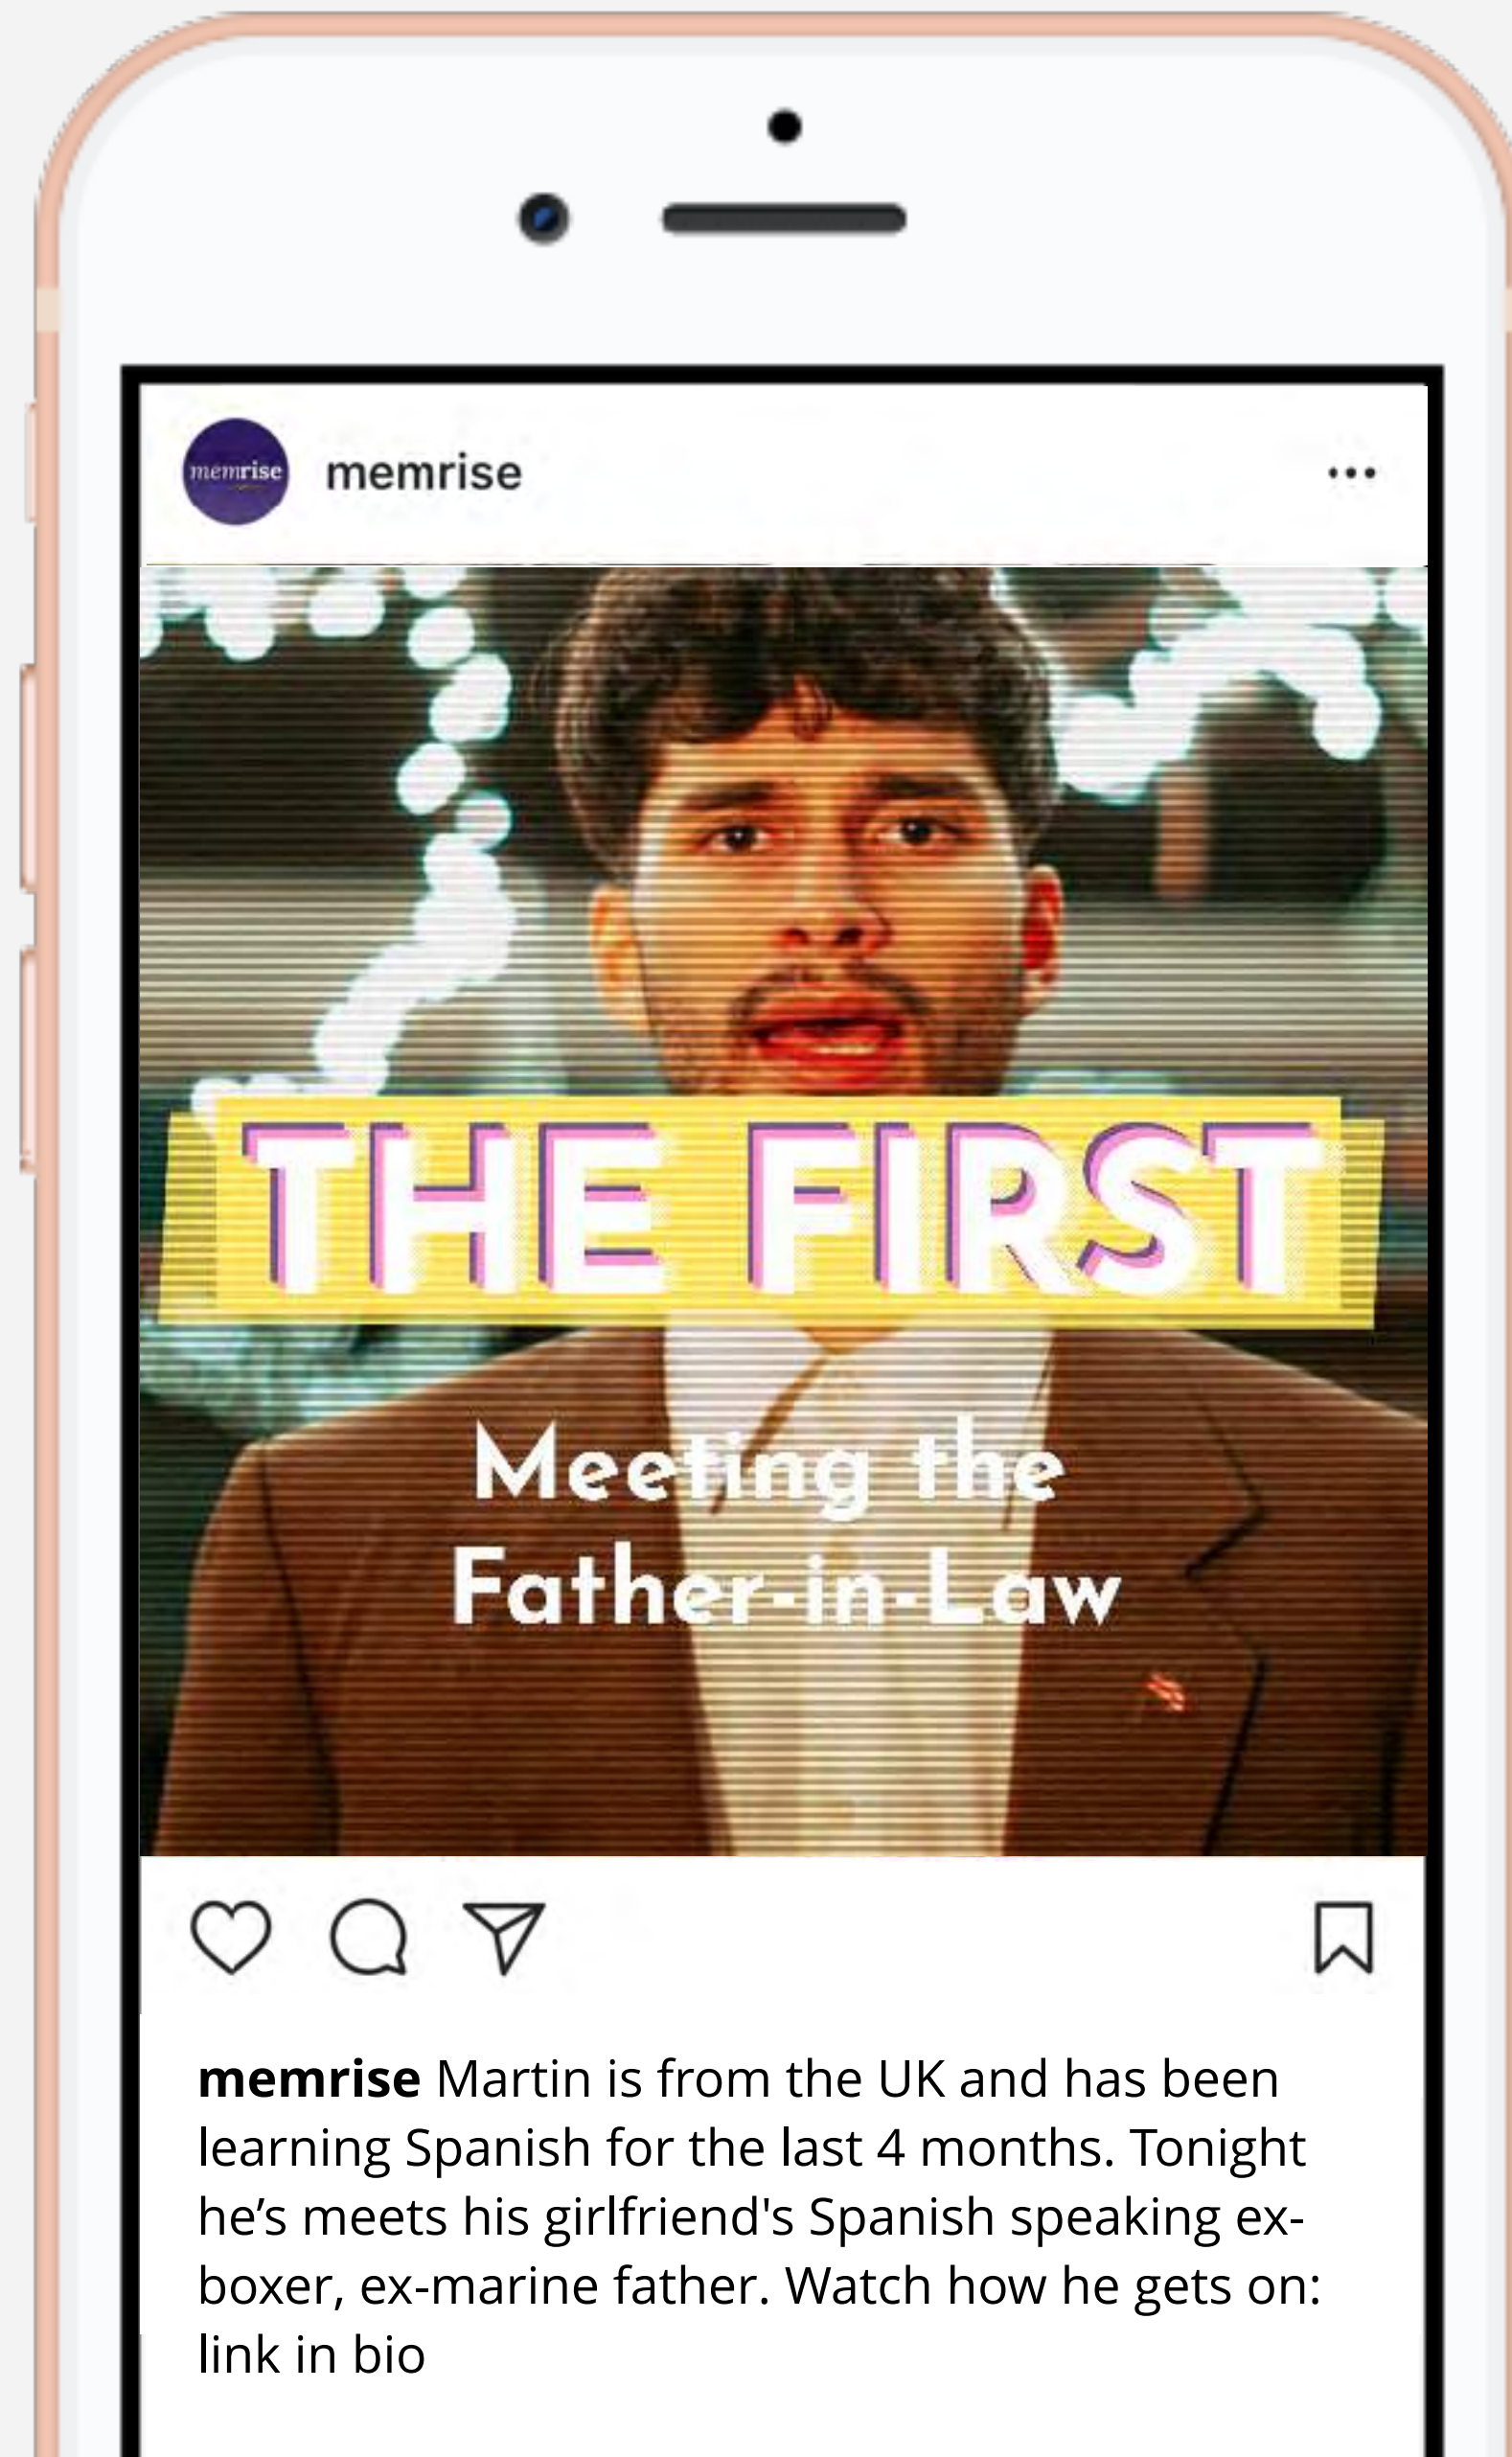

LANGUAGE UNDER PRESSURE

In longer form YouTube content we up the ante by showing more advanced Memrise learners using their language skills in high pressure situations.

BEYOND THE STEREOTYPES

Bitesize, repeatable content that introduces users to more meaningful culturally relevant insights into the country whose language they're learning.

INSTA POST
LANGUAGE UNDER PRESSURE
Of Titles - 02 WIP

The content exists in longform on YouTube. We work with a relevant Influencer to create insightful films that go beyond the touristic stereotypes.

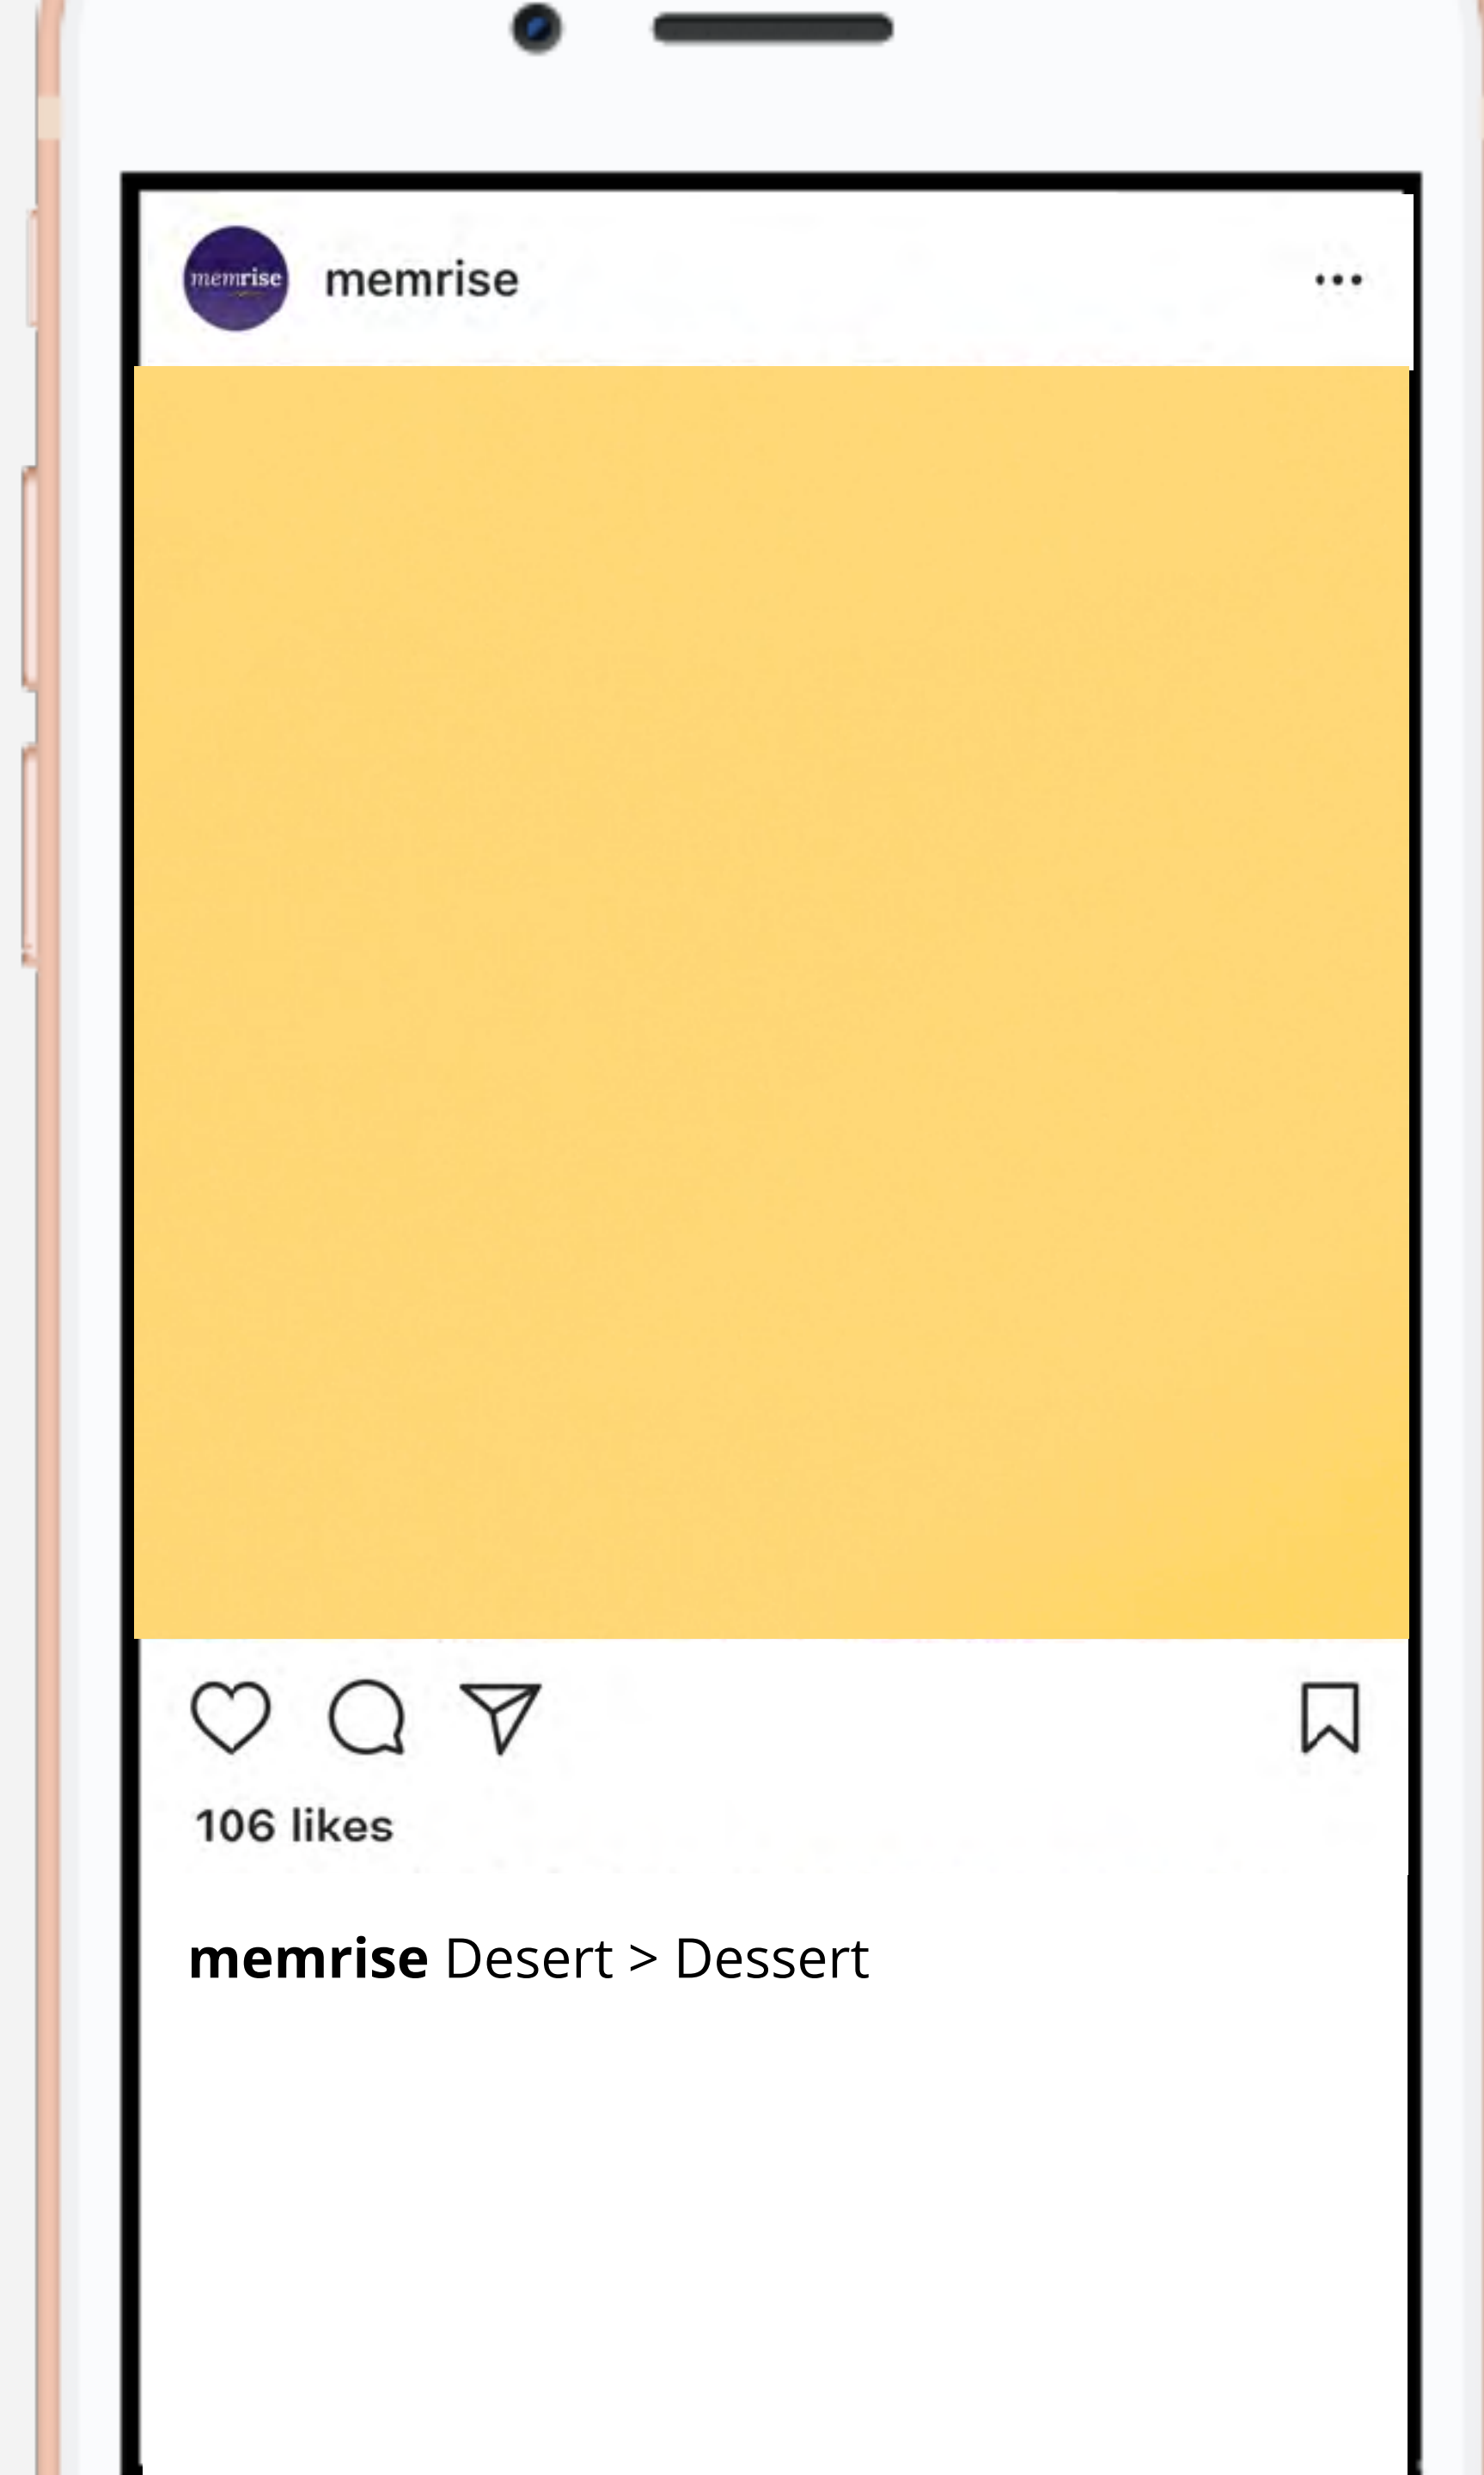

Each film is teased in social (in memrise and Influencer channels) with links to the longer form YT content.
